

Delivering restoration outcomes for biodiversity and human well-being

© Brooke Pyke, Mangrove Photography Awards, Indonesia

This course is designed to support global efforts in achieving Target 2 of the Kunming-Montreal Global Biodiversity Framework (KM-GBF). As a key element of the 2022 Global Biodiversity Framework, Target 2 focuses on ecosystem restoration to foster a harmonious relationship between people and nature. The course offers essential knowledge and practical guidance to help stakeholders – including Convention on Biological Diversity (CBD) Parties – implement restoration initiatives that maximize biodiversity outcomes while enhancing human well-being.

2 hours and 30 minutes

You will learn about

- The role of Target 2 within the Global Biodiversity Framework and its alignment with other restoration initiatives.
- The key steps to operationalizing restoration efforts across various ecosystems, from initial planning to on-the-ground implementation.
- The Framework for Ecosystem Restoration Monitoring (FERM), as a crucial tool for tracking restoration progress at the national level.

Who is the course for?

This e-learning course is primarily designed for government officers and restoration practitioners who need to master biodiversity principles and their application in ecosystem restoration. It also targets civil society organizations and non-governmental organizations (NGOs) that support ecosystem restoration and wish to deepen their understanding of Target 2 within the KM-GBF, as well as understand how to use FERM to track restoration progress at the national level.

Key partners

This course was designed and developed by the Food and Agriculture Organization of the United Nations (FAO) in collaboration with the United Nations Decade on Ecosystem Restoration 2021-2030, supported by the International Climate Initiative of Germany, AIM4Forests Programme, the United Kingdom of Great Britain and Northern Ireland, and the Korea Forest Service.
