COMMITTEE ON AGRICULTURE

Twenty-eighth Session

18 - 22 July 2022

Progress report on the implementation of the FAO Strategy on Mainstreaming Biodiversity across Agricultural Sectors and its 2021-23 Action Plan

Executive Summary

The Council, at its 163rd Session, adopted the *FAO Strategy on Mainstreaming Biodiversity across Agricultural Sectors* (Strategy). At its 166th Session, the Council approved the *2021-23 Action Plan for the Implementation of the FAO Strategy on Mainstreaming Biodiversity across Agricultural Sectors* (Action Plan). It is foreseen that the Action Plan will be further developed in the light of new developments and agreements, including those reached under the Convention on Biological Diversity (CBD), the Commission on Genetic Resources for Food and Agriculture (CGRFA) and the International Treaty on Plant Genetic Resources for Food and Agriculture (ITPGRFA), and experiences with the implementation of the Strategy and the Action Plan.

This document provides an overview of progress in the implementation of the Strategy and the Action Plan. It also presents a draft Action Plan for the period 2024 to 2027.

Suggested action by the Committee

The Committee is invited to:

- *welcome* progress made in the implementation of the FAO Strategy on Mainstreaming Biodiversity across Agricultural Sectors and its 2021-23 Action Plan;
- *review* the draft 2024-27 Action Plan for the Implementation of the FAO Strategy on Mainstreaming Biodiversity across Agricultural Sectors, as set out in Annex 2 to this document.

Queries on the substantive content of the document may be addressed to:

Mr Eduardo Mansur
Director
Office of Climate Change, Biodiversity and Environment (OCB)
Tel: +39 065 70 55978

I. Introduction

1. As mandated by the 41st Session of the FAO Conference,¹ the FAO Council, at its 163rd Session, adopted the *FAO Strategy on Mainstreaming Biodiversity across Agricultural Sectors* (Strategy).² The Strategy aims to achieve its goals in a structured and coherent manner, taking into account national priorities, needs, regulations and policies, and country programming frameworks. At its 166th Session, the Council approved the *2021-23 Action Plan for the Implementation of the FAO Strategy on Mainstreaming Biodiversity across Agricultural Sectors* (Action Plan).³

2. The implementation of the Strategy is monitored by FAO, which reports to the relevant Governing and Statutory Bodies. The Strategy is updated periodically to reflect evaluation outcomes and new global agreements, including those under the Convention on Biological Diversity (CBD) and the Commission on Genetic Resources for Food and Agriculture (CGRFA). Periodic updating of the Action Plan to reflect such developments is also envisaged.

3. This document reports on progress in the implementation of the Strategy and the Action Plan, notes relevant developments and presents a draft Action Plan for 2024 to 2027 for consideration by the Committee.

II. Progress in the implementation of the Strategy and Action Plan

4. The implementation of the Strategy is guided by its Action Plan. The latter specifies key actions, deliverables and delivery dates for each of the following four outcomes of the Strategy:

- Outcome 1: Support provided to Members, at their request, to enhance their capacity to mainstream biodiversity.
- Outcome 2: Biodiversity mainstreamed across FAO's policies, programmes and activities.
- Outcome 3: Role of biodiversity and its ecosystem services for food security and nutrition globally recognized.
- Outcome 4: Coordination and delivery of FAO's work on biodiversity strengthened.

5. The Strategy is implemented following the principle of leaving no one behind.

6. Annex 1 to this document provides information on the implementation of the 182 planned deliverables for the period 2021-2023. The actions and deliverables listed in the Action Plan are not exhaustive of FAO's work related to mainstreaming biodiversity in agricultural sectors.

7. Fifty-seven deliverables (31 percent) had been completed as of April 2022; 111 (61 percent) were on track for delivery as planned; 14 (8 percent) had been delayed to end of 2022 or 2023 because of the COVID-19 pandemic, rescheduled events or delays by service providers. The status of the implementation of deliverables by outcome is summarized in table 1.

Table 1. Status of implementation of deliverables as of April 2022, by outcome.

	Number of deliverables completed	Number of deliverables on track	Number of deliverables delayed	Total
Outcome 1	23	75	7	105
Outcome 2	1	2	0	3
Outcome 3	27	30	7	64
Outcome 4	6	4	0	10
Total	57	111	14	182

² FAO. 2020. *FAO Strategy on Mainstreaming Biodiversity across Agricultural Sectors*. Rome. <https://doi.org/10.4060/ca7722en>

³ CL 166/REP, paragraph 24 h. www.fao.org/3/nf693en/nf693en.pdf

8. Over half the deliverables under FAO core function 7, “Advocate and communicate at national, regional and global levels, in areas of FAO’s mandate”, and 45 percent of those under core function 3, “Facilitate, promote and support policy dialogue at global, regional and country levels”,⁴ have been completed. Figure 1 presents the status of implementation of deliverables by core function.

Figure 1. Status of implementation of deliverables as of April 2022, by FAO core function

9. Completed activities cover a variety of topics. The following subsections present information on select completed deliverables for illustrative purposes. Annex 1 provides the status of all deliverables.

Support provided to Members, at their request, to enhance their capacity to mainstream biodiversity (Outcome 1)

10. This outcome comprises activities that help countries develop and implement normative instruments, collect and analyse data, develop capacity in mainstreaming biodiversity and improve the sharing and uptake of knowledge and good practices.

11. Awareness of the importance of biodiversity and ecosystem services for resource-use efficiency has been raised, and Members have been helped to develop relevant policies and mechanisms. For instance, assessments of and support for compliance with wildlife-related national legislation and international conventions were delivered in six countries (Republic of the Congo, Gabon, Madagascar, Mali, Senegal and Zimbabwe).⁵

12. Countries have been assisted with risk assessment of emerging infectious diseases at the wildlife–livestock–human interface using FAO and Tripartite [(FAO, World Health Organization (WHO) and World Organisation for Animal Health (OIE)] tools. The Joint Risk Assessment Operational Tool was developed by the Tripartite organizations, and technical experts provided guidance on the establishment of joint risk assessment processes at national level.⁶ Countries have

⁴ FAO core functions 3 and 7 have been respectively updated in the Strategic Framework 2022-31 as follows: “Facilitate, promote and support agrifood systems policy dialogue at global, regional and country levels, including explicit recognition and consideration of trade-offs.” and “Advocate and communicate at national, regional and global levels, including to consumers, leveraging the Organization’s knowledge, data, position as UN specialized agency, and trusted role as neutral broker.”

⁵ <https://swm-programme.info/web/guest/legal-hub>

⁶ <https://extranet.who.int/sph/jra>

been helped to strengthen their capacities on mainstreaming biodiversity under the One Health approach.⁷

13. Information has been produced on agricultural practices that conserve and sustainably use biodiversity and favour ecosystem services. For example, the Toolbox for Sustainable Use of Plant Genetic Resources for Food and Agriculture⁸ (PGRFA) under the International Treaty on Plant Genetic Resources for Food and Agriculture (ITPGRFA) has been updated and a practical guide on the operationalization of the Ten Elements of Agroecology is forthcoming.

14. Members have been assisted to improve their capacity to collect, analyse and provide data on the status of biodiversity, including those required under international instruments. For example:

- the International Plant Protection Convention (IPPC) Strategic Framework (2020-2030) has been adopted by the Commission on Phytosanitary Measures (CPM) and includes mechanisms for strengthening pest outbreak alert and response systems;⁹
- a report on global remote-sensing survey of forests has been published;¹⁰
- a monitoring system for the diversity of managed honey bees has been established in the Domestic Animal Diversity Information System (DAD-IS);¹¹
- a tool for monitoring the implementation of sustainable soil management has been developed;¹²
- the Global Information System on PGRFA (GLIS) has been expanded and has reached 1.2 million PGRFA registered;¹³ and
- SoiLEX, a global database that facilitates access to information on legal instruments on soil protection, is now online.¹⁴

15. Countries have been supported in the implementation of global plans of action on animal, plant and forest genetic resources. The Framework for Action on Biodiversity for Food and Agriculture,¹⁵ developed under the auspices of CGRFA in response to the report on *The State of the World's Biodiversity for Food and Agriculture*,¹⁶ was endorsed by the Council in 2021.¹⁷ It contains more than 50 actions grouped into three strategic priority areas: characterization, assessment and monitoring; management (sustainable use and conservation); and institutional frameworks. The Council also adopted the Global Plan of Action for Aquatic Genetic Resources for Food and Agriculture,¹⁸ developed in response to the report on *The State of the World's Aquatic Genetic Resources for Food and Agriculture*.¹⁹

16. The Secretariats of the International Treaty on Plant Genetic Resources for Food and Agriculture (ITPGRFA) and the Global Crop Diversity Trust established the Emergency Reserve for Genebanks, which is designed to provide rapid, short-term and urgent support to PGRFA collections in the Multilateral System, where there is an imminent threat to the collection and no alternative financial support is available.²⁰

²⁰ www.fao.org/3/cb7798en/cb7798en.pdf

17. The volume of biodiversity-related projects at national and regional levels continues to increase. As of April 2022, 706 projects with the biodiversity marker assigned and a total value of USD 2 187 721 604 were operationally active. As of March 2022, the FAO – Global Environment Facility (GEF) portfolio consisted of 291 approved projects, with a total cumulative grant of USD 1 270 565 634. The portfolio covers all five GEF focal areas and is increasingly composed of multifocal areas (MFAs)²¹ and cross-sectoral approaches. The stand-alone Biodiversity Focal Area's share of the portfolio accounts for 15 percent (53 projects, USD 189 million). The biodiversity component accounts for about 30 percent of the MFA projects.

Biodiversity mainstreamed across FAO's policies, programmes and activities (Outcome 2)

18. This outcome comprises activities that facilitate policy dialogue, which includes intergenerational and equitable exchanges, on mainstreaming biodiversity and improving the uptake of knowledge, technologies and good practices by FAO and partners.

19. The FAO Strategic Framework 2022-31,²² Medium Term Plan (MTP) 2022-25 and Programme of Work and Budget (PWB) 2022-23²³ have firmly embedded biodiversity. Biodiversity is explicitly visible in the Programme Priority Areas (PPAs).²⁴ *Better environment* PPA “Biodiversity and ecosystem services for food and agriculture” (BE3) mostly targets the implementation of the Strategy; it aims to ensure that “biodiversity for food and agriculture [is] maintained and sustainable use, conservation and restoration of marine, terrestrial and freshwater ecosystems, and their services are promoted through adoption of targeted policies and practices”²⁵ and contributes mostly to SDGs 2.5, 14.4, 15.1, 15.3, 15.4, 15.6. BE3 ensures the integration of FAO's three cross-cutting themes on gender, youth and inclusion to make sure no one is left behind and all receive equitable benefits.

20. Mainstreaming biodiversity is a regular item on the agenda of relevant FAO Governing and Statutory Bodies, including Regional Bodies. In 2020 and 2021, the Technical Committees received updates on the implementation of the Strategy²⁶ and were actively involved in the preparation of the Action Plan. The 36th Regional Conference for the Near East and North Africa region²⁷ and decided to increase mainstreaming efforts with support from FAO. The 36th FAO Regional Conference for Asia and the Pacific recommended that FAO develop a plan to promote cohesive action on biodiversity mainstreaming in the Pacific region.²⁸ The plan will support the development and meeting of regional and national goals and the meeting of monitoring and reporting obligations under the Post-2020 Global Biodiversity Framework (GBF).²⁹

21. FAO programmes, policies and activities and their implementation continue to be aligned with the SDGs, including those related to biodiversity. The 2022 edition of *The State of World Fisheries and Aquaculture* will discuss the UN Decade on Ecosystem Restoration and biodiversity mainstreaming actions that support SDG 14.

22. To increase the uptake of knowledge, a cross-divisional initiative on the agricultural drivers of deforestation, land degradation, wetland loss and associated loss of biodiversity has been developed and a work plan for 2022 to 2024 prepared by the Collaborative Partnership on Forests.³⁰

³⁰ www.fao.org/3/cb5687en/cb5687en.pdf

Role of biodiversity and its ecosystem services for food security and nutrition globally recognized (Outcome 3)

23. This outcome aims to improve access to data and information on the role of biodiversity, facilitate, promote and support biodiversity-related policy dialogue, demonstrate the links between biodiversity and food security, facilitate partnerships that support biodiversity mainstreaming and raise awareness on the role of biodiversity and ecosystem services for food security and nutrition in relevant fora, ensuring actions are gender- and age-responsive, and take into account the needs of specific groups including the poor and extreme poor and Indigenous Peoples.

24. The Tool for Agroecology Performance Evaluation (TAPE) has been tested in all regions and a global database developed covering 33 countries and more than 5 000 farms to improve evidence on the multidimensional performance of agroecology as an option for achieving sustainable food systems.

25. A Global Dialogue on the Role of Food and Agriculture in the Post-2020 Global Biodiversity Framework (Global Dialogue)³¹ was convened virtually by FAO and the Secretariat of the Convention on Biodiversity (CBD) in July 2021. It concluded with a High-Level Segment on initiatives and approaches to mainstreaming biodiversity in the food and agricultural sectors. The High-Level Segment was attended by ministers and representatives of regional organizations and international development institutions. The conclusions of the Global Dialogue and the outcome of the High-Level Segment were brought to the attention of the third meeting of the Open-Ended Working Group on the GBF.³²

26. The UN Decade on Ecosystem Restoration 2021-2030 is facilitating partnerships that support biodiversity mainstreaming, and FAO and the UN Environment Programme are leading its implementation. FAO is helping to frame a vision for the implementation of the Decade that reflects its mandate to make agrifood systems MORE efficient, inclusive, resilient and sustainable while managing and protecting the environment and the natural resource-base upon which these systems depend. From 2022 onwards, flagship initiatives accompanying the UN Decade will promote practical experiences related to restoration efforts.

Coordination and delivery of FAO's work on biodiversity strengthened (Outcome 4)

27. This outcome aims to enhance FAO's capacity in biodiversity-related matters, support the uptake of biodiversity-related knowledge in FAO policies and procedures, and collaboration with relevant organizations.

28. The coordination and delivery of FAO's biodiversity-relevant work has been strengthened, including by enhancing the technical capacity of FAO units and improving coordination between them. FAO has established an Interdepartmental Working Group on Biodiversity that includes members from offices, centres and divisions across the Organization.³³ An FAO-wide internal technical network for knowledge exchange on biodiversity is active and has over 170 members from over 50 offices, divisions, units, and regional, subregional and country offices.

29. The FAO Framework for Environmental and Social Management, which replaces the respective 2015 guidelines, and a biannual business plan for its implementation have been prepared and were approved by the Core Leadership of the Organization in March 2022. The framework aims to ensure that all people and the environment are protected from potential adverse impacts of FAO programmes and projects. It includes new and updated requirements on the conservation and restoration of renewable natural resources and biodiversity.

³¹ www.fao.org/3/cb7030en/cb7030en.pdf

³² www.cbd.int/doc/c/0723/09c0/0bc015189d2e877acfcc1595/global-dialogue-cochair-report-en.pdf

³³ Including Animal Production and Health, Plant Production and Protection, Fisheries and Aquaculture, Forestry, Land and Water, Food and Nutrition, Agrifood Economics and Statistics divisions, the Indigenous Peoples Unit, the secretariats of Globally Important Agricultural Heritage Systems, CGRFA, ITPGRFA and IPPC, the Joint FAO/WHO Centre (CODEX Food Standards and Zoonotic Diseases) and all five regional offices.

30. The FAO Country Annual Report tool collects information from country offices on their performance, needs and requirements. Extensive information was sought on the support provided in 2021 by country offices to their host countries on biodiversity-related matters. Data analysis to identify opportunities to strengthen FAO's work on biodiversity at national level and improve coordination in this regard is ongoing.

III. Draft 2024-2027 Action Plan for the implementation of the FAO Strategy on Mainstreaming Biodiversity across agricultural sectors

31. The 15th Conference of the Parties to the CBD (COP 15) is expected to adopt the GBF, which will set the direction for global action on biodiversity for the next decade and beyond. Discussions on the GBF initiated in 2018 at COP 14 in Egypt, and COP 15 was initially planned to take place in Kunming, China, in October 2020. However, the GBF process was severely disrupted by the COVID-19 crisis. COP 15 is now foreseen to be held in the third quarter of 2022 in Kunming, China. A draft for consideration by COP15 is being finalized through an intensive negotiation process that has included several meetings of the Open-ended Working Group on the GBF.

32. FAO participates in the GBF process as an observer to the CBD. As requested by the 166th Session of the Council,³⁴ the Strategy and the Action Plan were submitted to the Parties to the CBD for their consideration.³⁵ The meeting report and the joint report of the Co-Chairs of the Global Dialogue were also brought to the attention of the Parties to the CBD,³⁶ as was Council Resolution 1/168 and the Framework for Action on Biodiversity for Food and Agriculture.³⁷ FAO has made several other submissions to the GBF process and its monitoring framework.³⁸ Additionally, through the participation of two FAO instruments in the Biodiversity Liaison Group, FAO has continued to promote biodiversity mainstreaming in the context of the GBF.³⁹

33. In the spring of 2021, *the Common approach to integrating biodiversity and nature-based solutions for sustainable development into the United Nations policy and programme planning and delivery*⁴⁰ was endorsed by the UN System Chief Executives Board for Coordination. The common approach commits the UN system to mainstreaming biodiversity and catalysing collective action to address the drivers of biodiversity loss and restore ecosystems. FAO is active in the UN Environment Management Group, which in 2021 published a report describing the UN system's commitment to assisting Member States to deliver on the GBF.⁴¹

34. Additional new developments and agreements for potential consideration in the review and update of the Strategy and the Action Plan are described in Section II. An update of the Strategy may be considered, as applicable, once the GBF is adopted.

35. The indicative draft 2024-2027 Action Plan, as given in Annex 2, further develops the operationalization of the Strategy and aligns FAO's biodiversity mainstreaming activities with the Strategic Framework 2022-31, the MTP 2022-25 and the PWB 2022-23. It continues to allocate activities to the FAO core functions, taking into account the changes made to them with the adoption of the Strategic Framework 2022-31.

³⁴ CL 166/9, paragraph 17 h. www.fao.org/3/nf693en/nf693en.pdf

⁴⁰ CEB/2021/1/Add.1.

⁴¹ <https://unemg.org/wp-content/uploads/2021/04/EMG-Biodiversity-WEB.pdf>

36. The proposed four-year duration of the updated Action Plan is intended to be aligned with corporate FAO planning exercises. The updated deliverables and delivery dates will be further developed in consultation with the Interdepartmental Working Group on Biodiversity. As noted in the Action Plan, the 19th Regular Session of the CGRFA in 2023 will be involved in the review and updating process.

37. The draft 2024-27 Action Plan complements and is fully in line with other FAO strategies and policies, including the new FAO Strategy on Climate Change and the Strategy on Science and Innovation, the Strategy and Vision for FAO's Work in Nutrition, the FAO Policy on Indigenous and Tribal Peoples, the FAO Policy on Gender Equality (2022-2030) and the FAO Rural Youth Action Plan (RYAP). It contributes to and supports *four betters* and therefore creates a sustainable basis for the implementation of relevant SDGs and advancement of FAO's work within several PPAs – mainly *better production* PPAs “Innovation for sustainable agriculture production” (BP1) and “One Health” (BP3), and a *better environment* PPAs “Climate Change Mitigating and Adapted Agrifood systems” (BE1) and “Biodiversity and ecosystem services for food and agriculture” (BE3).

Annex 1: Status of implementation as of April 2022 of the 2021-23 Action Plan for the Implementation of the FAO Strategy on Mainstreaming Biodiversity across Agricultural Sectors

Outcome 1: Support provided to Members, at their request, to enhance their capacity to mainstream biodiversity							
Core action areas	FAO core functions #	Key Actions	Deliverables ⁴²	Tentative delivery dates	References to decisions ⁴³	Status	Notes
Support countries in the development and implementation of normative and standard-setting instruments related to biodiversity	1	Support countries in the implementation of the Post 2020 Global Biodiversity Framework	Analysis of Global Biodiversity Framework with a view to identifying actions to be taken by FAO in support of country implementation	2023	C 2021/21 (para 73); COFO/2020/REP (para 10.a, 17.d); ITPGRFA Res.11/2019 (para 3); CGRFA/17/19/Report (para 45)	On track	
		Support Members of the Commission on Genetic Resources for Food and Agriculture (CGRFA) in developing and implementing global plans of action	A policy response to the report on <i>The State of the World's Biodiversity for Food and Agriculture</i> and a Global Plan of Action for Aquatic Genetic Resources for Food and Agriculture adopted, technical support for implementation and monitoring provided	2023	CGRFA/17/19/Report (para 44-47)	On track	www.fao.org/3/nh331en/nh331en.pdf
			Countries supported in the implementation of agreed global plans of action on animal, plant and forest genetic resources	Ongoing	CGRFA/17/19/Report; COFO/2018/REP (para 14.d.ii)	On track	www.fao.org/3/ng598en/ng598en.pdf www.fao.org/3/ng831en/ng831en.pdf www.fao.org/3/ng677en/ng677en.pdf
			Countries supported to enhance awareness of and strengthen legal frameworks that enable and sustain production systems that support and benefit from associated biodiversity	2023	Agreed during Members consultation on the Action Plan and in line with FAO Strategy on Mainstreaming Biodiversity	On track	
		Support countries in the reduction of adverse impacts of misuse of hazardous pesticides on biodiversity	Workshop curriculum of Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade expanded by at least one session on alternatives to hazardous pesticides and one session on impact of pesticides on biodiversity and ecosystem services	2021	Across Agricultural Sectors	Completed	Rotterdam Convention Webinars Library

⁴² Deliverables agreed in project documents are marked with *

⁴³ For some country projects, no Governing or Statutory Body decisions are noted.

			Global Action Plan on eliminating risks of highly hazardous pesticides considered	2021	ICCM4 resolutions	Delayed	ICCM5 postponed (until further notice)
		Facilitate policy dialogue at country or regional levels for the ratification and implementation of FAO biodiversity-related conventions, e.g. the International Treaty on Plant Genetic Resources for Food and Agriculture (ITPGRFA), the International Plant Protection Convention (IPPC)	National/regional consultations to promote ratification and implementation conducted	2023	Instrument's websites	On track	www.ippc.int/en www.fao.org/plant-treaty/en
		Countries engage in the development, adoption and implementation of International Standards for Phytosanitary Measures (ISPMs) and Commission on Phytosanitary Measures (CPM) recommendations.	The IPPC Strategic Framework (2020-2030), adopted by the Commission on Phytosanitary Measures has several development agenda items that will be implemented over the next 10 years including the management of E-commerce (traded IAS), Strengthening Pest Outbreak Alert and Response Systems and Assessment and Management of Climate Change Impacts on Plant Health	Ongoing	International Plant Protection Convention text (1997), Article X; CPM 2018/28	On track	www.ippc.int/en/core-activities/standards-and-implementation/call-for-topics-standards-and-implementation/
			Countries participate in the standard-setting process to ensure adopted standards help protect the biodiversity of plants, improve plant health and enhance food security.	Ongoing		On track	www.ippc.int/en/core-activities/standards-setting/
		Support countries and regional mechanisms in the Biodiversity Beyond National Jurisdiction (BBNJ) Process	Reported to Committee on Fisheries (COFI) 35 main elements of the negotiation that pertain to the fisheries sector	2023	C 2021/23 (para 15.e)	On track	
		Support countries in conducting and updating risk assessments for emerging infectious diseases, including consideration of risk/protective factors or drivers related to biodiversity	Countries supported in risk assessment of emerging infectious diseases at the wildlife-livestock-human interface using FAO and Tripartite tools ⁴⁴ (e.g. Joint Risk Assessment) and the consideration of results in regulatory frameworks	Ongoing	COFO/2020/REP (para 17.c)	On track	extranet.who.int/sph/jra www.fao.org/ethiopia/news/%20detail-events/ru/c/1396120/ www.fao.org/publications/card/en/c/CB8748EN www.fao.org/documents/card/en/c/cb7140en www.fao.org/documents/card/en/c/cb7141en www.fao.org/3/cb8932en/cb8932en.pdf

⁴⁴ The FAO-OIE-WHO Collaboration: a tripartite concept note (2010)

		Support countries to strengthen legal frameworks that enable sustainable wildlife management (SWM) for food security and poverty alleviation, and avoid illegal activities taking into account, as appropriate, the Convention on Biological Diversity (CBD) Decision on sustainable wildlife management (CBD/COP/DEC/14/7)	Assessment of and support to improve national legal framework compliance to wildlife-related to national legal frameworks and international conventions and instruments in SWM Programme pilot countries (minimum 14 countries*)	2023	CBD/COP/DEC/14/7; COFO/2020/REP (para 10b.iii); AFWC/2020/REP	On track	https://swm-programme.info/web/guest/legal-hub
		Support to countries to strengthen legal frameworks that enable sustainable forest management and timber production for poverty alleviation, taking into account, as appropriate, the objectives of the CITES Convention, national commitments to Forest Law Enforcement, Governance and Trade (FLEGT), and international timber trade requirements	Cross-countries analytic report providing recommendations to the CBD on normative frameworks and standards to be developed/strengthened to enable sustainable wildlife management, to be circulated for approval by the Parties	2023	CBD/COP/DEC/14/7	On track	
		Support to countries to strengthen legal frameworks that enable sustainable forest management and timber production for poverty alleviation, taking into account, as appropriate, the objectives of the CITES Convention, national commitments to Forest Law Enforcement, Governance and Trade (FLEGT), and international timber trade requirements	Support provided to strengthen implementation of national legal frameworks and related instruments for timber production in line with national commitments for legal timber production and trade (minimum 15 countries*)	2023	COFO/24/REP (para 22.b)	On track	
Support countries to collect, analyse and use biodiversity-related information in decision-making	2	Collect, analyse and disseminate data and information to monitor status of biodiversity at all levels, including gender-disaggregated data, as appropriate.	FISHSTAT regularly updated	Ongoing	Agreed during membership consultations	Completed	www.fao.org/fishery/en/topic/166235 www.fao.org/fishery/statistics-query/en/home www.fao.org/fishery/static/FishStatJ/FishStatJ_4.01.5-Manual.pdf
			Global remote sensing survey of forests report published	2021	COFO/2016/REP (para 17.a)	On track	www.fao.org/3/cb7449en/cb7449en.pdf
			Data on microbial diversity continuously captured and monitored as disease information via EMPRES-i	Ongoing	Agreed during membership consultations	On track	https://empres-i.apps.fao.org
			Biannual global fisheries and aquaculture status report (SOFIA) developed prior to COFI 35	2022	C 2021/23 (para 9)	On track	
			Mobile tool to support the collection of relevant catch and trade data for fish launched	2023	Agreed during membership consultations	On track	

			Supported and built capacity in collection data, modelling and monitoring rangeland status especially in the arid zone countries	2023	C 2021/21 (para 102); CL 165/Rep (para 19.a)	On track	
			Global abandoned, lost or discarded fishing gear (ALDFG) database to address ALDFG and associated ghost fishing launched and data collection started	2023	C 2021/23 (Para 16.f,g)	On track	
			FAO Technical Guidelines on Methodologies and Indicators for the Estimation of the Magnitude and Impact of Illegal, Unreported and Unregulated (IUU) fishing published	2023	C 2021/23 (para 14.j)	On track	
			UN-REDD Annual Report update on environmental Safeguard's Information Systems (SIS)	2023	COFO/25/REP (para 10. b ii)	On track	
		Support Members with tools and methodologies for generating better evidence of the contribution of forests to the sustainable use and conservation of biodiversity	Tools and methodologies for reporting on primary and native forests and addressing existing data gaps made available	2022	COFO/2020/REP (para 13.d)	On track	
			Data and associated knowledge products of the SWM Programme on wild meat supply chains and consumption	2023	Agreed during membership consultations	On track	
		Assist countries to meet their national reporting obligations specified in the IPPC.	Information published on the IPPC website on national reporting on adherence to the IPPC national obligations, including providing information on plant pests and outbreaks, to facilitate information exchange and early response to emerging phytosanitary issues	Ongoing	International Plant Protection Convention text (1997), article XIII	On track	www.ippc.int/en/core-activities/information-exchange/nro/
		Support countries in capacity development on data collection for Sustainable Development Goals (SDGs) to enable the monitoring of SDG indicators, in particular of biodiversity-related SDG indicators ⁴⁵	Dissemination of FAOSTAT land cover change statistics for all countries	2021	Resolution A/res/71/313	Completed	www.fao.org/3/cb8133en/cb8133en.pdf
			Updated SDG websites	Ongoing	Resolution A/res/71/313	On track	www.fao.org/sustainable-development-goals/en
			Data collection and analysis for SDG 2.4.1, with a report indicating country response rates and detail of response to biodiversity sub-indicator	2023	Resolution A/res/71/313	On track	

⁴⁵ Sustainable Development Goals 2.4.1, 2.5.1, 2.5.2, 12.3.1, 14.4.1, 14.6.1, 14.7.1, 14.b.1, 14.c.1, 15.1.1, 15.2.1, 15.3.1, 15.4.2, 15.6.1

	Development of a monitoring system for the diversity of domesticated honeybees	Monitoring system for the diversity of managed honeybees for food and agriculture established in the Domestic Animal Diversity Information System (DAD-IS)	2021	CGRFA-17/19/Report (para 92)	Completed	www.fao.org/dad-is/bees-data-sheet/en/
	Strengthen national capacities for improved data integration, analysis and visualization related to biodiversity	Biodiversity integrated into geospatial and bio-physical data dimensions and planning documents for the Hand-in-Hand Initiative	2023	CL 166/9 (para 12)	On track	
	Specific data requests related to biodiversity in the data collection related to pesticides carried out under the Rotterdam Convention	All parties carrying out projects on severely hazardous pesticide formulations (SHPF) fill data related to the impact on the environment into the SHPF questionnaire ⁴⁶	2021	Agreed during membership consultations	Completed	Rotterdam Convention Webinars Library
	Support ecosystem accounting on a voluntary basis ⁴⁷	At least two countries* implement projects on the implementation of the System of Environmental-Economic Accounting for Agriculture, Forestry and Fisheries (SEEA AFF) biodiversity-relevant accounts (crop and livestock production; land use and land cover)	2023	E/CN.3/2021/L.3, cl 165; Decision 8	Delayed	
	Provide training and capacity building for countries in collecting, assessing and reporting data on their plant, animal, forest and aquatic genetic resources and in documenting efforts made to conserve and sustainably use and develop these genetic resources, including to enable the monitoring of SDG indicators 2.5 and 15.6 and	Practical Guides to the Genebank Standards for Plant Genetic Resources for Food and Agriculture developed under the CGRFA	2021	CGRFA-17/19/Report (para 65)	Completed	www.fao.org/3/ng975en/ng975en.pdf
Genetic resources databases regularly updated (DAD-IS) and World Information and Early Warning System on Plant Genetic Resources for Food and Agriculture (WIEWS), in coordination with other relevant databases		ongoing	CGRFA-17/19/Report	On track		
Monitoring reports on the status of national implementation of Global Plans of Action for plant and animal genetic resources provided to the 18 th Regular Session of the CGRFA		2021		Completed	www.fao.org/3/ng621en/ng621en.pdf www.fao.org/3/ng681en/ng681en.pdf	

⁴⁶ Severely Hazardous Pesticide Formulations (SHPFs) are chemicals formulated for pesticidal use that are known to produce severe health or environmental effects observable within a short period of time after single or multiple exposure, under conditions of use. Under Article 6 of the Rotterdam Convention, any Party that is a developing country or country with an economy in transition that is experiencing problems caused by an SHPF, either due to human health or environmental problems in its territory may make a proposal to the Secretariat for the inclusion of the formulation in Annex III. In addition to the required information specified in Part 1 of Annex IV of the Convention, additional information such as soil and water contamination, bird and mammal poisoning, pollinator poisoning having a clear adverse impact on biodiversity could be collected and be submitted to the Secretariat by the DNA of that country.

⁴⁷ The United Nations Statistical Commission adopted SEEA Ecosystem Accounting at its 52nd session in March 2021

		including gender-disaggregated data	New global information systems on forest genetic resources developed	2023	CGRFA-17/19/Report (para 79)	On track	
			Countries supported in building capacity and support methods of collection of data and monitoring the associated biodiversity on microbial level including bacteria and fungi	2023	Agreed during membership consultations	On track	
			Monitoring report on the status of national implementation of the Global Plan of Action on forest genetic resources presented to the 19 th Regular Session on the CGRFA	2023	CGRFA-17/19/Report (para 78)	On track	
			Global information system for farmed types of aquatic genetic resources developed and used for country reporting	2023	CGRFA-17/19/Report	On track	
			Global Information System on Plant Genetic Resources for Food and Agriculture (GLIS) under Article 17 of the ITPGRFA updated, in sync with WIEWS and other relevant databases	2023	ITPGRFA Resolution 4/2019 and Resolution 11/2019 (para. 3); CGRFA-17/19/Report (para 66)	On track	
			Legal frameworks on fertilizers included in SoiLEX	2021	FAO Voluntary Guidelines for Sustainable Soil Management	Completed	https://www.fao.org/soils-portal/soilex/en/
Support capacity development in biodiversity mainstreaming	4	Support countries to develop capacities for developing coherent policy and legal frameworks that integrate biodiversity within and across sectors	Practical Guide on Legislating for the Ecosystem Approach to Fisheries published and two regional workshops held in Africa to support implementation of the Practical Guide	2021	Agreed during membership consultations	Completed	www.fao.org/3/cb2945en/cb2945en.pdf www.fao.org/3/cb2945fr/cb2945fr.pdf www.fao.org/3/cb2945pt/cb2945pt.pdf www.fao.org/legal-services/news/news-detail/en/c/1412921/ www.fao.org/3/cb6750en/cb6750en.pdf elearning.fao.org/course/view.php?id=753h www.fao.org/legal-services/news/news-detail/en/c/1412930/h www.fao.org/legal-services/news/news-detail/en/c/1412926/h www.fao.org/3/cb8234en/cb8234en.pdf www.fao.org/legal-services/news/news-detail/en/c/1412924/ www.fao.org/legal-services/news/news-detail/en/c/1419124/ www.fao.org/legal-services/news/news-detail/en/c/1457369/ www.fao.org/3/cb1906en/cb1906en.pdf

		Support Members in the development and implementation of national plans of action to combat IUU fishing	ongoing	C 2021/23 (para 11.j)	On track	
		Assisted countries in building capacity in evaluation of ecosystem services including production systems and associated biodiversity	2023	Agreed during membership consultations	On track	
		Following COFI request, promoted discussion among COFI members on draft voluntary guidelines for the regulation, monitoring and control of transshipment	2023	C 2021/23 (para 14.h)	On track	
		Supported Members, upon request, in adapting their policies to take into account the International Code of Conduct for the Sustainable Use and management of Fertilizers	2023	C 2019/REP (para 49.b)	On track	
	Support countries in developing capacity for adopting strategies and legal frameworks to protect and value local biodiversity	Legal framework to protect and value local biodiversity implemented in at least four countries* (Mozambique, Niger, Peru and Senegal)	2021	Agreed during membership consultations	Completed	www.fao.org/geographical-indications/projects/supporting-gis/en www.anp.ne/article/4-produits-nigeriens-dont-klichi-niger-et-tchoukou-niger-labellises https://profonanpe.org.pe/proyectos/gestion-sostenible-de-la-agrobiodiversidad-y-recuperacion-de-ecosistemas-vulnerables-en-la-region-andina-sipam Activities delayed in Peru due to COVID-19 measures and the reorganization of the project activities
		For SWM Programme pilot countries (minimum 14 countries*): Compilation of relevant legislation and national legal profiles analysing strengths, gaps and weaknesses related to normative frameworks enabling sustainable wildlife management (incl. consumptive and non-consumptive use of wildlife, animal production and health, food safety) available online	2023	AFWC/2020/REP	On track	
		For FLEGT Programme countries (minimum 15*): review legal frameworks related to timber production and trade to identify strengths, gaps and weaknesses related to normative frameworks enabling sustainable forest management	2023	COFO/24/REP (para 22.b)	On track	

		Support Members in developing capacity for mobilizing resources for biodiversity mainstreaming and investments in sustainable agriculture approaches that better contribute to sustainable use and conservation of biodiversity, including efforts to secure funding from the Global Environment Facility (GEF)	Upon country request, include biodiversity mainstreaming in Technical Cooperation Programmes (TCPs), Government Cooperative Programme (GCPs), GEF, Green Climate Fund (GCF) and other bi- and multilateral projects, in line with the FAO and UN country programming frameworks	2023	Agreed during membership consultations	On track	
			At least 2 programmatic areas of work on biodiversity mainstreaming elaborated, drawing upon FAO's comparative advantages and aligning to GEF's biodiversity focal area priorities for countries to choose from and customize	2023		On track	
			Assist Members to develop capacities for integrating a biodiversity perspective, including related gender strategies, Indigenous Peoples and local communities (IPLCs) and Traditional knowledge, in relevant planning instruments, including FAO Country Programming Frameworks and regional initiatives, national plans for agricultural sectors, and national plans for food security and nutrition	2023		On track	
			Countries assisted in the promotion of the cultivation of species collected from the wild and encourage breeding toward domestication of new crops, as appropriate	2023		ITPGRFA Resolution 11/2019 (para 9-15); Resolution 4/2019 (para 6); GPA-PGR;	On track
		Assist Members, at their request, in improving capacity for developing, adapting and implementing access and benefit-sharing (ABS) measures to take into account the importance of genetic resources for food and agriculture, their special role for food security and their distinctive features	Survey of national ABS measures aimed to accommodate the distinctive features of GRFA completed and follow-up recommendations considered by the CGRFA	2023	CGRFA-17/19/Report (para 19.ii)	On track	
			Crop wild relatives considered under the International Treaty	2023	ITPGRFA Resolution 11/2019 (paras. 9-15); Resolution 4/2019 (para. 6); Resolution 2/2019 (para. 5); Resolution 7/2019 (para. 5-6)	On track	
		Support countries in building capacity for monitoring of sustainable biodiversity management including ecosystem approaches	Tool to monitor the implementation of Sustainable Soil Management	2021	GSPPA-VIII/20/Report, 8.2	Completed	www.fao.org/fileadmin/user_upload/GSP/SM/SSM_Protocol_EN_006.pdf
			Tool and User Guide to monitor implementation of the Ecosystem Approach to Fisheries	2022	Agreed during membership consultations	On track	www.fao.org/publications/card/en/c/CB8268EN www.fao.org/3/cb2229es/cb2229es.pdf

		Environmental flows tools and indicators for supporting freshwater biodiversity	2022	Agreed during membership consultations	On track	
		Regional workshops on management of ALDFG and solid pollution especially plastic litter	2022	C 2021/23 (para 16)	On track	
		Provision of capacity development at regional and national levels on the Voluntary Guidelines on the Marking of Fishing Gear	2023	C 2021/23 (para 16 g)	On track	
		Technical reports showcasing examples of the application of the FAO Livestock Environmental Assessment and Performance (LEAP) guidelines on biodiversity assessments; and Technical Report reviewing biodiversity management indicators in Brazil	2021	C 2021/21 (para 13-14)	On track	www.fao.org/partnerships/leap/applications/en
		Execution of the implementation plan of the International Code of Conduct for the Sustainable Use and Management of Fertilizers	2022	C 2019/REP (para 49.b)	On track	
		Database on national laboratories that perform fertilizer quality assessments	2021	Agreed during membership consultations	Completed	www.fao.org/global-soil-partnership/red-internacional-de-analisis-de-fertilizantes-infa/es www.fao.org/global-soil-partnership/infa/second-meeting-of-the-international-network-on-fertilizers-analysis-infa/en
		Guidelines and tools to monitor sustainable hunting management based on field testing in SWM Programme pilot countries	2023		On track	
	Support countries in the operationalization of the 10 Elements of Agroecology framework and other sustainable innovative approaches to facilitate the mainstreaming of biodiversity across agricultural sectors	Practical Guide on the operationalization of the 10 Elements of Agroecology published and two regional workshops held in Africa to support implementation of the Practical Guide	2022	CL 163/REP (para 10.h, 15.c); C 2019/21 Rev.1 (para 13); C 2019/REP (Resolution 7/2019 and para 15)	On track	

		Support countries in building their phytosanitary systems which protect both cultivated and wild flora	Phytosanitary Capacity Evaluations conducted which help identify strengths and challenges in national phytosanitary systems	ongoing	IPPC National Phytosanitary Capacity Development Strategy (2010, revised 2012)	On track	www.ippc.int/en/core-activities/capacity-development/phytosanitary-capacity-evaluation
			National Phytosanitary Capacity Development Strategies developed which will help protect the biodiversity of plants, improve plant health and enhance food security	ongoing		On track	www.ippc.int/en/core-activities/capacity-development/ippc-capacity-building-strategy
			Training materials are produced that support the implementation of the IPPC, ISPMs and CPM recommendations which help build more robust national phytosanitary systems and training is delivered via annual regional workshops, e-learning and through the use of other training materials such as infographics, videos and e-learning.	ongoing		On track	www.ippc.int/en/core-activities/capacity-development/guides-and-training-materials
Improve the sharing and uptake of knowledge, technologies and good practices by countries to mainstream biodiversity	5	Support countries in building capacity for good practices with regard to invasive species monitoring, prevention, management and eradication	Regional workshop on development of contingency plans for forest invasive species outbreaks in forests in Europe and Central Asia	2021	EFC/2019/14 Rev.1 (para 4-5)	Completed	www.reufis.org/download/webinar-contingency-plans-and-early-warning-systems-how-can-they-help-protect-forests
			Regional assessment on impact of climate change on forest Invasive species for Asia Pacific region through the regional Forest Invasive species Network	2021	APFC/2019/REP (para 20)	Completed	https://unfao.sharepoint.com/:b:/s/NFO/ETANN3wwpJBhwEDyjf9VoBgLyktF_A-onJ6vrfdpjS7Q?e=jtXOX www.apfism.net
			Regional study on the Early Warning Early Action (EWEA) systems for the forest invasive (insect pests, invasive plants, pathogens) species outbreak prevention and mitigation in the region elaborated and disseminated	2021	NEFRC/2017/REP	Completed	https://www.fao.org/forestry/51295/en/ https://unfao.sharepoint.com/:w:/s/NFO/EbS3RWkoCxdKodtMq26MswMBV1wzoqBOAmGGRaA_HZjftw?e=rfVvyd
			Review of Guide to implementation of phytosanitary standards in forestry	2022	Agreed during membership consultations	On track	
			Work with CITES on trade in invasive species	Ongoing	C 2021/23 (para 11.a,1, 15.d,f); FAO-CITES MOU 2006	On track	
			Support countries to implement digital exchange of phytosanitary certificates (the IPPC ePhyto Solution) and container cleaning and contaminating pests recommendations promulgated by the Commission on Phytosanitary Measures	Ongoing	ISPM 12; CPM R-06 (2017)	On track	www.ippc.int/en/ephyto

		Assist countries to have mechanisms in place to control the spread of environmental contaminating pests on non-plant trade pathways	2023	Agreed during membership consultations	On track	
		Countries supported in the reduction of the adverse impacts of hazardous effect of alien invasive species, especially in fragile habitats	2023		On track	
		Countries become aware of how to use the IPPC, ISPMs and CPM Recommendations to engage with their National Plant Protection Organizations (NPPO) to access national phytosanitary systems that can be used to protect their plant life from IAS (e.g. risk analysis, surveillance systems, eradication procedures, border controls etc.).	Ongoing	PPC National Phytosanitary Capacity Development Strategy (2010, revised 2012)	On track	www.ippc.int/en/core-activities/capacity-development/ippc-capacity-building-strategy
		Phytosanitary Capacity Evaluations result in the development of National Phytosanitary Capacity Development Strategies which will include a component on how to address risks related to IAS that are harmful to plants.	Ongoing		On track	www.ippc.int/en/core-activities/capacity-development/ippc-capacity-building-strategy
	Support countries in building capacity on mainstreaming biodiversity under the One Health approach	FAO-Ecosystem Health Alliance study on drivers of zoonotic disease emergence from wildlife	2021	COFO/2020/REP (para 17.c, 22.c)	Delayed	
		Countries supported in implementing the FAO Action Plan on Antimicrobial Resistance (AMR) 2021-2025	Ongoing	C 2021/21 (para 23-27)	On track	
		Countries trained, where relevant, to include wildlife surveillance and other biodiversity aspects into One Health platforms and efforts	2023	COFO/2020/REP (para 17.c); C 2021/21 (para 74)	On track	
		Strengthen the promotion of sustainable management of wildlife, including the One Health approach to better prevent zoonotic disease risk (SWM Programme)	2022	COFO/2020/REP (para 17.c)	Completed	www.fao.org/3/cb1503en/cb1503en.pdf
	Support the sustainable use and management of fertilizers	Report on soil management for sustainable agriculture that promotes nutrition	2023	FAO Voluntary Guidelines for Sustainable Soil Management	On track	

		Support and strengthen the sharing and uptake of knowledge, technologies and good practices on management of pollinators	Support the national and regional implementation of the relevant elements of the International Pollinators Initiative 2.0 and the relevant Program of Work of the Commission on Genetic Resources for Food and Agriculture	2023	CBD/COP/DEC/14/6; CGRFA/17/19/Report (Appendix E)	On track	
		Support the sustainable utilization of fisheries resources, including through an ecosystem approach to fisheries management	Tools and E-learning course to support the implementation of the Ecosystem Approach to Fisheries (EAF) launched	2023	C 2021/23 (Para 9.g)	On track	
			Technical Guidelines to Prevent and Reduce Bycatch of Marine Mammals in Fisheries adopted	2021	C 2021/23 (para 17.g)	Delayed	
			Species guide on mesopelagic fishes of the Atlantic Ocean published	2021	C 2021/23 (Para 9.c)	Completed	www.fao.org/documents/card/en/c/cb0365en www.fao.org/documents/card/en/c/cb8584en
			Best practices in bycatch reduction in tropical shrimp-trawl fisheries adopted	2021	Agreed during membership consultations	Completed	www.fao.org/publications/card/en/c/CB6635EN
			Two fishing gear modifications to reduce ghost fishing adopted by at least two developing countries	2021		Delayed	
			An expert workshop on lessons learned and good practices for EAF compatible fisheries management conducted and report synthesizing the outcomes produced	2022	C 2021/23 (Para 9.g)	Completed	https://doi.org/10.4060/ca9348en
		Build capacity related to Multilateral Environment Agreements in Africa, Caribbean and the Pacific countries	Third Phase of the EU-ACP MEAs Programme implemented in African, Caribbean and Pacific countries: <ul style="list-style-type: none"> • Support provided for integration of measures for the sustainable use and conservation of biodiversity for food and agriculture into national policy frameworks, strategies and action plans • Support provided to the mainstreaming and institutionalization of biodiversity in national agricultural extension programmes • Training programmes to enable agricultural producers to adopt ecosystem-based practices and promote shift towards sustainable production 	2023	Agreed during membership consultations	On track	

			Third Phase of the UN-REDD Programme launched and implemented in African, Asia-Pacific and Latin America regions	2021	COFO/25/REP (para 10.b ii)	Completed	mptf.undp.org/document/download/27077 www.unredd.net/documents/foundation-documents-88/2021-2025-un-redd-foundation-documents/17492-un-redd-draft-2022-2025-plan-and-2022-workplan-and-budget.html
	Continue to demonstrate that solutions that balance conservation and sustainable use of forest biodiversity, such as sustainable forest management, restoration and agroforestry, are possible, through sharing best practices, in line with national capacities, priorities and contexts; and that agriculture and forestry can synergistically support sustainable development		Practical orientations on multiple use forest management planning	2022	COFO/2020/REP (para 10b.iv)	On track	
			Innovations in the management of fast-growing trees: new practices in forest restoration and reforestation for peoples' livelihoods and the environment	2021	COFO/2020/REP (para 10b.iv; 38.e)	Completed	www.ipc2020.it/
			Issue brief on agroforestry as a possible solution for more sustainable food systems	2022	COFO/2020/REP (para 10b.x; 17 e)	On track	
			Compilation of case studies on human-wildlife conflict management	2022	COFO/2020/REP (para 10b.iv); AFWC/2020/REP	On track	www.fao.org/3/cb8759en/cb8759en.pdf www.fao.org/3/cb8760en/cb8760en.pdf www.fao.org/3/cb8761en/cb8761en.pdf
	Support the implementation of sustainable forest management practices and improve the conservation and sustainable use of wildlife		Support the implementation of sustainable forest management practices in at least 30 countries	2023	COFO/2020/REP (para 33.b)	On track	
			Support improved national forest governance mechanisms in line with commitments to legal timber production and trade (min. 15 countries*)	2023	COFO/2020/REP (para 33.b)	On track	
			FAO-Center for International Forestry Research (CIFOR) Review on mainstreaming biodiversity in the forest sector	2022	COFO/2020/REP (para 17.b)	On track	
			Issue paper: what do we mean by community-based sustainable wildlife-management (SWM Programme)	2021	Agreed during membership consultations	Completed	www.fao.org/3/cb6486en/cb6486en.pdf www.fao.org/3/cb6486fr/cb6486fr.pdf
			Best practices for the diagnostic of wildlife management framework	2021	COFO/2020/REP (para 10b.iii); AFWC/2020/REP	Delayed	
			Analysis of the roles of women and men, in wild meat supply chains based, on SWM Programme study cases	2023	COFO/2020/REP (para 10b.v); AFWC/2020/REP	On track	
			Data baseline across eight* SWM countries to feed global, regional and national databases	2021	COFO/2020/REP (para 10b.iii); AFWC/2020/REP	Delayed	

Outcome 2: Biodiversity mainstreamed across FAO's policies, programmes and activities								
Facilitate policy dialogue on biodiversity mainstreaming	3	Facilitate discussions of biodiversity mainstreaming within FAO's Technical Committees, Regional Conferences, as well as in FAO statutory bodies	Meeting reports of Technical Committees, Regional Conferences, as well as in statutory bodies of FAO published	2023	Agreed during membership consultations	On track		
Improve the uptake of knowledge, technologies and good practices by FAO and partners	5	Establish a cross-divisional initiative to address the agricultural drivers of deforestation, land degradation, wetland losses and associated loss of biodiversity, as response to "Turning the tide on deforestation", a UN system-wide effort requested by the Secretary-General and to be led by FAO and the UN Environment Programme (UNEP) in collaboration with the UN Development Programme (UNDP), UN Department of Economic and Social Affairs (DESA) and other relevant entities	An action plan in support of halting deforestation prepared by the Collaborative Partnership on Forests	2021	COFO/2020/REP (para 10 b.ii, 22.j, 23.e)	Completed	www.fao.org/3/cb5687en/cb5687en.pdf	
			A cross-divisional initiative established which promotes actions to transform food systems, as appropriate and dependent on national context, priorities and capacity to concurrently feed the planet and halt the loss of biodiversity and degradation of ecosystems	2022	COFO/2020/REP (para 10 b.x)	On track		
Outcome 3: Role of biodiversity and its ecosystem services for food security and nutrition globally recognized								
Improve access to data and information on the role of biodiversity and its ecosystem services for food security and nutrition	2	Provide updates on the status and trends for the biodiversity-related indicators for which FAO is custodian or partner ⁴⁸	Annual FAO digital SDG Progress Report	2023	Resolution A/res/71/313	On track		
			Prepare FAO reports with sections on links between biodiversity, and food security and nutrition	State of the Forests 2022 launched prior to the Committee on Forestry (COFO)	2022	Agreed during membership consultations	On track	
				State of Fisheries and Aquaculture launched prior to COFI 35	2022	C 2021/23 (Para 9.c)	On track	www.fao.org/publications/sofia/en
				Supported the promotion of information relevant to the nutritional value of wild edible	2023		On track	

⁴⁸ SDG 2.4.1, 2.5.1, 2.5.2, 12.3.1, 14.4.1, 14.6.1, 14.7.1, 14.b.1, 14.c.1, 15.1.1, 15.2.1, 15.3.1, 15.4.2, 15.6.1.

			species to strengthen their contribution to food security		Agreed during membership consultations

			International Year of Artisanal Fisheries and Aquaculture	2022		Completed	
Outcome 4: Coordination and delivery of FAO's work on biodiversity strengthened							
Enhance the capacity of FAO in biodiversity-related matters	4	Develop an FAO-wide internal working group on biodiversity, including, as appropriate, thematic sub-working groups, for knowledge exchange on biodiversity matters	FAO wide working group established	2021	Agreed during membership consultations	Completed	
			Up-to-date roster of FAO Biodiversity Focal Points available on-line	2021		On track	Ongoing activity as updates are conducted regularly.
			Capacity built to coordinate biodiversity within FAO and provide consistent support to common areas of work	ongoing		On track	
			Working Group on Dryland Forests and Agrosilvopastoral Systems	ongoing		On track	COFO/2020/REP (para 39)
Improve the uptake of knowledge, technologies and good practices related to biodiversity by FAO policies and procedures	5	Review the project cycle processes, and environmental and social safeguards to better address the three levels of biodiversity across all agricultural sectors	Revised FAO environmental and social safeguards in force	2021	Agreed during membership consultations	Completed	www.fao.org/environmental-social-standards/en
		Create a biodiversity marker (following the example of the gender marker) for projects	Biodiversity marker implemented in project design and approval	2023		On track	
			Biodiversity marker included in FAO Country annual reports	2021		Completed	
Include biodiversity-related issues in project risk management and FPIC (Free, Prior and Informed Consent)		Biodiversity included in project risk management tools		2021		Completed	https://www.fao.org/fileadmin/user_upload/foaoweb/2021/Indigenous/FINAL_PSUI-FAO_Indigenous_Peoples_Unit_Annual_Report_2021_1_.pdf

		Develop new procurement guidelines that take into consideration biodiversity concerns	Review of the status of biodiversity in FAO procurement	2021		Completed	
Strengthen collaboration with relevant organizations	6	Establish biodiversity as a key area of collaboration with relevant international organizations, civil society and private sector actors and indigenous peoples and local communities	Biodiversity reflected in new and updated cooperation agreements (e.g. Memorandum of Understanding)	2021	Agreed during membership consultations	Completed	

Annex 2: Draft Action Plan 2024-27 for the Implementation of the FAO Strategy on Mainstreaming Biodiversity across Agricultural Sectors

I. Introduction

1. The 2024-27 Action Plan for the Implementation of the FAO Strategy on Mainstreaming Biodiversity across Agricultural Sectors (Action Plan) is aligned with the strategic narrative guiding the FAO Strategic Framework 2022-31 as endorsed by the Conference in June 2021: the transformation to MORE efficient, inclusive, resilient and sustainable agrifood systems for *better production, better nutrition, a better environment, and a better life*, leaving no one behind.⁵⁰ The FAO Medium-Term Plan 2022-25 explicitly refers to biodiversity mainstreaming and the Strategy, and the important role of biodiversity is reflected across all the *four betters*.⁵¹

2. The Action Plan reflects experiences gained with the implementation of the 2021-23 Action Plan, which will expire at the end of 2023.⁵² It takes into *account* the Framework for Action on Biodiversity for Food and Agriculture,⁵³ endorsed by the Commission on Genetic Resources for Food and Agriculture (CGRFA)⁵⁴ and by the Council in 2021.⁵⁵ It will be aligned with the Post-2020 Global Biodiversity Framework, once adopted by the 15th meeting of the Conference of the Parties to the Convention on Biological Diversity (CBD) to be held later in 2022.

II. Strategy outcomes

3. This Action Plan is based on, and aims to *operationalize*, the FAO Strategy on Mainstreaming Biodiversity across Agricultural Sectors (Strategy).⁵⁶ For each of the Strategy's four outcomes, the Action Plan specifies concrete key FAO actions, deliverables and delivery dates. The outcomes of the Strategy are:

- Outcome 1: *Support provided to Members, at their request, to enhance their capacity to mainstream biodiversity.*
- Outcome 2: *Biodiversity mainstreamed across FAO's policies, programmes and activities.*
- Outcome 3: *Role of biodiversity and its ecosystem services for food security and nutrition globally recognized.*
- Outcome 4: *Coordination and delivery of FAO's work on biodiversity strengthened.*

III. FAO core functions and strategy core action areas

4. The key actions contained in the *Action Plan* for each outcome of the Strategy are clustered according to the seven core functions of FAO:⁵⁷

- i. *Assemble, analyse, monitor and improve access to data and information*, in areas related to FAO's mandate, working in concert with countries and other development partners to identify consumer drivers, policy and investment gaps, promote common platforms and use emerging technological tools.
- ii. *Facilitate and support countries and other partners in the development and implementation of normative and standard setting instruments* for more efficient, inclusive, resilient and sustainable agrifood systems, such as international agreements,

⁵⁰ FAO. 2021. Strategic Framework 2022-31. Rome, FAO. (available at www.fao.org/3/cb7099en/cb7099en.pdf)

- codes of conduct, technical standards and related technologies, digital tools, good practices and others.
- iii. *Facilitate, promote and support agrifood systems policy dialogue at global, regional and country levels, including explicit recognition and consideration of trade-offs.*
 - iv. *Support institutions at all levels, including through capacity development, to prepare, implement, monitor and evaluate evidence-based policies and programmes, and leverage investments.*
 - v. *Facilitate partnerships and coalitions for more efficient, inclusive, resilient and sustainable agrifood systems that address inequalities and leave no one behind, including with governments, development partners, civil society organizations and the private sector.*
 - vi. *Advise and support activities that assemble, disseminate and improve the uptake of knowledge, technologies and good practices in the areas of FAO's mandate.*
 - vii. *Advocate and communicate at national, regional and global levels, including to consumers, leveraging the Organization's knowledge, data, position as UN specialized agency, and trusted role as neutral broker.*

5. The Action Plan translates the FAO core *functions* into core action areas as given in Table 1.

Table 1: FAO core functions and strategy core action areas

FAO core functions	Strategy core action areas
Outcome 1	Support provided to Members, at their request, to enhance their capacity to mainstream biodiversity
1	Support countries in the collection, analysis and use biodiversity-related information in decision-making
2	Support countries in the development and implementation of normative and standard-setting instruments related to biodiversity
4	Support capacity development in biodiversity mainstreaming
6	Improve the sharing and uptake by countries of knowledge, technologies and good practices relevant to biodiversity mainstreaming
Outcome 2	Biodiversity mainstreamed across FAO's policies, programmes and activities
3	Facilitate policy dialogue on biodiversity mainstreaming
6	Improve the uptake of knowledge, technologies and good practices by FAO and partners
Outcome 3	Role of biodiversity and its ecosystem services for food security and nutrition globally recognized
1	Improve access to data and information on the role of biodiversity and its ecosystem services for food security and nutrition
3	Facilitate, promote and support biodiversity-related policy dialogue at global, regional and country levels
5	Facilitate partnerships that support biodiversity mainstreaming between governments, development partners, civil society, the private sector and Indigenous Peoples and local communities
6	Assemble, disseminate and improve the uptake of knowledge, technologies and best practices that demonstrate the links between biodiversity and food security
7	Raise awareness on the role of biodiversity and its ecosystem services for food security and nutrition in relevant fora
Outcome 4	Coordination and delivery of FAO's work on biodiversity strengthened
4	Enhance the capacity of FAO in biodiversity-related matters
5	Strengthen collaboration with relevant organizations
6	Improve the uptake of knowledge, technologies and good practices related to biodiversity in FAO policies and procedures

IV. Key actions on biodiversity

6. This Action Plan is intended to strengthen the work of FAO and its partners, in consultation with Members, to mainstream biodiversity across agricultural sectors. It is not and does not constitute a basis for policy convergence processes. The actions and outcomes included in the Action Plan should not be understood as instruments endorsed by Members who do not request their implementation in their national jurisdictions. Each key action in the Action Plan concretizes and/or further specifies one or several activities identified in the Strategy under the different outcomes (Annex 1).

7. Key actions are clustered into core action areas, each aligned with one of the seven FAO core functions. The core action areas include sets of key actions to be taken to implement the activities foreseen in the Strategy taking into *account* ongoing work by FAO and its partners. The key actions listed are not exhaustive of FAO's planned work. For each key action, the Action Plan specifies deliverables and delivery dates.

8. The key actions included in the Action Plan, in particular those related to Outcome 1 (Provision of support to Members, upon request, to enhance their capacity to integrate biodiversity), will be implemented only in countries where this is requested and in accordance with the priorities identified by them. Information on the status of biodiversity within a country's jurisdiction will be obtained primarily from national agencies in the respective country and will be submitted to the country for consideration prior to dissemination so that data can be corrected if necessary.

V. Monitoring

9. The implementation of the Action Plan is monitored through the Sustainable Development Goals (SDGs) indicators, which in *line* with the Organization's updated results framework 2022-25⁵⁸ are used to measure impact under the *four betters* and outcomes under the programme priority areas.

VI. Review and updating

10. The Action Plan is to be implemented *between* 2024 and 2027.

11. In the preparation of the Action Plan, new developments and agreements, including those reached under the CBD, CGRFA and the *International Treaty on Plant Genetic Resources for Food and Agriculture* (ITPGRFA), as well as experiences with the implementation of the Strategy and the Action Plan, will be taken into consideration.

⁵⁸ C 2021/3.

Table 2: Core action areas, FAO core functions, key actions, deliverables and tentative delivery dates of the 2024-27 Action Plan

FAO core function	Core action areas	Key actions	Deliverables 2024-2027	Tentative delivery dates	References to decisions	PPA	SDG
OUTCOME 1: Support provided to Members, at their request, to enhance their capacity to mainstream biodiversity							
1	Support countries in the collection, analysis and use biodiversity-related information in decision-making	Collect, analyse and disseminate data and information to monitor status of biodiversity at all levels, including gender-disaggregated data, as appropriate.	FISHSTAT, FAOSTAT, EMPRES-i and other relevant databases regularly updated	ongoing	Agreed during membership consultations	BE3, BL1	2.5, 14.4, 15.1, 15.3, 15.4, 15.6 2.3, 5.4, 5.a, 5.c
		Support Members with tools and methodologies for generating better evidence of the contribution of forests to the sustainable use and conservation of biodiversity	TBD	TBD		BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Assist countries to meet their national reporting obligations specified in the International Plant Protection Convention (IPPC)	Information published on the IPPC website on national reporting on adherence to the IPPC national obligations, including providing information on plant pests and outbreaks, to facilitate information exchange and early response to emerging phytosanitary issues	ongoing	International Plant Protection Convention text (1997), article XIII	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Support countries in capacity development on data collection for Sustainable Development Goals (SDGs) to enable the monitoring of SDG indicators, in particular of biodiversity-related SDG indicators	Updated SDG websites	ongoing	Resolution A/res/71/313	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Strengthen national capacities for improved data integration, analysis and visualization related to biodiversity	Biodiversity integrated into geospatial and bio-physical data dimensions and planning documents for the Hand-in-Hand Initiative	TBD	CL 166/9 (para 12)	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Support countries in the implementation of the Global Soil Health and Soil Biodiversity Observatory (GLOSOB).	Strengthened countries prioritize the monitoring of soil health and soil biodiversity as a way to tackle food insecurity and soil degradation	ongoing		BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Specific data requests related to biodiversity in the data collection related to pesticides carried out under the Rotterdam Convention (RC)	<ol style="list-style-type: none"> Parties to RC submit at least 25 Final Regulatory Actions to ban or severely restrict pesticides RC Conference of Parties considers five pesticides for listing in Annex III of the Rotterdam Convention RC Secretariat assists five countries in monitoring environmental impact of pesticides of concern 	2025 2025 2027	UNEP/FAO/RC/COP.10/28; Decision RC-10/3: Interim programme of work and budgets of the Rotterdam Convention for 2022	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6

		Support ecosystem accounting on a voluntary basis[6]	At least two countries implement projects on the implementation of SEEA for Agriculture, Forestry and Fisheries	2024-2025	2021-23 Action Plan	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Provide training and capacity building for countries in collecting, assessing and reporting data on their plant, animal, forest and aquatic genetic resources and in documenting efforts made to conserve and sustainably use and develop these genetic resources, including to enable the monitoring of SDG indicators 2.5 and 15.6 and including gender-disaggregated data	Genetic resources databases (DAD-IS), World Information and Early Warning System on Plant Genetic Resources for Food and Agriculture (WIEWS), Aquagris and information system on forest genetic resources regularly updated, in coordination with other relevant databases	ongoing	CGRFA-17/19/Report CGRFA-18/21/Report	BE3, BL1	2.5, 14.4, 15.1, 15.3, 15.4, 15.6 2.3, 5.4, 5.a, 5.c
2	Support countries in the development and implementation of normative and standard-setting instruments related to biodiversity	Support countries in the implementation of the Post 2020 Global Biodiversity Framework	Analysis of Global Biodiversity Framework with a view to identifying actions to be taken by FAO in support of country implementation	ongoing	C 2021/21 (para 73); COFO/2020/REP (para 10.a, 17.d); ITPGRFA Res.11/2019 (para 3); CGRFA/18/21/Report (para 53-54)	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Support Members of the Commission on Genetic Resources for Food and Agriculture (CGRFA) in developing and implementing global plans of action	Countries supported in the implementation of agreed global plans of action on animal, plant, aquatic and forest genetic resources and Framework on Biodiversity for Food and Agriculture	ongoing	CGRFA/17/19/Report; COFO/2018/REP (para 14.d.ii)	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Support countries in reducing risks posed by highly hazardous pesticides (HHPs) on biodiversity	Support pesticide risk reduction, including the progressive phasing out of HHPs	ongoing	ICCM4 resolutions	BE3, BP1	2.5, 14.4, 15.1, 15.3, 15.4, 15.6 2.3, 2.4, 6.4, 15.2
		Facilitate policy dialogue at country or regional levels for the ratification and implementation of FAO biodiversity-related conventions, e.g. the International Treaty on Plant Genetic Resources for Food and Agriculture (ITPGRFA), the International Plant Protection Convention (IPPC)	National/regional consultations to promote ratification and implementation conducted	ongoing	Instrument's websites	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Countries engage in the development, adoption and implementation of International Standards for Phytosanitary Measures (ISPMs) and Commission on Phytosanitary Measures (CPM) recommendations.	Countries participate in the standard-setting process to ensure adopted standards help protect the biodiversity of plants, improve plant health and enhance food security.	ongoing	International Plant Protection Convention text (1997), Article X; CPM 2018/28	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Support countries and regional mechanisms in the Biodiversity Beyond National Jurisdiction (BBNJ) Process	TBD	TBD		BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6

		Support countries in conducting and updating risk assessments for emerging infectious diseases, including consideration of risk/protective factors or drivers related to biodiversity	Countries supported in risk assessment of emerging infectious diseases at the wildlife-livestock-human interface using FAO and Tripartite tools[3] (e.g. Joint Risk Assessment) and the consideration of results in regulative frameworks	ongoing	COFO/2020/R EP (para 17.c)	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Support countries to strengthen legal frameworks that enable sustainable wildlife management for food security and poverty alleviation, and avoid illegal activities taking into account, as appropriate, the Convention on Biological Diversity (CBD) Decision on sustainable wildlife management (CBD/COP/DEC/14/7)	Sector specific legal data base and analysis relevant to sustainable wildlife management are publicly available on-line for five new countries in the Africa region (SWM Programme) Sector specific policy options and draft legal instruments supporting the sustainable management of wildlife exists in at least five countries in the Africa region (SWM Programme)	2027	CBD/COP/DE C/14/7	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Support to countries to strengthen legal frameworks that enable sustainable forest management and timber production for poverty alleviation, taking into account, as appropriate, the objectives of the CITES Convention, national commitments to Forest Law Enforcement, Governance and Trade (FLEGT), and international timber trade requirements	TBD	TBD		BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Support countries in the implementation of the updated Plan of Action of the International Initiative for the Conservation and Sustainable Use of Soil Biodiversity	Identified and strengthened countries that consider biodiversity and soil health as a nature-based solution to face global environmental challenges.	Ongoing		BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
4	Support capacity development in biodiversity mainstreaming	Support countries to develop capacities for developing coherent policy and legal frameworks that integrate biodiversity within and across sectors	Support Members in the development and implementation of national plans of action to combat IUU fishing	ongoing	C 2021/23 (para 11.j)	BE3, BP2	2.5, 14.4, 15.1, 15.3, 15.4, 15.6 2.1, 2.2, 14.2, 14.4, 14.6, 14.7, 14.b, 14.c
		Capacity of countries developed to identify potential other effective area-based conservation measures (OECMs) in agricultural sectors, including fisheries and forestry	TBD	TBD		BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Support countries in developing capacity for adopting strategies and legal frameworks to protect and value local biodiversity	TBD	TBD		BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Support Members in developing capacity for mobilizing resources for biodiversity mainstreaming and investments in sustainable agriculture approaches that better contribute to sustainable use and conservation of biodiversity, including efforts to secure funding from the Global Environment Facility (GEF)	TBD	TBD		BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6

	Assist Members to develop capacities for integrating a biodiversity perspective, including related gender strategies, Indigenous Peoples and local communities (IPLCs) and Traditional knowledge, in relevant planning instruments, including FAO Country Programming Frameworks and regional initiatives, national plans for agricultural sectors, and national plans for food security and nutrition	National authorities supported in the implementation and the realization of Farmers' Rights, as set out in Article 9 of the International Treaty. Continue the efforts engaged by the Global-Hub on Indigenous Peoples' Food Systems to influence policy discussion on biodiversity conservation, through the UN Food Systems Summit Coalition on Indigenous Peoples' Food Systems and the Rome Group of Friends of Indigenous Peoples, and as they are rooted in the principle of Free, Prior and Informed Consent (FPIC)	2027	IT/GB Resolution 6/2019 - Implementation of Article 9, Farmers' Rights; C 2021/21 para 39.	BE3, BL1	2.5, 14.4, 15.1, 15.3, 15.4, 15.6 2.3, 5.4, 5.a, 5.c
	Assist Members, at their request, in improving capacity for developing, adapting and implementing access and benefit-sharing (ABS) measures to take into account the importance of genetic resources for food and agriculture, their special role for food security and their distinctive features	Workshops and capacity development on ABS for GRFA and digital sequence information, and report on the practical application of ABS country measures to the different subsectors of genetic resources for food and agriculture (GRFA) and associated traditional knowledge. National institutions and other users assisted in the use and implementation of the Multilateral System of Access and Benefit-sharing of the International Treaty Fifth Cycle of the Benefit-sharing Fund of the Treaty implemented.	ongoing	CGRFA-18/21/Report, para 38c, 26ff; IT/GB Resolution 2/2019 - Implementation and Operation of the Multilateral System of Access and Benefit-sharing	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
	Support countries in building capacity for monitoring of sustainable biodiversity management including ecosystem approaches	Development and adoption of tools for monitoring of sustainable biodiversity management including ecosystem approaches (e.g. LEAP, International Code of Conduct for the Sustainable Use and Management of Fertilizers, etc.)	ongoing	C 2021/21 (para 13-14), C 2019/REP (para 49.b), etc.	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
	Support countries in the operationalization of the 10 Elements of Agroecology framework and other sustainable innovative approaches to facilitate the mainstreaming of biodiversity across agricultural sectors	Promoting biodiversity sustainability transitions guided by the 10 Elements of Agroecology framework- reducing, and reversing further ecosystem degradation, desertification, and deforestation of land and ecosystems in drylands (at least 10 countries)	ongoing		BE3, BP1	2.5, 14.4, 15.1, 15.3, 15.4, 15.6 2.3, 2.4, 6.4, 15.2
	Support countries in building their phytosanitary systems which protect both cultivated and wild flora	Phytosanitary Capacity Evaluations conducted which help identify strengths and challenges in national phytosanitary systems National Phytosanitary Capacity Development Strategies developed which will help protect the biodiversity of plants, improve plant health and enhance food security Training materials are produced that support the implementation of the IPPC, ISPMs and CPM recommendations which help build more robust national phytosanitary systems and training is delivered via annual regional workshops, e-learning and through the use of other training materials such as infographics, videos and e-learning.	ongoing	IPPC National Phytosanitary Capacity Development Strategy (2010, revised 2012)	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6

6	Improve the sharing and uptake by countries of knowledge, technologies and good practices relevant to biodiversity mainstreaming	Support countries in building capacity for good practices with regard to invasive species monitoring, prevention, management and eradication	Support countries to implement digital exchange of phytosanitary certificates (the IPPC ePhyto Solution) and container cleaning and contaminating pests recommendations promulgated by the Commission on Phytosanitary Measures Countries become aware of how to use the IPPC, ISPMs and CPM Recommendations to engage with their National Plant Protection Organizations (NPPO) to access national phytosanitary systems that can be used to protect their plant life from IAS (e.g. risk analysis, surveillance systems, eradication procedures, border controls etc.). Phytosanitary Capacity Evaluations result in the development of National Phytosanitary Capacity Development Strategies which will include a component on how to address risks related to IAS that are harmful to plants. Through activities in Global programmes such as the Global Action for Fall Armyworm Control, FAO support countries to build capacity in validating and adopting monitoring, prevention and sustainable management practices of invasive species that act as pests or diseases on crops.	ongoing	ISPM 12; CPM R-06 (2017); PPC National Phytosanitary Capacity Development Strategy (2010, revised 2012) The Global Action for Fall Armyworm Control: Action Framework	BE3, BP5	2.5, 14.4, 15.1, 15.3, 15.4, 15.6 1.4, 5.b, 9.c, 17.8
		Support countries in building capacity for good practices with regard to invasive species monitoring, prevention, management and eradication	Work with CITES on trade in invasive species	ongoing	C 2021/23 (para 11.a.1, 15.d.f); FAO-CITES MOU 2006	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Support countries in building capacity on mainstreaming biodiversity under the One Health approach	Countries supported in implementing FAO Action Plan on Antimicrobial Resistance (AMR) 2021-2025	ongoing	C 2021/21 (para 23-27)	BE3, BP3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6 1.5, 3.d, 15.8
		Support the sustainable use and management of fertilizers	Support members in optimizing the use of fertilizers through capacity building in nutrient recycling, soil health management and dissemination of best practices to actors along the fertilizer value chain	ongoing		BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Support and strengthen the sharing and uptake of knowledge, technologies and good practices on management of pollinators	Support the national and regional implementation of the relevant elements of the International Pollinators Initiative 2.0 and the relevant Program of Work of the Commission on Genetic Resources for Food and Agriculture	ongoing	CGRFA-18/21/Report, para 83	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Support the sustainable utilization of fisheries resources, including through an ecosystem approach to fisheries management	TBD	TBD		BE3, BP2	2.5, 14.4, 15.1, 15.3, 15.4, 15.6 2.1, 2.2, 14.2, 14.4, 14.6, 14.7, 14.b, 14.c

		Build capacity related to Multilateral Environment Agreements in Africa, Caribbean and the Pacific countries	EU-funded ACP MEAs 3 Programme: Support African, Caribbean and Pacific countries in: - Strengthening the integration of biodiversity considerations into national policy frameworks, strategies and action plans. - Mainstreaming and institutionalizing biodiversity considerations into national agricultural extension programmes. - Mainstreaming of biodiversity and ecosystem services in FFS trainings to facilitate the adoption of ecosystem-based practices by agricultural producers and accelerate the transformation to sustainable agrifood systems.	2024	Government Cooperative Programme (GCP) Agreements with focus countries	BP1, BE3	2.3, 2.4, 6.4, 15.2, 2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Continue to demonstrate that solutions that balance conservation and sustainable use of forest biodiversity, such as sustainable forest management, restoration and agroforestry, are possible through sharing best practices, in line with national capacities, priorities and contexts; and that agriculture and forestry can synergistically support sustainable development	TBD	TBD		BE3, BP1	2.5, 14.4, 15.1, 15.3, 15.4, 15.6, 2.3, 2.4, 6.4, 15.2
		Support the implementation of sustainable forest management practices and improve the conservation and sustainable use of wildlife	Seven successful models supporting sustainable wildlife management in different contexts and landscapes, including through the production of alternatively sourced proteins, are tested and up scaled (SWM Programme).	2027	CBD/COP/DE C/14/7	BE3, BP1	2.5, 14.4, 15.1, 15.3, 15.4, 15.6, 2.3, 2.4, 6.4, 15.2
OUTCOME 2: Biodiversity mainstreamed across FAO's policies, programmes and activities							
3	Facilitate policy dialogue on biodiversity mainstreaming	Facilitate discussions of biodiversity mainstreaming within FAO's Technical Committees, Regional Conferences, as well as in FAO statutory bodies	Meeting reports of Technical Committees, Regional Conferences, as well as in statutory bodies of FAO published		Agreed during membership consultations	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
6	Improve the uptake of knowledge, technologies and good practices by FAO and partners	Establish a cross-divisional initiative to address the agricultural drivers of deforestation, land degradation, wetland losses and associated loss of biodiversity, as response to "Turning the tide on deforestation", a UN system-wide effort requested by the Secretary-General and to be led by FAO and the UN Environment Programme (UNEP) in collaboration with the UN Development Programme (UNDP), UN Department of Economic and Social Affairs (DESA) and other relevant entities	Implementation of the Workplan 2021-2024 in support of halting deforestation prepared by the Collaborative Partnership on Forests	2024	COFO/2020/REP (para 10 b.ii, 22.j, 23.e)	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
OUTCOME 3: Role of biodiversity and its ecosystem services for food security and nutrition globally recognized							
1	Improve access to data and	Provide updates on the status and trends for the biodiversity-related indicators for which FAO is custodian or partner[7]	Annual FAO digital SDG Progress Report	Q3 (each year)		BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6

	information on the role of biodiversity and its ecosystem services for food security and nutrition	Prepare FAO reports with sections on links between biodiversity, and food security and nutrition	FAO Flagship reports include biodiversity aspects	ongoing		BE3, BN1, BN2	2.5, 14.4, 15.1, 15.3, 15.4, 15.6 1.3, 2.1, 2.2, 3.1, 3.2, 3.4, 12.8, 14.b
3	Facilitate, promote and support biodiversity-related policy dialogue at global, regional and country levels	Convene global expert meetings, side events and high-level events related to biodiversity and its ecosystem services for food security, nutrition and health	Symposiums, multistakeholder meetings, etc., on biodiversity	ongoing		BE3, BN1, BN2	2.5, 14.4, 15.1, 15.3, 15.4, 15.6 1.3, 2.1, 2.2, 3.1, 3.2, 3.4, 12.8, 14.b
		Represent FAO and the agriculture sectors at biodiversity-related events	FAO represented at conferences and events related to biodiversity	ongoing		BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Represent FAO at sessions of relevant biodiversity conventions with a view to positioning FAO as the key forum for biodiversity for food and agriculture and ensuring that the needs of the agriculture sectors are included in other agreements	FAO represented at intergovernmental meetings related to biodiversity (CBD, others)	ongoing		BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
5	Facilitate partnerships that support biodiversity mainstreaming between governments, development partners, civil society, the private sector, as well as Indigenous Peoples and local communities	Expand work of relevant partnerships (e.g. members of the UN Environment Management Group; the Collaborative Partnership on Forests; the Collaborative Partnership on Sustainable Wildlife Management; the Mountain Partnership; the Global Soil Partnership, the Intergovernmental Technical Panel on Soils) to increase the recognition of the role of biodiversity for food security and nutrition	Following COFI request, strengthened support to marine and inland RFMOs and RFABs, and other regional initiatives in mainstreaming biodiversity in the conservation and sustainable use of aquatic resources Contribute to the Biodiversity Liaison Group of the Convention on Biological Diversity (IPPC, ITPGRFA)	ongoing	C 2021/23 (para 17.i)	BE3, BN1, BN2	2.5, 14.4, 15.1, 15.3, 15.4, 15.6 1.3, 2.1, 2.2, 3.1, 3.2, 3.4, 12.8, 14.b
		Contribute to the work of other organizations on phytosanitary measures	Continue to work with the World Customs Organization related to e-commerce, invasive alien species and Authorized Economic Operators, International Maritime Organization related to pests moving on sea containers, Universal Postal Union (UPU) related to e-Commerce -invasive alien species, World Trade Organization (WTO) related to Sanitary and Phytosanitary Agreement	ongoing	CPM 2018/28 IPPC Strategic Framework 2020-2030	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Contribute to the work of the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES)	Contributions to IPBES's programme of work provided and relevant FAO Governing Bodies and statutory bodies regularly informed of developments in the implementation of the programme of work	ongoing	Decision IPBES-2/8: Collaborative partnership arrangement	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Contribute to the One Health Quadripartite (FAO, WHO, OIE and UNEP) and other One Health platforms	TBD	TBD		BE3, BP3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6 1.5, 3.d, 15.8

		Consider synergies between climate initiatives in agriculture and the conservation and sustainable use of biodiversity, taking into account national circumstances	TBD	TBD		BE1, BE3	2.4, 13.1, 13.2, 13.b, 14.3, 2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Strengthen support to sustainable and innovative business practices and support countries in accounting for their ecosystem services	TBD	TBD		BE3, BP1	2.5, 14.4, 15.1, 15.3, 15.4, 15.6, 2.3, 2.4, 6.4, 15.2
		Support countries to avoid the negative impacts of agriculture and food systems on biodiversity by promoting sustainable practices	Countries supported to eliminate practices, and public policies that are harmful to biodiversity with due observance of multilaterally agreed biodiversity targets, in order to minimize or avoid negative impacts and enhance conservation and sustainable use of biodiversity, depending on national context and priorities and in line with WTO rules and other relevant international obligations	ongoing		BE3, BP1	2.5, 14.4, 15.1, 15.3, 15.4, 15.6, 2.3, 2.4, 6.4, 15.2
6	Assemble, disseminate and improve the uptake of knowledge, technologies and best practices that demonstrate the links between biodiversity and food security	Share good practices and develop tools that demonstrate the links between the sustainable use of biodiversity and food security and nutrition and support the transition to achieve biodiversity-friendly agriculture and sustainable agrifood systems, as appropriate	Guidelines, community of practices, etc.	ongoing		BE3, BP1, BN1, BN2	2.5, 14.4, 15.1, 15.3, 15.4, 15.6, 2.3, 2.4, 6.4, 15.2, 1.3, 2.1, 2.2, 3.1, 3.2, 3.4, 12.8, 14.b
		Raise awareness on the drivers of forest biodiversity loss and how to address these	TBD	TBD		BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
7	Raise awareness on the role of biodiversity and its ecosystem services for food security and nutrition in relevant fora	Engage in and co-lead the UN Decades on Nutrition, Ocean Science, Family Farming, Water, and Ecosystem Restoration, support the commemoration of the international year of Camelids, Rangelands and pastoralists, support the commemoration of the international/world days on Pulses, Wetlands, Wildlife, Forests, Water, Bee, Biological Diversity, Environment, Desertification and Drought, Mangrove Ecosystems, Awareness on Food Loss and Waste, Soil, Mountain and Plant Health, and advocate for biodiversity mainstreaming and the role of biodiversity and its ecosystem services for food security and nutrition within these	Annual campaigns and decades relevant to biodiversity held	ongoing		BE3, BN1, BN2, BN4	2.5, 14.4, 15.1, 15.3, 15.4, 15.6, 1.3, 2.1, 2.2, 3.1, 3.2, 3.4, 12.8, 14.b, 2.1, 2.2, 12.3

OUTCOME 4: Coordination and delivery of FAO's work on biodiversity strengthened							
4	Enhance the capacity of FAO in biodiversity-related matters	Develop an FAO-wide internal working group on biodiversity, including, as appropriate, thematic sub-working groups, for knowledge exchange on biodiversity matters	Capacity built to coordinate biodiversity within FAO and provide consistent support to common areas of work Up-to-date roster of FAO Biodiversity Focal Points available on-line	ongoing	Agreed during membership consultations	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
5	Strengthen collaboration with relevant organizations	Establish biodiversity as a key area of collaboration with relevant international organizations, civil society and private sector as well as Indigenous Peoples and local communities	Biodiversity reflected in new and updated cooperation agreements (e.g. Memorandum of Understanding)	ongoing	Agreed during membership consultations	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
6	Improve the uptake of knowledge, technologies and good practices related to biodiversity in FAO policies and procedures	Review the project cycle processes, and environmental and social safeguards to better address the three levels of biodiversity across all agricultural sectors	Revised FAO environmental and social safeguards in force	ongoing	Agreed during membership consultations	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Include biodiversity-related issues in project risk management and FPIC (Free, Prior and Informed Consent)	Biodiversity included in project risk management tools	ongoing	Agreed during membership consultations	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
		Develop new procurement guidelines that take into consideration biodiversity concerns	Status of biodiversity in FAO procurement kept under review	ongoing	Agreed during membership consultations	BE3	2.5, 14.4, 15.1, 15.3, 15.4, 15.6
