

Course 1: Addressing gender equality in climate change adaptation and mitigation in agriculture

The course aims at facilitating the exchange of promising approaches, tools and good practices that can be used by parliamentarians and policymakers to support the design and implementation of sustainable and gender-transformative climate policies and legislations to advance gender equality and empower women and youth in the agriculture and food security sectors.

40 minutes

Available in English

You will learn about

- The methods of collection and analysis of sex-disaggregated data for supporting the planning and implementation of gender-responsive agricultural policies.
- The different contributions of women and men in planning the response to climate change.
- The steps for the integration of gender issues in climate-related policies and investments.
- The role that governments can play in empowering women and girls.
