

## Assessing impact of development programmes on food security

©FAO/J. M. Micaud

This course has the objective to support countries and regions in assessing the overall impact of their investments in food security on the well being of the targeted populations. The methods and approaches described in the course are equally applicable to smaller projects.

Up to 10 hours of learning, depending on learning needs

Available in English, French and Spanish

### You will learn about

- Programme design implications
- Impact assessment in programme design
- Quantitative methods: household surveys
- Quantitative methods: secondary data
- Qualitative methods
- Selecting methods and approaches
- Analyzing and interpreting impact data
- Documenting and reporting results

## Who is the course for?

The target audience for this course includes both users and generators of information on programme impact: Programme managers and designers, monitoring and evaluation officers, external evaluators, government officials, donors and other decision makers.

## Key partners

This course was developed under the umbrella of the EU-FAO Programme on “Improved Global Governance for Hunger Reduction”, funded by the European Union (EU) and implemented by the Food and Agriculture Organization of the United Nations (FAO).

Contributing organization:

- Wageningen University - Centre for Development Innovation (CDI)
