Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Nine

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Microbiologist, physicians, pathologist and Quality Officers and managers

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Practical Implementation

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The One Health is elementary to success and cannot be achieved without a multi stakeholder approach

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Agreeing on a shared vision is required as the first stept to initiate the other two objectives, however this should not be identical as to agreeing on a vision, diluted to a generic level agreeable to all. What needs to be done, needs to be done, even when difficult to accept by some stakeholders. A differentiation in timelines can be an option to avoid the dilution of the vision

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

See previous comment that a shared vision should not be a diluted version of what is required. Sometimes it is necessary to 'agree to disagree' and take the required actions

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

There should be sufficient representation from private sectors, as these are the most powerfull to achieve the required implementation level, but if not represented sufficiently or not adequately commeitted can present significant hurdles for making the required progress

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

commitment to positively contribute to progress is an absolute necessity for qualification. In principle no party shold be excluded from membership

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

benchmarking is a very effective approach, combined with the ability to 'localize' best practices. This creates and nurtures commitment and using the principle of competition (being among the best in class) is generallly accepted across all businesses

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

The first four clusters are very much entwined and this bears the risk that they overpower the private sector partners, who will feel unheard and will lose commitment

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

remuneration of private sector partners needs to be available to attract qualified participation, otherwise participation can not compete with their primary business objectives

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The challenge remaing will be to move to the required implementation of actions. I doubt whether the plenary session will be the appropriate platform to achieve this. Probably a more specified, segregated platform is better suited to achieve the goals

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

The structure will not be decisive for success. A good structure where there is no positive commitment from the participants will not kead to the desired success. However, a suboptimal structure with committed participants will still deliver acceptable results, at least will be able to make the required progress

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

This represents a long stretched communication line, with the risk that messages get diluted or that some stakeholders still can influence

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I could not agree more, however beig realitic the devil is in the details of implementation

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

The sollutions we provide to our customers can all be considered as supporting animal health, efficiency of performance and sustainability, thereby reducing the need for antibiotics in animals with a One Health and sustainability perspective

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Not sure

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::

private sector partners

Q26

If you have any additional comments or suggestions, provide them in the space below:

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Must be clinical or Biology background and minimum of 10 year experience with good publication in AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Awareness program and stakeholders workshop

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

NGO's

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

NGO's

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Bridge the Clinician, Microbiologist and Pharmacist around the globe. because in India big gap in this

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

nil

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S	**5 - Fully**
Please provide additional comments and/or suggestions in the space below.:	https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6950494/

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,

Please provide additional comments and/or suggestions in the space below.:

I am the National Joint Coordinator of Indian Initiative for Management of Antibiotic Resistance-IIMAR and did the program throughout India during 2017

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::

Private Institutions

Q26

If you have any additional comments or suggestions, provide them in the space below:

I am very happy to involve in all the aspects.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Including private sector to take actions to fight against AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

best practice guidelines; advocacy and information sharing

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The complementarity between the different entities needs to be clearly explained so that everyone understands what every entity is doing and where to go if needed.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes the objectives are relevant but, again, it is crucial to understand how this initiative is complementary to existing approaches (example: JPIAMR). Also we need not to understimate the difficulties of finding a common narrative between the different components of the One Health approach. AMR is a common denominator but animal health, human health and plant-environment have different challenges, gaps and opportunities.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

There is an additional complexity that you do not mention: the broken economic model of AMR (antimicrobial development)

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Geographic balance is crucial but also key opinion leaders from different cultures (not only western KOLs)

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

relevance to AMR. Criteria for eligibility should be clearly described. The membership sould be approved by the Steering Commiittee based on eligibility.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

action to promote the implementation of new reimbursement models and market incentives (and their compliance with appropriate use)

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Make sure the private sector also includes the small and medium biotech enterprises. Small companies carry 80% of the innovation in the AMR space.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Should be open to all involved in combating AMR -- finding remedies, implementing remedies, expanding One Health strategies (e.g. surface cleaners, water treatments, etc. to curb AMR spread from food, water, plumbing, etc.)vironmental

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Improve on existing guidelines -- don't reinvent the wheel. Do training videos that can be translated rapidly to all languages. Use Internet to create library of resources under 1 roof. Avoid duplication!!!!

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

People need to engage and get rewarded for the engagement. There are few incentives to get more than lip service from govs., orgs, academic institutions.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Do all meetings virtually. AMR should not be an excuse for conferences, travel, etc. PLUS, in the event of an outbreak, you will have to do everything virtually, so spend time setting up a great website and online conferencint tool that can allow thousands to participate. Having simultaneous translation would be a plus.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

You need people at the top, but not bureaucrats. You need active strategists making things happen fast.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,
Please provide additional comments and/or suggestions in the space below.:
Too much bureaucracy. Everyone needs to be on the same page immediately if you are truly insterested in controlling a pandemic -- which could erupt at any time.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,
Please provide additional comments and/or suggestions in the space below.:
Things don't have to be totally vetted to be acceptable. The idea that ideas and methods to curb AMR are subject to somebody's bias is unacceptable. You need to create an open forum or this is just one more bureacratic effort. What are the WHO, OIE and FAO waiting for? Assume the war is on and you have to create strategies and operations now!

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,
Please provide additional comments and/or suggestions in the space below.:
Stop limiting numbers. 200 is far too few. Set 1 year targets, not 10 year targets. God help us that we live 10 years to be able to look backward. The emergency situation is already here.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Think out of the box or you will create just another box that does not meet the challenge.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

Aequor addresses AMR bacteria and fungi at all vectors of trasmission -- including the environment (water, food, air, surfaces) which cannot be ignored.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,

Please provide additional comments and/or suggestions in the space below.:

I served 16 years with the U.S. State Department Foreign Service, winning 7 awards for strategic thinking and complex project management. I had the pandemic threat portfolio during hte 00s. I clearly see gaps that need to be addressed fast if the public is going to be protected from insidious AMR pathogens.

Q25

Not sure

Do you identify yourself in one of the clusters? (optional Q)

Q26

If you have any additional comments or suggestions, provide them in the space below:

Please act faster, smarter, better -- together.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Development of communication tools and undertaking collaborative campaigns

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Could we also have an independent youth/student group cluster?

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Tackling AMR requires expertise and experience from a very wide range of stakeholders and so I would encourage membership from all corners.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Explore non traditional approaches to tackle AMR

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

It behoves suppliers of AMs to be committed to reducing AMR

Q13

Yes

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Guidelines for professionals are a must as is education of general public

Q15

Yes

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Ability to actually contribute to the discussion, science focussed

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

evidence building of one health (inter)links and assessment of potential impact of measures.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

United Kingdom

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Organisation active in research, policy setting, surveillance, implementation or similar in AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Guidelines, SOPs and / or guidance on developing relevant SOPs, standard setting documents

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

I'm not sure. On the one hand, I can see the utility of clustering by type of organisation particularly in promoting OH representation. On the other hand, this limits the opportunity for dialogue between different types of actor, which may be equally beneficial. If their role is strictly administrative then clustering by organisation type would be fine. If their role is extended then there may be benefits to mixing organisation type.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

Will there be only 3 action groups? If so, the proposed constitution is fine. If there are more action groups, how will the rest be represented on the committee?

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

It's not clear how the action groups are constituted. Do these come out of the clusters? Are all members part of a cluster? Do you have to be in cluster in order to be in an action group?

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Nothing can be fixed, except awareness and sensitivity with a desire, to correct

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

It will be something happening at multiple levels and simultaneously and continously.We cannot stop the efforts.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Mostly, a run for a few times may pin point where more efforts are needed. It can never be called complete.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

I agree with everything, yet there is a word of caution still, what looks good theoretically , may be different practically and considering it to be an entire world, one must be evolving always rather then be fixed with ideas.Achieving the aim shall help everybody so work towards the final aim.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S	**1 - Not at all**
Please provide additional comments and/or suggestions in the space below.:	We are into a chemical and recycling business so not addressing the issue.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes

Q26

If you have any additional comments or suggestions, provide them in the space below:

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Fine

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Public awareness through media

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Fine

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Playing a role in the fight against AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

Please provide additional comments and/or suggestions in the space below.

Defining target product profile for novel antibiotics

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

It seems that member will work a lot for the platform. Need remuneration

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Virtual is better

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I think this is the only way that LMICs will be able to fight this issue of AMR.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

The member should have a certain level of understanding of AMR and the threats that it may pose at national, regional and global scale.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

There is need for best practice guidelines to professionals that are involved in antimicrobial prescription and administration such as doctors, veterinarians, pharmacists and all other paramedics. Another important aspect is the awareness to people who do not know the impacts of AMR. This can be achieved by telling them the danger that AMR can cause to humans either directly or indirectly.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

For people coming from LMICs, there should be some aspect of renumeration in order to encourage them. This will enhance the quality of data that will be coming from these regions.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S	**3 - Moderately**
Please provide additional comments and/or suggestions in the space below.:	We were addressing AMR in the last two years, but currently having challenges due to bad management structure.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,

Please provide additional comments and/or suggestions in the space below.:

This is because I have experience in the use of antimicrobials especially in poultry production.

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::

The cluster that consists of private organizations.

Q26

If you have any additional comments or suggestions, provide them in the space below:

The tripartite should try and implement the plans that will be put forward.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Broad spectrum inclusivity would be key towards objectivity and progress

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

demonstrated experience and commitment to openly discuss the challenges surrounding AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

It makes sense to start with Good Practice Guidelines and move from there

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

communications across these cluster groups would also be essential

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

How would decisions be put into action?

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S

1 - Not at all

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Not sure

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

It will be important to consider Diagnostics in the fight against AMR

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Giving local support will be key.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Agreed and again Diagnostics are key for the AMS

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Considering also policy makers, HTA institutes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Get members already engaged in AMR, having influence through their position & network.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Help for implementation of NAPs in critical countries. Work with pilots.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Diagnostic companies will be considered.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

The plan should be over 5 years and not 10 years. It is urgent to change the critical situation that we are facing. There is a need of urgency!!

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

For bioMérieux, Diagnostics company, the fight against AMR is the 1st priority. More than 80% of the R&D budget is focused on AMR.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::

Private sector, to represent Diagnostic companies. Already Board and Steering Committee member of AMR Industry Alliance.

Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Either have a major interest in the use of antibiotics in their particular sector and be involved in policy in regulating antibiotic use

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Certainly in the poultry sector efforts made to reduce antibiotic use and alternative strategies could be shared

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Highlight the involvement and commitment of the government institutions of the different countries, in order to facilitate the implementation of the agreements and measures adopted on the platform at the national level.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The platform should act as a single voice, providing a concrete and uniform vision in discussion forums such as G20, G7, United Nations, which are aware of the challenge posed by AMR but lack the knowledge and experience to adopt concrete measures.

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It is important that it be geographically representative, and that it tries to bring together entities from the 5 continents, paying special attention to economically depressed countries, where infectious diseases have a severe impact, at all levels, affected people, the ability to implement the policy of use antimicrobials, ...

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Communication and transparency is essential

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Cross-cutting information channels must be promoted in order to bring the platform's conclusions and agreements to the largest possible number of people, and especially to health personnel and the civilian population, they are two crucial pieces of the project, especially in the regarding the implementation of actions. Without the participation of these groups, it will be difficult to turn projects into tangible realities.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Provide knowledge and experience on the problem (Hospital, academic, business institutions - Have the ability to manage resources and implement actions - Actors involved in daily work (associations of health personnel, drug distributors (pharmacists), farmers, veterinarians,….) - Representatives of civil society - Key institutions in the field of communication and outreach. The education of the personnel in general involved in the use and management of antimicrobials, as well as in their management, including the civilian population, in improvable and necessary to face the fight against infectious diseases, even the most technologically and economically developed

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All of the above, but they should also include the communication and divulgation of the agreements and especially identifying and providing solutions so that the agreed plans and actions end up being executed at the sectoral and local level. The great challenge is to disseminate and popularize knowledge in order to get the involvement of entities and groups capable of carrying out field work, as well as professionals and civil society in general.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It is important that the members of the platform do not limit themselves to contributing ideas, but rather that they get involved so that those ideas become tangible realities

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The plenary session should be managed in an efficient and pragmatic way, to avoid being limited to a bureaucratic and symbolic act

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

As commented throughout the document, the communication strategy is critical, a large part of it will depend on the involvement and commitment of the national official bodies and therefore the implementation of the measures and actions approved by the Platform at local level. In short, the most important objective, to transfer the knowledge and experience of the experts, through the appropriate institutions to the civilian population

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

That the new Platform operates in a transversal, agile, little bureaucratized way, and focused on making the actions happen and the objectives are met

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

Please provide additional comments and/or suggestions in the space below.:	Fully. ABAC Therapeutics is focused on the discovery of new antimicrobials with a new mechanism of action, and therefore active against AMR In addition, ABAC Therapeutic leads and holds the presidency of the Association for the Discovery of New Antibiotics in Spain

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,
Please provide additional comments and/or suggestions in the space below.:
The Association for the discovery of new antibiotics in Spain, brings together synergies between the administration, scientific groups, private companies and society

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
As president of the Association for the Discovery of New Antibiotics in Spain, the thematic group is: Academic and research institutions, including their networks and coalitions

Q26

If you have any additional comments or suggestions, provide them in the space below:

No

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

specific endpoints that need to be achieved by each member

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

agree with above suggested items; practical implementation would be especially helpful

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

relevance to some aspect of the challenge of AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

advocacy and information sharing

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

As long as there is adequate and unbiased representation from all five cluster groups on the steering committee

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

community mobilization, country support, heighten awareness

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
But it is difficult to know where is the cluster group at a glance. Also, it may be good to have the direction of the arrow to know the sense of the transfer of information.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The ENOVAT network has already created a vibrant and enthuisatic network of veterinarians (and other researchers working in animal health) that would be worth involving in this new platform

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Super principles although there may be some conflicting voices rendering it hard to achieve a consensus in some situations (cf the current proposed EU ban on HPCIAs for animal use)

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Membership should be open to all stakeholders with an interest in addressing AMR. The wider the pool of interested parties the better.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Some of these suggestions are already underway and it would be best to try to build on the work already avaialble than to reinvent the wheel. The approach adopted by ENOVAT may represent a viable model to work from?

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

These seem quite vague targets currently. It will be exciting to see how these are fleshed out with meaningful deliverables.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Great initiative - would be very enthusiastic to support it in any way possible

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S	**4 - Actively**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,
Please provide additional comments and/or suggestions in the space below.:
I am involved in guideline generation in the UK (the PROTECT ME guidelines) and in Europe (via ENOVAT) and would be eager to contribute in some way to this initiative.

Q25

Do you identify yourself in one of the clusters? (optional Q)

Not sure,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
I could happily find myself in multiple different clusters :)

Q26

If you have any additional comments or suggestions, provide them in the space below:

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

commitment and challenges, clinical aspects

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

If based on science facts and as tool to exchange information, not as an space here anyone could make non scientific related comments.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

No,

Please provide additional comments and/or suggestions in the space below.:

Yes, for "Taking actions" and "Information-sharing.." items, but not for "Agreeing on a sharing vision" because vision is related with perspective. In other words, the way you see something will depends on where you are. So someone cannot say that their vision is the correct one and the knowledge should be constructed based on de scientific data shared by this tool by each individual/organization/government.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Agreed

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Agreed

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Agreed

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

They must to represent some entity that is directly related with the topic and if from civil society, with a strong technical knowledge about the topics discussed.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Agreed

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Nothing to be added

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

I don't see any harm in grouping 2 and 3 (International financial institutions and civil society)

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Agreed

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

I agreed basically with the whole text, except by the necessity of endorsement of the elected chair by directors-general of the tripartite.I believe that

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Plenary Sessions must to be open for all members, not only some representatives.

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Ireland

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Im[ortant that the private sector is involved - including companies that supply antimicrobials to the global livestock industry

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Mebership should be granted to animal health pharmaceutical company representatives who are important stakeholders, educators and influencers in the field

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Policy receommendations for emerging markets on the regulation and control of antimicrobials

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Must ensure that recommendations and actions are pragmatic and doable for emerging market policy makers, veterinarians and livestock producers. High sounding stantements and intent lead to lack of implementation - to simplicity and do-ability will be key

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

Elanco have an Antibiotic commitment and a startegy to help livestock producers and veterinarians reduce their need for medically important antibiotics

Q24

Yes

Are you interested in becoming a member of the Platform? (optional Q)

Q25

Not sure

Do you identify yourself in one of the clusters? (optional Q)

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The Tripartite Plus should be commended for its continued leadership on AMR and for supporting the establishment of platforms that are inclusive of all sectors. Only through the collective action of all stakeholders will progress against AMR be made. It will be important that the Platform not only supports alignment but also helps to drive practical, tangible actions as well as measures progress of those actions.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

These objectives are important and appropriate given the scope and complexity of AMR. As a component of the “Taking Action” pillar it will be important to establish mechanisms that support public-private partnerships, so that resources and expertise can be pooled to drive collective action. As important will also be establishing metrics to track and report on progress. For example, the recent AMR Preparedness Index issued by the Global Coalition on Aging and Infectious Disease Society of America provides an evidence-based framework to assess progress. Finally, in Taking Action, identification of a concrete short list of practical and prioritized actions will help provide focus for stakeholder implementation.

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Key to supporting the guiding principles will be a governance document that establishes clear guidelines to encourage and support public-private partnerships. Frameworks should be established that support these types of partnerships, while taking into account all potential conflicts of interest and balancing biases. All efforts should be in place to ensure WHO's FENSA mechanism supports instead of hinder this endeavor.

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Accountability can be a tricky word, as the DG's of the Tripartite will not have any authority over many of the parties that are members of platform. However, the DG's could be responsible for tracking and reporting on progress. Would the DG's also have oversite authority to approve all proposed activities?

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

While it is expected that the pharmaceutical sector would be included as "private sector partners representing sectors that affect, or are affected by, AMR" it is not entirely accurate description. "Affect" could be construed with a negative connotation. The sector is focused on actions to mitigate the effects of AMR and find solutions to address the challenges of AMR. Suggest aiming for a more streamlined structure, with few layers of bureaucracy. This will help achieve higher accountability and impact.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Commitment, resources, and a proven track record of taking action to address AMR. However, it is important to also not exclude new parties who may not have a demonstrated track record, but could have a demonstrable significant future impact.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It is important that Action Group not only focus on reporting, but facilitating and driving action. What responsibilities will they have to ensure and encourage action be taken? Not only should they monitor impact, but they should monitor progress based on KPIs.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

One recommendation is that there be an Action Group specifically focused on and supporting new innovative, R&D-based approaches to mitigate AMR.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

These clusters create artificial silos that will not encourage and facilitate cross-sector collaboration. It has been shown in other areas with similar complexity, e.g. climate change, that progress is best made when sectors work together to advance goals. Suggest clusters instead be around topic areas, for example awareness, data generation, stewardship, innovation, etc. A mechanism for regular and effective flow of information between clusters is important to have in place

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

In addition to attending plenary sessions, suggest also allowing them to attend and support working groups and task force meetings as relevant.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Without knowing the specifics of the organizational structure, and based on feedback previously provided that the cluster groupings may not be appropriate as it will restrict cross-sector collaborations. It would be important that the leadership of each cluster group and action group are represented and not a subset. In designating a subset it is semi-arbitrarily prioritizing one area over another.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

No,

Please provide additional comments and/or suggestions in the space below.:

Not clear if the Plenary is best suited for debate, as these discussions should have happened in the different cluster and action groups, as well as in meetings with the Steering Committee. Should be focused more on formalizing decision making and coordination. Assuming critical decisions would be taken in specific clusters , the plenary may also have a "public" segment to account for advocacy of the work and help further awareness among the general community

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

This is quite complex. It is not clear if as designed the cluster groups are needed. Simplicity could drive a structure based on priority action areas that are inclusive of each subsector.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Suggest also having some linkage the Global Leaders Group. It will also be important that mechanisms are established to support ongoing external communications.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Important to early on set targets that define success. For long term targets, which include the development and novel antimicrobials, it will be important to have a mechanism in place to track progress towards innovative solutions.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

In general attitude to antibiotics and understanding of general/basic knowledge related to its usage

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Complex actions could be managed and distributed to groups involved in antibiotics usage, from producers till consumers.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Membership should be total in that it should be encompassing

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Totally support and moreso members should acts and represent their individual countries

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Yes

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Ues

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

yes

Q13

Yes

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

yes

Q15

Yes

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Action group members should have thorough knowledge of practices that entail the use of antibiotics and how the practices would affect the development of AMR. Cluster group members should be represented by practitioners and producers who decide whether antibiotics should be applied during production and how. Hands-on knowledge among Cluster members should be mined to fully understand the extent of necessary application and refine the treatment application process.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Examine and refine guidelines on sourcing and importation of antibiotics. Because online trading has been facilitated for most commodities, there is a need to examine the entry of goods that may bypass regular procedures. Online trading requires a new set of control measures which may have been overlooked by countries.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Members should have practical knowledge to avoid putting forward recommendations which may not be practical or relevant on the ground. There should be more private sector and user-group partners.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
I think the clusters are important groups whose presence should be felt. Representation of the clusters should be strong.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Qualification and proof of activity to reduce AMR; commitment to a certain role and work. Contract can be used for the agreement of the membership.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Agree with the statements above.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S

Please provide additional comments and/or suggestions in the space below.:

5 - Fully

Reduction of AMR is one of the 5 strategic goals in DSM

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes, very interested

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::

Private Sector

Q26

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

No,

Please provide additional comments and/or suggestions in the space below.:

There is always talk of PPP yet the private sector is ALWAYS left out. Either work in the spirit of PPP or stop talking about it.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

No,

Please provide additional comments and/or suggestions in the space below.:

Private sector vision is not taken into account its very much one sided and biased

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

No,

Please provide additional comments and/or suggestions in the space below.:

This is just a caption private sector is always excluded

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

its biased

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

This is just a paper exercise. Private sector are always excluded

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Stop being biased to the private sector and treat them like a partner not someone with a hidden agenda.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

No

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

as of now none

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

No

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

Where is the private sector?

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Action oriented

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Result oriented

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Good cordination

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Good cordination

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Planning &execution

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Should be result orientated.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Provide relevant information of homecountry that will help AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best Management prectices for aquaculture

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

No,

Please provide additional comments and/or suggestions in the space below.:
We encourage the Tripartite to commit to stronger objectives for the Platform including setting targets for improvement, measuring progress and spotlighting obstacles to collective action. Tracking and measuring need to be an integral part of the objectives along with recommending guidelines and trainings for professionals.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

Partially agree. It is preferrable that the platform accountable to an AMR secretariat rather than three different organizations.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Private Sector members ought to have made commitments to positively impacting progress on issues related to AMR. Numerous forums exist where Private Sector members can demonstrate commitment, including the AMR Industry Alliance (https://www.amrindustryalliance.org/wp-content/uploads/2017/12/AMR-Industry-Declaration.pdf) or the CDC AMR Challenge (https://www.cdc.gov/drugresistance/intl-activities/amr-challenge.html). For civil society/medical associations, it could having an AMR related working group/report/study. It is very important for developing countries to make sure they join the conversation as they are the main drivers of policy.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

This is an action-oriented description and we encourage the Objective statement (#2) to follow a similar approach.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Establishing goals where progress can be made and measured. For example: - population with access to clean water; - rate of increase / decrease of resistance in pathogens of risk to humans - incidence of inappropriate antibiotic use (e.g. no access to antibiotics or use of wrong antibiotic) - number of country-level programs implemented to meet AMR Action Group objectives.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We encourage the Steering Committee to have a budget and a dedicated secretariat to help coordinate and organize meetings.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The Platform should keep continuous communication with cluster groups mentioned above.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The short term target is measurable and an example of a good target. The "Build" and "Share" medium term targets are not measurable. We encourage the addition of more specific targets. For example, "Identify specific areas where progress can be made and tracked to demonstrate collective action to control AMR."

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S	**4 - Actively**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
Private Sector

Q26

If you have any additional comments or suggestions, provide them in the space below:

No

Switzerland

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes, but it is unclear how the Platform will interact and coordinate with the GLG and the IPEA. Suggest further detailing the interaction mechanism, and the high-level deliverables of the Platform.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

No,

Please provide additional comments and/or suggestions in the space below.:

The objectives are abstract and may not reflect the current situation – for example, the shared vision has largely been agreed in the recent years through the WHO GAP, the IACG on AMR Recommendations, and through many other multi-stakeholder collaborations. The Partnership Platform would be better served by developing concrete approaches to take forward key actions across recognized priority areas – incentivizing innovation, enabling sustainable access, improving AMR surveillance and appropriate use, and other areas.

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

No,

Please provide additional comments and/or suggestions in the space below.:

A missing guiding principle is action-oriented purpose of the group; the Platform should, through multistakeholder collaboration, develop practical, actionable approaches to take forward priority policy actions, and should avoid being just a discussion platform.

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

More details on the oversight/accountability mechanism would be helpful. The Platform should also report into the GLG.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

Cluster Groups are an understandable approach in ensuring the Platform is manageable, but if these are implemented, they should be designed differently so that they actively promote cross-sector collaboration (see also feedback below). Members should also have the means to provide specific individual intra-sectoral input especially within more diverse constituencies. It is also unclear what the planned membership structure will be – are all the stakeholder groups noted in the first paragraph to be represented in equal numbers? Is there a limit to how many members of the groups noted can be Members? If so, what are the criteria for inclusion and selection? How will decisions on admission be made? Under the description of the private sector, this should recognize that some sectors, including the pharmaceutical industry, are actively contributing to actions to mitigate the effects of AMR and find solutions to address the challenges of AMR.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Prospective Members should at the very least be actively involved in addressing AMR with a track record of engagement, or have a demonstrated commitment to doing so, especially at the global level, or in regions with a high engagement impact potential, or in key underrepresented geographical regions, or regions with the highest burden of AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It would be important to consider how actions coming out of the Platform will be supported and implemented as they are passed forward.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All of the above, especially: • Supporting practical implementation of priority actions, especially at country level, and in connection with that; • Advocacy (especially leveraging constituency links for wide dissemination) and information sharing

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

These clusters create artificial silos that will not encourage and facilitate cross-sector collaboration. It has been shown in other areas with similar complexity, e.g. climate change, that progress is best made when sectors work together to advance common goals. We strongly suggest clusters instead be around topic areas, for example AMR awareness, data generation, stewardship, innovation, etc. A mechanism for regular and effective flow of information between clusters is also important to have in place.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

Taking into account the feedback under Q9 on Cluster Groups and the need to enable cross-sector collaboration, the leadership of each cluster group and action group should be represented to ensure all voices are heard. These Representatives and the Chair could also have a rotating mechanism for representation as needed.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The (at least approximate) frequency of Plenary Sessions should be clarified, and objectives of each item presented in advance. Effort should be made to ensure Plenaries are an efficient mechanism to formalize and drive decisions & work of the action groups et al. instead of discussing from scratch.

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

Assuming all the elements in green are part of the Partnership Platform, the scheme suggests: • Action Groups would report directly into the Plenary and not through the Platform (whereas under Q7 it is said these would report to the Steering Committee) • Unclear coordination between GLG, IPEA, and the Platform • Disconnect of the Platform Steering Committee from the Platform constituents themselves, except through Plenaries

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The Platform and the IPEA should work together on unpacking IPEA conclusions and defining an impactful approach to disseminating key takeaways.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

The medium-term and long-term targets seem unambitious, and it is unclear how progress would be quantified. It is unclear how these targets would be achieved. An example would be the wording on medium-term target no.2 to "generate high-level advocacy to combat AMR" – advocacy is important, but concrete policy changes should be the target. Long-term target on commitments focuses only on one policy area, i.e. stewardship. In 10 years, solutions should already be implemented, and this should further include improved IPC & leveraging of vaccines against AMR, enabling sustainable access to antibiotics, new pull incentives, and other. That action is needed across several policy areas has also been recognized in the WHO GAP, the IACG Report, and in the Global Leaders Group on AMR Action Plan. It is unclear what role the post 10-year roadmap would play. Is this intended as a post-2030 Agenda continuation? It would again be beneficial to clarify the Platform's objectives within the context of those by the GLG, and the IPEA. For example, how will the medium-term target on "sharing and enhancing knowledge, evidence, ..." link to the work of the IPEA?

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

As a general comment, it is important to realize (and continuously communicate) that while overuse and misuse of antibiotics accelerate the development of AMR (as rightly noted for example on the FAO survey website), bacterial resistance is a natural phenomenon that will always be present, and we will always need new antibiotics to address evolving threats, even with perfect stewardship.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S	**5 - Fully**
Please provide additional comments and/or suggestions in the space below.:	IFPMA represents the research-based pharmaceutical companies and associations across the globe. The research-based pharmaceutical industry's 2 million employees discover, develop, and deliver medicines and vaccines that improve the life of patients worldwide. Based in Geneva, IFPMA has official relations with the United Nations and contributes industry expertise to help the global health community find solutions that improve global health. For many years, IFPMA has been committed to making a difference in the fight against AMR. In 2017, IFPMA established the multi-sectoral AMR Industry Alliance to report and drive broader life sciences industry progress in tackling AMR, which it continues to Chair to this day. In 2020, IFPMA envisioned and drove the creation of a groundbreaking $1B USD AMR Action Fund with over 20 member companies investing, together with contributions and funding provided by the European Investment Bank and the Wellcome Trust, as well as technical input from the WHO. The Fund aims to bridge the antimicrobial R&D clinical funding gap, giving the world more time to implement practical and sustainable solutions to address antimicrobial market challenges.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The One-Health approached presented by the Platform is relevant as it supports joint working between the animal, human, environmental and food sectors Stakeholder engagement is critical to ensure that this Platform is effective and the representatives from all sectors should be included. Cepheid is a key diagnostics player in the fight against AMR in the human health sector by providing rapid molecular diagnostic solutions that support the adoption of antimicrobial stewardship strategies including reduced reliance on empirical treatment.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Effective global and national responses to the COVID-19 pandemic have made clear the importance of information-sharing and networking. Information sharing is critical to our response to AMR. We must not only engage with all stakeholders to work together to tackle this public health issue, but also make sure we are aligned in terms of priorities and next steps.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Transparency and inclusivity are critical. Communication and regular meetings are also key to ensuring there is transparency and clarity in all of the work planned and to be delivered.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Members selected to participate in Action and Cluster Groups must make a commitment to participate. Ensure the groups have representation from the diagnostics industry.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

To qualify for membership, a stakeholder must currently prioritize fighting AMR in their work and have the ability to take action to combat AMR. Private sector manufacturers should have experience with stringent regulatory review and approval for their products.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We agree with the vision for Action Groups. Specific topics and subtopics should be evidence-based to ensure that the actions they drive will have real and lasting impact.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Action Groups should develop best practice guidelines that will help countries implement their NAPs.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Private sector partners should include representatives from the diagnostics industry.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Is an annual meeting enough? If w want decision making, would recommend two Plenary meetings a year.

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

Since stakeholders are proposed to be a part of Action Groups, this chart doesn't make sense. It currently appears as though stakeholders are only engaged in the Plenary.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

200 members is too large of a membership. In order to be effective, the membership should be divided in working groups tackling different aspects of AMR e.g., AMR prevention and testing for resistance in hospitals, antibiotics in farming and new antibiotics development.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

The Platform will provide the opportunity to bring together all stakeholders to effectively tackle this public health issue. Please ensure that there is adequate representation from the diagnostics industry in this group.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

Cepheid is committed to fighting AMR. Rapid and accurate diagnostic tests can help health care providers improve antibiotic prescribing decisions. We are currently working with a number of stakeholders to help optimize antimicrobial use in patients.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,

Please provide additional comments and/or suggestions in the space below.:

Cepheid is interested in becoming a member of the Platform.

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::

Cepheid is a molecular diagnostics company that would be defined to be a member of the “Private Sector Partner.”

Q26

If you have any additional comments or suggestions, provide them in the space below:

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Any person or institution that has relevance to antimicobial usage and AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All of the above as well as a standardised method of monitoring AMR

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S	**4 - Actively**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Not sure,
Please provide additional comments and/or suggestions in the space below.:
I would be happy to contribute expert advice on antimicrobial usage and AMR avoidance in the aquatic environment

Q25

Do you identify yourself in one of the clusters? (optional Q)

Not sure

Q26

If you have any additional comments or suggestions, provide them in the space below:

Good to see AMR being addressed from the One Health perspective

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes, but it is unclear how the Platform will interact and coordinate with the GLG and the IPEA. Suggest further detailing the interaction mechanism.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

No,

Please provide additional comments and/or suggestions in the space below.:

The objectives may not completely accurately reflect the current situation, i.e., the shared vision was largely agreed in recent years through the WHO GAP, the IACG on AMR Recommendations, and through many other multi-stakeholder collaborations. Building on previous work, the Partnership Platform may seek to develop improved approaches to take forward key actions across recognized priority areas such as innovation, sustainable access, AMR surveillance and appropriate use, and other areas. The platform could also seek to understand knowledge gaps in key areas (e.g.in the environmental aspect) and to identify mechanisms to close such gaps to better inform development of relevant policy proposals to proportionately and most effectively reduce the risk of AMR.

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes, however, the platform should provide an opportunity for all stakeholders to discuss, collaborate and identify their specific role in addressing AMR as part of the GAP and national action plans. It should also be action-oriented, ensuring the development of practical, actionable approaches to taking forward priority policy actions.

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It may be helpful to outline what the oversight mechanism will be and how accountability will be monitored.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

Cluster groups may unnecessarily establish silos. There is a need to ensure action is taken across all stakeholders and that the groups are driven by areas in need of action. Consideration should also be given to how Members can provide specific individual intra-sectoral (or intra-cluster) input especially within more diverse constituencies. Further clarification would be helpful to determine how stakeholders will be represented, including whether all the stakeholder groups will be represented in equal numbers, and whether there will be a limit to how many members of the groups can be Members. It may also be useful to offer opportunities that allow different stakeholders operating in a common geographic area (or country income level) to exchange ideas and practices related to common topics / sub-topics of interest (in addition to between geographies and country income levels). Under the description of the private sector, this should recognize that some sectors, including the pharmaceutical, biotechnology and diagnostics industry, are actively contributing to actions to mitigate the effects of AMR and find solutions to address the challenges of AMR.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Membership requirements may include: • Representing one of the following stakeholder groups: government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations • The stakeholder / prospective member should be actively involved in addressing AMR with a track recorf of engagement or have a demonstrated commitment to doing so especially at the global level, or in regions with a high engagement impact potential, or in key underrepresented geographical regions, or regions with the highest burden of AMR • Prospective member's mission, vision and / or activities should be aligned with at least one of the objectives of the Global Action Plan on AMR • Prospective member should be willing to support multi-stakeholder and multisectoral partnerships to address AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

One consideration is how initiatives undertaken by action groups will be funded.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All of the above, including development of multisectoral and multi-stakeholder partnerships and innovative financing mechanisms to advance activity implementation and close (e.g., by identifying and perhaps funding) key knowledge gaps where necessary to reduce the risk of AMR. Action should span the following areas: appropriate use of antibiotics to reduce the development of AMR with the support of vaccines and diagnostics; (ii) access to quality antibiotics and ensuring new ones are available to all, and improve and accelerate access to diagnostics in low- and middle-income countries; (iii) mitigating the environmental impact of manufacturing; and (iv) investing in research and science to meet public health needs with new innovative diagnostics and treatments.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

Due attention should be given to ensuring that meaningful opportunities for information sharing, collaboration and partnership between stakeholder types are provided. At least one representative of each Cluster Group should participate in each Action Group. At least one representative of each Cluster Group could sit on the Steering Committee.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

To maximize impact, it will be important to ensure that members are active in the Platform and its associated activities.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Consideration should be given as to the potential for rotation of Steering Committee representatives. For example, will processes be established to provide opportunity for different members from a given cluster group to put forward a new representative on the Steering Committee (e.g., every year or two years)? Consideration should be given to the possibility of a rotating Chair, e.g., to ensure the same cluster group isn't represented during 2-3 consecutive Chair tenures. The leadership of each cluster group and action group should be represented to ensure all voices are heard.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Clear intended outcomes and participation procedures should be identified and established for the Plenary Sessions.

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes, however the diagram is unclear, including the reporting lines, i.e., it appears that action groups report into the Plenary despite the fact that Q7 indicates that these would report to the Steering Committee. Similarly the Steering Committee currently seems disconnected from the platform constituents in the left box.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

However, We recommend considering a similar mechanism for the GLG, given its central role in raising attention and driving action by stakeholders.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

Question for clarification Upon which targets was 200 members determined? Consideration should be given to representation on the one hand, and potential for collaboration and impact on the other. Targets Medium-term targets should include implementable actions and initiatives with a quantifiable impact and potential to scale. The following target is very important and should represent a medium-term target rather than long-term one, given that there is opportunity to build on pre-existing commitments and actions. “Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy” It will be important to more specifically quantify the long-term targets in a manner that allows to measure progress and impact achieved. For example, what will the mortality rate (or decrease in) due to AMR be projected to be by 2030 (what is the target), similarly what will it be by 2050? A baseline could be established based on 2016 data, with associated % reduction targets to be reached in out years (e.g., 2030, 2050). Actions could then be established accordingly to reach these targets. Additional thoughts Additionally, targets could be further sub-categorized in line with key action areas grounded in the objectives of in the Global action plan on AMR, including the following dimensions: awareness / education / capacity building, policy and regulation, surveillance and research, system strengthening, R&D / innovation, access and appropriate use It would be beneficial to clarify the Platform’s objectives within the context of those by the GLG, and the IPEA. For example, how will the medium-term target on “sharing and enhancing knowledge, evidence, …” link to the work of the IPEA?

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

The AMR Industry Alliance is one of the largest private sector coalitions established to provide sustainable solutions to curb antimicrobial resistance (AMR). The AMR Industry Alliance currently includes over 100 biotech, diagnostics, generics and research-based pharmaceutical companies and associations. Through its members, the AMR Industry Alliance drives the life-sciences industry to curb AMR across four different pillars: (i) appropriate use of antibiotics to reduce the development of AMR with the support of vaccines and diagnostics; (ii) access to quality antibiotics and ensuring new ones are available to all, and improve and accelerate access to diagnostics in low- and middle-income countries; (iii) mitigating the environmental impact of manufacturing; and (iv) investing in research and science to meet public health needs with new innovative diagnostics and treatments. As part of its Strategic Plan 2021-2025, the AMR Industry Alliance is pursuing initiatives across each of these four pillars through relevant internal Working Groups, in partnership with external stakeholders, including public, private, not-for-profit and international organizations.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
Private sector partner

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Know-how, ability to take actions, committment

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Sharing best practices already available in frontrunner countries

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Particular attention should be paid to producers' associations, given their role in representing those who will implement in the filed any actions and the extensive know-how of their sectors

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

Universities, Research institutions and Private Sector should have more chances to provide inputs to action groups to be sure that any outcome will be science base, fitting for pourpose, realistic and implementable

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

Short term goal should only be about how many members will be attracted, but more on the real contribution they can bring on the table

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

1. Past and present actions / success to tackle AMR 2. Future commitments to tackle AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Regular Assesments of implemented activities at country or sectoral level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S

4 - Actively

Please provide additional comments and/or suggestions in the space below.:

Venus Remedies Limited (VRL) is a research-driven Indian Pharmaceutical company with global footprints, VRL is active in research and development of Infectious Diseases domain with a focus on preserving the life of existing antibiotics using Antibiotic Resistance Breakers (ARBs). Venus is also developing a one of a kind platform technology that will allow oral delivery of IV only antibiotics, allowing for reduced hospital stay. In addition to our research endeavours, Venus is committed to tackle AMR by its stewardship initiatives, ensuring a healthier hospital ecology, judicious use of antibiotics, spreading public awareness on AMR and providing an AMR surveillance platform for capturing and sharing local resistance data. We truly believe that tacking antimicrobial resistance will require multistakeholder commitment on a global level and VRL hopes to work closely with various national and international agencies to contribute to the cause.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

We request additional information regarding how the Platform will coordinate with the Global Leaders Group (GLG) on AMR and Independent Panel on Evidence for Action Against AMR (IPEA). Additional clarity is needed on how this group will interact with these established global governance structures to achieve the deliverables of the new Platform.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

No,

Please provide additional comments and/or suggestions in the space below.:

Some objectives duplicate thoughtful work that many other multi-stakeholder global collaborations have conducted in recent years, including the IAGC on AMR Recommendations and the WHO GAP. There is broad agreement on a ‘shared vision’ for a One Health approach, including key elements that are needed on a global level to address the crisis in the antimicrobial ecosystem. We recommend the Platform develop specific objectives in recognized AMR Priority areas, including 1) incentivizing innovation, 2) enabling sustainable access to antimicrobials, and other areas. Objectives of this Partnership Platform also ought to consider and seek to align with the priorities of the GLG on AMR for 2021-2022, outlined in the ‘rolling action plan.’

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

No,

Please provide additional comments and/or suggestions in the space below.:

Yes, however we recommend adding a guiding principle to underscore the importance of near-term action on AMR priority areas, and the Platform's role in driving action. It would be a missed opportunity if the Platform served as exclusively (or primarily) another forum for discussion. The Platform ought to use multistakeholder collaboration to develop and advance actionable approaches to address recognized AMR priority areas, including policy action.

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We recommend that the Platform also be accountable to the GLG. We also request additional details regarding the accountability principle – specifically regarding scope of oversight and how accountability would be operationalized.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

While BIO is generally supportive of the approach to membership and member participation, we request additional details on the planned structure of the groups to outline clear expectations and encourage active cross-sector collaboration. The proposed approach lacks specificity regarding the composition of Action and Cluster Groups – for ex.: - Does the Partnership outline how many representatives from a particular stakeholder category can participate in an Action and/or Cluster Group? Is there a limit to how many members of the same stakeholder category can be Members? - Does the WHO intend to ensure every stakeholder category listed above is represented in each Action Group? If so, are all the stakeholders to be represented in equal numbers/shares? - What are the criteria for inclusion and selection of Members of Action and Cluster Groups? What is the process for doing so?

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

To qualify for membership, stakeholders should be able to demonstrate a public commitment to addressing AMR, and illustrate actions the organization has taken related to addressing the challenge of AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We recommend additional consideration be given to how the actions of the Action Group are implemented and advanced to ensure progress on topics/subtopics is realized.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

BIO supports the actions proposed above. We also recommend additional emphasis on innovation, and actions related to creating a sustainable and viable antimicrobial ecosystem to address AMR.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

To ensure cross-sectoral collaboration, it is imperative that the Platform does not create silos of different categories/types of organizations. Instead, we recommend exploring different approaches for organizing clusters; potentially thematic cluster groups focused around different topic areas with representation from each of the member categories listed above. It will also be critical to establish a mechanism for flow of information across clusters to ensure One Health discussions are taking place within each thematic area. We also recommend that all Cluster Groups are represented in each Action Group.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

We recommend the Platform Steering Committee either include the leads of each of the Cluster and Action Groups to ensure all groups are adequately represented. If this is not possible or reasonable due to the number of groups, we recommend establishing a process to rotate which group leads sit on the Steering Committee. A mechanism to regularly rotate Representatives and the Chair should also be defined and established.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Due to the size and broad participation of the annual Plenary Sessions, we recommend the objectives of each element of the session be provided and presented in advance. We also flag for the Platform's consideration that efficient decision-making with such a wide group of Plenary attendees may present challenges.

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

We believe organizational structure presented is unnecessarily complex, could be inefficient, and may not accurately represent the information previously provided about the Platform. We request refinement of the organizational structure to address the following: - The role of the cluster groups – we do not see these represented. How do cluster groups interact with Action Groups, or other elements of the structure? - It was our understanding that both Action and Cluster Groups report directly to the Steering committee, rather than Plenary. This relationship is not captured in the scheme. - Specific coordination between the GLG, IPEA and the Platform is not represented. - It was our understanding that the green bubble of stakeholders captured on the far left of the scheme comprised membership of the action and cluster groups, and the Platform as a whole. The manner this group is captured, as connected to the Plenary, is confusing.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We suggest the Platform expand this communications strategy to bring conclusions, evidence, and other work of the GLG, Tripartite and other organizations to the attention of priority stakeholders as well, rather than singularly focused on IPEA.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

We recommend additional specificity on medium-term and long-term targets, including how progress would be quantified. At present, it is unclear how these targets would be achieved. Additionally, medium- and long-term targets related to innovation are notably absent, with a singular focus on stewardship. We recommend targets are expanded to mention action that focuses on innovation and creating a sustainable R&D ecosystem to help address AMR. These solutions related to enabling sustainable/improved access to antimicrobials and novel pull incentives have been recognized in the WHO GAP, the IACG Report and in the GLG rolling action plan, and ought to be aligned in this Platform.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

It is essential for the Platform to continually communicate that innovation in antimicrobial R&D is a critical component of policy actions needed to combat the threat of AMR. While inappropriate use accelerates AMR, baterial and fungal resistance is a natural phenomenon that will always be present, and we will always need new products to address evolving threats, even under perfect stewardship conditions.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

The Biotechnology Innovation Organization (BIO) is the world's largest biotechnology trade association, representing more than 1000 biotechnology companies, academic institutions, state biotechnology centers, and related organizations. The biopharmaceutical industry plays a key role in developing and bringing innovative treatments, including antibiotics, antifungals, vaccines, and new technologies such as phages, microbiome therapies, and anti-biofilm agents, to patients suffering from AMR. BIO's members include both established R&D pharmaceutical companies, as well as least 35 biotechnology companies that are the engines of innovation, developing most of the medicines in the pipeline to address AMR. BIO has long been committed to addressing the threat of AMR, and engaging with stakeholders around the world to advance innovative AMR policy solutions.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
Private Sector Partners

Q26

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

We request additional clarification on how the Tripartite Group plans for this Platform to interact with the GLG and IPEA. Will certain subjects and issues go to one group? Will they all assess the same topics? How will coordination on discussions between these mechanisms be carried out?

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

No,

Please provide additional comments and/or suggestions in the space below.:

These read less as objectives, but more as mechanisms to help achieve objectives. We believe the Platform will better position itself for success by developing specific objectives in key AMR priority areas – for example incentivizing innovation, enabling sustainable access, improving AMR surveillance and appropriate use, and other areas. The GLG has taken a similar approach in its rolling action plan, and recommend this group adopt similar, aligned strategic objectives.

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

MSD is supportive of these principles but recommends including a key principle to ensure this platform exists to help drive science-based action on AMR priority areas, similar to our above comments on strategic objective

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We are aligned with this principle. We suggest that the GLG also be included in this accountability principle. We also request clarification on what this accountability would entail – oversight with the goal to ensure progress? Final approval on any activities?

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We recommend considering more clarification on the planned structure of these groups. Are there limits on how many stakeholders from a particular sector will be able to join a cluster and/or action group? Does the Tripartite Group plan for all join a cluster group if possible? Does membership to a cluster group create restrictions on joining Action Groups?

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

We recommend that stakeholders seeking to join the platform should be able to demonstrate that they are actively involved in addressing AMR, or at least have made a public commitment to do so.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We recommend more structure around how Action Groups can ensure action is actually taken, versus reporting on progress. If all members can join these Action Groups, how will this coordinate with the proposal that each Cluster Group being invited to provide members as well?

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

We support the above actions and recommend an Action Group is formed that focuses on innovation and creating a sustainable R&D ecosystem to help address AMR.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

To best align with the One Health Objectives of the Tripartite Group, it is critical that we avoid the creation of a siloed organization that will impede the cross-sectoral collaboration needed to address AMR. We recommend considering alternative approaches to organizing the Cluster Groups, perhaps around particular priority topic areas as compared to the above sector specific approach. We recommend a robust mechanism for cross-cluster collaboration to ensure true One Health focused discussions can take place.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We request clarification on how Cluster and Action Group representation to the Platform Steering Committee will be selected. We also recommend considering a mechanism of regular rotation of Cluster and Action group leads to ensure broad representation from each group is possible

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We recommend additional clarification on how the plenary's role compared to the steering committee. Will final decisions on actions recommend by the steering committee require plenary discussion, alignment, and final approval? The plenary appears to convene a tremendous number of groups and may not lend itself to an effective forum for debate as described above.

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

This is an extremely complex organization structure and it is difficult to understand the true lines of communication and reporting. For example, it is unclear what role Cluster Groups are playing organizationally. Should Cluster Groups and Action Groups have clearer lines of interaction between each other? Should both not directly report to the Steering Committee as described above and not the plenary? How exactly will the GLG and IPEA engage with the platform?

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We recommend considering a similar mechanism for the GLG, given its central role in raising attention and driving action by stakeholders.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

We recommend consider more granular and specific long- and medium-term targets. For example, we note a long-term target that focuses on stewardship. What about others that focus on sustainable innovation, improved access, improved surveillance systems, prevention through leveraging vaccines in humans and animals, etc.? Considering specific, measurable objectives will also best position the platform to achieve success – the platform could consider a short-term objective of concluding a process to help set these specific medium- and long-term objectives. How will these objectives align with those of the GLG and IPEA? How will these groups seek to align objectives?

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S **5 - Fully**

Please provide additional comments and/or suggestions in the space below.:	For over a century, MSD has played a leading role in combating AMR, not only discovering and developing a range of medicines and vaccines that treat and prevent infectious diseases in humans and animals, but also supporting responsible use of these products. Today, MSD is one of the last remaining large pharmaceutical companies that focuses on the research and development (R&D) of new treatments for a broad range of infections. This sustained commitment to preventing and treating infectious diseases is central to fulfilling our mission to save and improve lives. MSD has been working to address AMR for years, but collective action and a shared commitment are vital to make progress against this global health threat. We are committed to a “One Health” approach, working with key stakeholders to ensure antibiotics remain an important tool in improving and maintaining human and animal health. We believe in the responsible use of antibiotics. MSD is proud to be leading industry’s progress on AMR In 2020, MSD and a group of more than 20 leading biopharmaceutical companies launched the AMR Action Fund, a groundbreaking US$1B partnership that aims to bring two to four new antibiotics to patients by the end of the decade. As a lead investor, MSD has committed US$100 million over 10 years into the Fund to help bridge the gap between the innovative early antibiotic pipeline and patients. In 2016, MSD joined over 100 companies, organizations and trade associations to launch a joint declaration that set out bold commitments to address AMR. Additionally, MSD and 12 other leading companies came together to develop a detailed Industry Roadmap for Progress on Combating AMR which explored new opportunities for collaboration between industry and the public sector. In 2017, MSD Animal Health led the global animal health industry effort to develop the HealthforAnimals Antibiotic Commitment, which was signed onto by 200 companies and over 700,000 veterinarians. To drive and measure industry progress on AMR, we co-founded the AMR Industry Alliance, a coalition of large pharmaceutical companies, biotech companies, generic manufacturers and diagnostics developers all working together to curb AMR by committing to address four key areas: research & science, appropriate use, access and manufacturing. See more information: • MSD Delivering on Our Commitments: https://www.msd.com/wp-content/uploads/sites/9/2021/06/MSD_AMR_DOOC_FINAL.pdf • MSD Global AMR Action Plan: https://www.msd.com/wp-content/uploads/sites/9/2021/06/addressing-a-global-threat-AMR.pdf

Q24 Are you interested in becoming a member of the Platform? (optional Q)	**Yes**
Q25 Do you identify yourself in one of the clusters? (optional Q)	**Yes,** If yes, could you please specify?Please provide additional comments and/or suggestions in the space below:: R&D Pharmaceutical and Animal Health

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The One Health approach is key to tackling AMR and this will require stakeholders in a myriad of sectors to work together towards a common set of goals. A platform to help build understanding of the challenges faced by different sectors and the opportunities to drive change could be instrumental to build a supportive consensus to achieving this. The opportunity to share learnings across regional, national and international boundaries will also be highly beneficial. Given the movement of people and goods AMR needs to be seen as a global ecosystem challenge – a problem that arises in in one place or sector can quickly spread. In the food sector many supply-chains are global and there is opportunity to bring actors together to share best practice and see how successful initiatives can be translated into different settings (regions, countries).

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The objectives are appropriate for the proposed platform. It is important that the platform carves out a niche that enables it to bring something new/novel to the global efforts to tackle AMR. There is a risk that unless this is carefully scoped and developed it could duplicate efforts or initiatives underway. 1) A shared vision – a fundamentally important driver of the direction of travel for the work. It is crucial that this is inclusive and recognizes the importance of maintaining AM efficacy for both human and animal health. It is important that all actors have a strong voice and that shaping of the vision is based on a nuanced understanding of both the risks and the potential solutions. 2) Information sharing and networking – this strand is where significant value could come from – perhaps the most important function of the platform in fact. There are many initiatives in both human and animal health to reduce the risk of AMR underway – sharing the learnings from these, building on existing good practice and helping each other to understand how to deploy these in a different geographical or sectorial contexts could be a truly powerful driver for change and improvement. 3) Taking Action – a co-ordination role to improve action already underway or work to identify translational approaches (from one sector to another or one geographical context to another) could have significant value but will need to be carefully managed. The proposed membership of the platform is broad so there will need to be a careful prioritization of work where stakeholders can add value to the global efforts to tackle AMR without duplicating work already underway.

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

AMR is an extremely complex issue so a multidisciplinary and multisectoral approach is entirely appropriate. A whole ecosystem approach is necessary to tackle this as action in a single sector or discipline will not be enough. However with such complexity comes the risk that it may be difficult to prioritise the actions necessary or to deliver tangible outcomes and this will need to be managed carefully. Inclusivity, transparency and open access are also appropriate for such a platform to build trust, both in the stakeholders within the platform and the wider interested community of actors that this issue affects. Inclusivity is particularly important in order to ensure that whilst all voices are heard, the platform represents the consensus rather than single interests; mindful of the differing journeys various sectors are taking – this will influence mindset. Publication of the work of the platform in an open and accessible way will be important for building trust but consideration should be given to how the platform will deal with issues where publication of some information could be difficult e.g. issues of commercial sensitivity for example.

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

This seems appropriate given the auspices under which the Platform is being developed

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Is the intention to open membership to representative bodies from the private sector or can individual private sector organisations be chosen? Representative bodies certainly have a significant role to play but in certain areas individual organisations may make a valuable contribution e.g. a business with global supply-chains who has instituted a major programme of work to improve responsible use of antibiotics in their supply-chain would have very specific knowledge and practical experience to share with others. It would be helpful to understand how such individual companies might contribute to the work of the platform. In terms of balancing the membership and the application process it will be important to ensure that such expertise can be capitalized on. The structure of cluster groups and action groups is probably the most practical way to organize such a diverse set of stakeholders. However there is a risk of groups and opinion becoming entrenched in their own "silos". Given the stated aims of the Platform, finding a way for multi-sectorial stakeholder engagement should perhaps be given more prominence to help build understanding across the sectors. Action groups are there to drive forward particular projects or work programmes and this function of consensus building may be somewhat missed in these forums. It is important that members are objective and positive in their approach to ensure success.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

The requirements to qualify for membership should focus on those who are contributing to tackling AMR. Given the diversity of stakeholders to be included in the platform there will be many different groups that are encompassed within this. It is also important to recognize that in some sectors there will actors who cross sectoral and geographical boundaries and who could bring added value to work of the platform. It is also vital to have a balanced approach, not linked to specific extreme political/societal polarized agendas. There is need to have a stake in the overall objective and be able to exert a level of influence in bringing about the necessary change and a need to have an agreed level of expertise in their areas. A major output from the Platform could be the opportunity to improve knowledge-transfer and disseminate good practice across sectoral, regional , national and international boundaries . The selection of members needs to reflect this aim.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

This is an appropriate vision for the action groups. However it is crucial to ensure that the workplans developed are complementary to existing initiatives rather than duplicative. The Shared Vision for the Platform should be the main dr iver to ensure this is the case.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Information sharing and knowledge transfer is an area where there is significant opportunity for the platform to make a real difference, however. information/guidance needs to be science led and peer reviewed. Members should be asked to provide their shared learnings to support the group and in turn these can be used to shape actions.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

From a structural and organizational perspective these clusters make sense, but there is a danger of creating siloes and this feels like a lost opportunity to get more cross-sectoral dialogue underway to improve each sectors understanding of both the challenges and opportunities in tackling AMR. Provided there is full visibility of members and their remit and a cross fertilization of ideas across the groups which would be best served by having a mixed group, this could work.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Members should be able to contribute to the work of the platform and that necessitates a degree of seniority within organisations with appropriate level of strategic thinking and decision-making brought to the table. The provisions around disclosures are entirely standard and appropriate for such an organization, especially given the principles of openness and transparency that are planned to be embedded. However, given the commitment to include civil society and the aim to be geographically balanced, some consideration should be given to how that participation could be supported.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

If the proposed structure of Cluster and Action Groups is adopted then the role and constitution of the Steering Committee is appropriate.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

A plenary session will be helpful in providing an opportunity to gauge progress on the work of the platform and strengthen the networking elements of it which are crucial to delivering successful outcomes.

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

As discussed above this structure is organizationally sound but there could be an additional group that has cross-sectoral engagement and dialogue as its primary aim.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Given the complex and multisectoral nature of the issue we face it is imperative that outputs from the platform are shared and taken up as widely as possible. A coherent and comprehensive communications strategy will aid that outcome enormously. Effective communication is vital, especially in an organization as large and wide-reaching as this one; consideration should therefore be given to a specific working group to develop and make sure communications are absolutely right and properly thought through.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The medium and long-term aims seem highly appropriate and quite ambitious. The short-term target set for recruitment to the platform could be more nuanced – there are certain sectors that are currently more engaged than others in tackling AMR so it is important to ensure that this recognized in recruitment to the platform. Ensuring a critical mass of stakeholders in each sector is more important that the total number of stakeholders. How would this collaboration fit in with existent collaborations at EU and Global level? Will it run in parallel or supersede so there is a coordinated action How do you ensure targets are set appropriately for those areas which are already on a path with AMR vs those which are only starting their journey?

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

S

4 - Actively

Please provide additional comments and/or suggestions in the space below.:

As an organization which was conceived in order to bring highlight AMR and to be actively pushing in the right direction FIIA should and is 'active'. With major multinational retailers and food businesses as members, we have had a strategy in place to support responsible use of antibiotics with our members and work actively with manufactures, processors and farmers to do this. Following the publication of the O'Neill report we bring together major supermarkets, food service companies, manufacturers, processors and others to identify and implement practical strategies to support responsible use of antibiotics.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes we are. We believe at FIIA that we could make a valuable contribution to this platform. However, without knowing how much time and resource this might take – we would need full visibility before making a final decision.

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::

Yes we would identify as being part of the Private Sector cluster.

Q26

If you have any additional comments or suggestions, provide them in the space below:

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Ability to recognize needs of animal in modern production. Field experience with usage of antibiotics.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All mentioned plus taking interviews with vets about usage of antibiotics.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Access should be allowed for organisations that are in anyway involved in AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

all of the above, plus guidelines for monitoring of AMR

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

For private sector partners it will be more difficult when their time investment is not covered by any financial compensation.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Commitment and ability to take action to combat AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Practical implementation of activities at country or sectoral level;

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

They should have a more active role

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. No,

Please provide additional comments and/or suggestions in the space below.:
I would propose to include stakeholder groups focussing on food and food security as well.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

requirements: work in an AMR-related field, agreement: active participation as a member by providing contacts, knowledge (seminars, education, publications), etc.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

providing a toolbox which enables an easy identification of relevant tools (e.g. assessment tools, guideline tools, surveillance tools) to accomplish a current activity or for the next steps

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

Maybe in the medium-term targets under "Share and enhance", the platform can provide resources to support countries financially in their efforts (e.g. funding grants, etc.).

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**2 - Slightly**
Please provide additional comments and/or suggestions in the space below.:	with regard to the One Health approach only slightly but has started now

Q24	**Yes**
Are you interested in becoming a member of the Platform? (optional Q)	

Q25	**Yes,**
Do you identify yourself in one of the clusters? (optional Q)	If yes, could you please specify?Please provide additional comments and/or suggestions in the space below:: Academia and research institutions

Q26

If you have any additional comments or suggestions, provide them in the space below:

I think it is a great concept, since it not only involves high level experts but provides a good mixture. Would love to see it fly.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

It depends

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

If national and regional differences are considered

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Must be science based

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Unsure at this time

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

The members should have worked on the ground and have a track record of having worked and understood the problem first hand

Q13

Yes

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Practical implementation of activities at regional level

Q15

Yes

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9 Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.	**Yes**
Q10 Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	**Yes,** Please provide additional comments and/or suggestions in the space below.: The Platform should be overall accountable to all the members of the United Nations

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It will be good to encourage member states to set up similar structures at the local level to handle AMR issues there

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

The relevant Ministries at the member state level and the key sectors in those ministries should be targeted

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Hope these action groups should be at the regional and subregional levels

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Monitoring and evaluation of the actions and reporting on progress; sourcing for funding

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Maybe cluster groups should by region and subregion with apex bodies at the continental and global levels

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Representation at the steering committee will depend on the organization of the action and cluster groups

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Membership should be representative, that is membership should be drown from each region of the globe base on relevant qualification, experiences and research work on different areas of AMR

Q13

Yes

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Sensitization on judicious and responsible use of antibiotic by the end user across human , animal and plant

Q15

Yes

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.	

Q10	**Yes**
Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Important to include small AMR groups as well as BIG corporates and organisations

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Important to include small AMR groups as well as BIG corporates and organisations

Q13

Yes

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

social media awareness posts

Q15

Yes

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Q5

Type of organization:

Other (please specify):
Animal industry and veterinary consultant

Q6

Country:

Australia

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

I think anyone who is actively working in AMR related activities should qualify. The more inclusive the better

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All of the above suggestions, plus identification of knowledge or capability gaps.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
I think private sector is too broad - I think this should be further divided into animal production industries, waste management industries, pharmaceutical industry then private sector

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Need a clear though broad terms of reference for membership. Need statements to address any conflicts of interest with membership. Suggest including social science professionals

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Need to ensure LMIC are well represented in these action groups

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

strengthening laboratory and surveillance systems for AMR and AMU

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,
Please provide additional comments and/or suggestions in the space below.:
For some LMIC members of the platform some funding maybe needed to support participation in the action groups

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,
Please provide additional comments and/or suggestions in the space below.:
Should UNEP or other environment organisation

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.	

Q10	**Yes**
Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

NGOs would appear to be omitted

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Organisations with expertise in antimicrobials (antibacterials and antifungals in particular)

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Actions should be concrete, not more statements of intent.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Specific plans to reduce unnecessary usage of antimicrobilas in medicine, food production, plant usage (ie flowers, drinks) and waste effluent

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

This will result in not enough cross talk. Would prefer to see issues addressed in narrow sectors. ie aquaculture, flower and bulb production, intermediate chemistry synthesis snad discard, growth promition in meat production etc.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
May need to have plenary sessions focussed on broad, but not all topics. Ie antifingal fungicides and human antifungal medicines; use of antibiotics in food production, etc. If too big a topic is addressed in one meeting, only platitudes will result.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,
Please provide additional comments and/or suggestions in the space below.:
You are missing a stakeholder group with governments - regulators for agchem and human NCEs.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

90% of plant diseases are fungal, so in this domain the problems of resistance in plant pathogens and human pathogenic fungi need particualr emphasis

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**4 - Actively**
Please provide additional comments and/or suggestions in the space below.:	Accurate diagnosis of human infection is a core goal and this will minimise inapprorpriate use of many antimicrobials.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Not sure,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
NGOs with a high level of technical expertise don't seem to be included.

Q26

If you have any additional comments or suggestions, provide them in the space below:

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9	**Yes**
Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.	

Q10	**Yes**
Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

relevance, commitment and ability

Q13

Yes

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

best practice gudelines and information sharing

Q15

Yes

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Impressive vision!

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9	**Yes**
Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.	

Q10	**Yes**
Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Great to be so inclusive. Figuring out a way to hear all the voices will be a challenge, but simply creating the conversation will be instructive.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

I'd be pretty easy on the rules for participating ... relevance to AMR has many facets.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes, but avoid allowing the Action Groups to be deeply siloed ... it's easy to just talk to your colleagues. The real power here is in cross-fertilization.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Anything in the IACG plan for action

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Great idea ... but do work to include some from each Cluster Group in each Action Group. Cross-fertilization!

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Good to have some rotation. Two years feels a bit short for the Chair; would encourage some sort of overlapping of start/stop dates

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
This diagram is very helpful

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

And this is the big challenge ... how do we talk to each other?

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Perhaps also add a goal of influencing the SDGs

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Great work!

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Leadership status within an area and ability to change/impact on the ground actions

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Of course best practice guidelines, but there needs to be forums for case by case discussions for when situations fall outside of guidelines and have the ability to look at animal welfare, practicality, antibiotic availability, and appropriate antibiotic use. Other topics that will influence guidelines include accountability. Action groups should also put together a list of research topics that would help in the more practical, best welfare, etc development of guidelines.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Are NGO/Charities represented in this list and I am missing them?

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

To be honest, these plenary sessions can be useful or it can just be reinforcement of a small box of ideas. I would recommend a chance for public comment on topics from anyone to feed into a plenary session. I have seen relevant topics dismissed by senior leadership because They were closed to them. There needs to be open discussion of some of the potentially practically problematic nature of some of the guidelines and best practice recommendations this org will make.

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
Lots of big government but it looks like a very small space for people who are working on the ground.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,
Please provide additional comments and/or suggestions in the space below.:
I don't know this

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Different stakeholder voices is critical, is the advocacy going to be based on voluntary adherence to guidelines, because we have seen that that hasn't worked particularly well with covid. I guess you would have to link any implementation on a policy/government level to a designated individual/org/lobby in each country OR in an international donor that will almost demand governmental level compliance for allocation of funds or something.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

This all seems like a good idea

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆ **3 - Moderately**

Q24 **Yes**

Are you interested in becoming a member of the Platform? (optional Q)

Q25 **Not sure**

Do you identify yourself in one of the clusters? (optional Q)

Q26

If you have any additional comments or suggestions, provide them in the space below:

Good luck!

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Agriculture tends to be underrepresented in discussions on AMR

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Involvement in and commitment to tackling AMR although any with a genuine interest should not be excluded eg consumers may not be directly involved in action to reduce the risk of AMR but may be able to make a useful contribution from a different perspective.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Prioritisation will be a challenge - scientific reviews and modelling should be used to identify where action is most likely to yield the greatest reductions in risk

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

As with COVID-19 AMR is a global problem. AMR spreads rapidly around the globe through the movement of people and products, Sharing best practice is important and will help raise global standards but some countries may need more practical help and support to reduce AMR risk. Uncontrolled production and use significantly increases the risk of AMR emergence. Action is also urgently required to contain the spread of AMR post-emergence. The 4 pillars of disease control as outlined by Sibley and Orpin also apply to minimising the threat of AMR - Biosecurity to prevent introduction; Biocontainment to control spread; Surveillance to identify threats; and Increasing resilience - sanitation, hygiene, nutrition, immunisation

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

It is not clear if those directly involved in front line action to reduce the threat of AMR will be adequately represented i.e specialists in infection control in hospitals; vets; those involved in disposal of antimicrobials and control of waste from production sites

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Plenary sessions should be hybrid meetings and openly broadcast online

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**4 - Actively**
Please provide additional comments and/or suggestions in the space below.:	Actively involved in capturing use data on farms and in improving disease control to reduce the need for AM usage.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Not sure,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
Interested in being involved in controlling the AMR risk from use of antimicrobials in agriculture,

Q26

If you have any additional comments or suggestions, provide them in the space below:

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

In Agriculture GAP might be confused with Good Agricultural Practices. it might fit, but takes away from the Global Action Plan that is much wider.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9	**Yes**
Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.	

Q10	**Yes**
Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Commitment and public promotion to combat AMR in whichever way is possible for the member.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All the mentioned ones, especially practical implementation guidance and activities to small-scale and poorer countries

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Cluster groups should have administrative and overview role. Active role should be with the Action Groups that act based on input from Cluster Groups

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

No comments yet

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9	**Yes**
Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.	

Q10	**Yes**
Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Qualifications should be related to voluntary interest tô partici

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Pa

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Implementation of activities related to amb residues

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I agree

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Ok

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Ok

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

It must be a joint and inter-disciplinary effort to be successful as the effects on the one discipline alsi have influence on other disciplines and sectors

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Participants need to interact regularly and need to develop objectives and activities towards a common goal corresponding to the vision

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The One Health concept should be the goal for the guiding principles

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Anyone that in some way or another participate or is involved in combating AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Action Groups with focused topics are the only way to compile such a comprehensive programme and allow so many participants

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Somewhere there need to be a survey of the AMR problem both globally as well as country specific

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The cluster groups are fine, but the action groups should go across cluster groups to ensure knowledgeable contributions and representative contributions

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Tentative. Although I understand the practicality of the approach, if there is not some form of financial support, the participation of not well funded organizations will be limited, and therefore the participation in the Platform may be skewed

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Tentative. Although I understand the enormity of the task ahead, the time frames appear too long given the seriousness of the AMR problem

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

4 - Actively

Please provide additional comments and/or suggestions in the space below.:

We have/had a number of research projects on AMR

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Not sure,

Please provide additional comments and/or suggestions in the space below.:

Tentative yes, but platform participation will have to be virtual due to health and financial reasons

Q25

Do you identify yourself in one of the clusters? (optional Q)

Not sure

Q26

If you have any additional comments or suggestions, provide them in the space below:

Good luck! This is ambitious but very necessary

Yes,
Please provide additional comments and/or suggestions in the space below.:
Ensure good representation of the environmental sector

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

avoid too many abbreviations

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9	**Yes**
Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.	

Q10	**Yes**
Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

xxxx

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

xxxx

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.	**Yes**
Q10 Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	**No,** Please provide additional comments and/or suggestions in the space below.: we need accountability from individual countries to make it more effective.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Technical and scientific advisory will be important to provide advisory and at the same time local support to advance in the AMR agenda.

Q13

Yes

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Creating an AMR Balanced Scorecard for individual country NAPs would be very helpful to Benchmark countries, share best practices and to track the evolution of NAPs. Measuring surveillance is helpful but it is required to advance on all intervention areas.

Q15

Yes

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Chairperson mandate should be limited to 2 years thus allowing other leaders to provide contribution.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,
Please provide additional comments and/or suggestions in the space below.:
It would be helpful to see alternatives.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Not sure this is a new initiative or continuation of an existing one. Anyhow, how can it add value and avoid duplication of efforts? Secondly, how will participating countries take a more binding role when it comes to implementation and execution?

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The platform should also work towards promoting and strengthening multi-sectoral research & development avoiding duplication, using resources in an efficient manner and promoting international collaboration and knowledge sharing. The Global AMR R&D Hub, as a knowledge centre for AMR, collects and presents information on AMR R&D investments across the One Health continuum as well as information on antibacterial products in the clinical development pipeline and market interventions. This information is intended for evidence-based decision making and enhancing collaboration and coordination for countries, foundations, organisations and initiatives to help set priorities and maximise the impact of resources invested in R&D to mitigate the AMR threat.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We agree that a shared vision is critical to move forward, however, we have to recognize and ensure appropriate resources and efforts are focused on implementation, which will require recognition of national, regional and local settings and alignment of existing activities. In addition, we need to set the focus on addressing global R&D priorities while respecting domestic and organizational priorities. We also see a need for raising public awareness of AMR in the One Health context to ensure that knowledge can be translated into action.

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We strongly agree with the guiding principles, but would also like to highlight the necessity of ensuring that the multi-sectoral and multidisciplinary approaches are actually translated into action. For this we need to establish criteria for success and learn lessons from previous activities in this domain. In terms of transparency and open access and inclusivity, there should be ample opportunities for joint communication and interactions between stakeholders across the One Health spectrum.

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The inclusion of regulatory authorities within the groups would provide added value to the Platform. In addition, we suggest the inclusion of umbrella organisations covering stakeholders working in the field such as farmers, clinicians, veterinarians etc. Due to the broad range of stakeholders included as members, it would be important to ensure that all parties communicate at a level that ensures common understanding.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Expertise, motivation and ability to take action

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

We agree that best practice guidelines and information sharing etc are extremely useful activities, but emphasis should be placed on practical implementation of activities. of activities.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We would be interested to see how the inclusion of regulatory authorities and umbrella organisations covering stakeholders working in the field such as farmers, clinicians, veterinarians etc would fit into these groups

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

No,

Please provide additional comments and/or suggestions in the space below.:

The process of decision making is unclear.

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,
Please provide additional comments and/or suggestions in the space below.:
As part of the communication flow, the Global AMR R&D Hub would be pleased to be included.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

The Global AMR Hub (www.globalamrhub.org) is a global knowledge centre for AMR research and development. We established a Dynamic Dashboard in March 2020 which continuously collects and presents information on more than 8bn USD AMR R&D investments across the One Health continuum, as well as information on antibacterial products in the clinical pipeline and incentives for antibiotics R&D. This information is intended for evidence-based decision making and enhancing collaboration and coordination for countries, foundations, organisations and initiatives to help set priorities and maximise the impact of resources invested in R&D to mitigate the AMR threat.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::

Government representatives, UN agencies, international, intergovernmental and regional organizations

Q26

If you have any additional comments or suggestions, provide them in the space below:

The knowledge base on AMR has accumulated over the last decades and now is the time to translate this foundation and lessons learned into action. A One Health approach is a crucial way forward in this endeavor. To provide clarity on what One Health actually is, we suggest the generation of a common definition of this term that is accepted universally.

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The participation of all stakeholders across different sectors will spell the degree of success or failure of the AMR endeavour.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The objectives are noteworthy. The most important aspect is sustainability of the global efforts. Developed countries may be able to continue on the long term the initiatives taken. But, in developing countries, without the support and funding of international organizations, the efforts may die down immediately, or battle an upswing or downswing trends in working to achieve the said objectives.

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I agree that there should be transparency and open access. Reports and products can be better processed, analyzed and validated if many, if not all are actively participating. Perspectives of any given situation vary among different kinds of people.orts and products can be better analyzed and validated if many, if not allare involved

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

If possible, can we request the applicant for membership to make/sign a pledge or oath attesting to his/her commitment to regularly report or act on request or instructions issued by the platform. Likewise, the applicant should choose 1 or 2 disciplines, e.g. information dissemination/campaign, laboratory result reporting, policy crafting, etc. on which the applicant would concentrate on being an active participant.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

My basic concern is compliance. We may be able to provide many guidelines, information, practical tips, etc. but there should be a monitoring group that will be able to determine whether the guidelines are followed, the information received are passed on or shared or put to good use, the activities are undertaken, continued or sustained.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Please consider some form of other connections outside of the plenary.

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

What is the connection of the cluster groups and the action groups? They are connected by way of the Plenary but there is no direct connection to each other. Is it better to have a direct connection from the Steering Committee to the Cluster or Action Groups other than through the Plenary. I am just thinking of time consumed if everything goes to the Plenary first. nnection

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

Please see my comment in #19.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I think, these targets summarize the response to my above comments. Can we add the word measure after build in the medium-term target. If we do not measure, we will not be able to evaluate our progress.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

The Partnership Platform will be able to hasten current efforts against AMR. Just a thought, maybe we can try to acknowledge accomplishments of the people on the ground for their AMR initiatives based on what can be considered as notable achievements. Issuance of a certificate of recognition to those deemed to be exerting extra efforts in the fight against AMR can be considered. We can have two types of recognition, one for registered member and another for the non-registered members.The qualification and criteria can be defined and refined. against AMR. Just as a long-term or medium-term,

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

3 - Moderately

Please provide additional comments and/or suggestions in the space below.:

Our organization participates in information campaign and dissemination as well as offering recommendations for policy formulation or crafting of guidelines/directives.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Not sure,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
Our organization belong to the private sector, to be more specific professional groups. Is the professional group classified under private sector. This question is raised because there is a specific group for academe and research.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9	**Yes**
Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.	

Q10	**Yes**
Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Minimum number of years of experience in the AMR field, should be 5 years

Q13

Yes

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

outcomes from major public health programmes such as the Fleming Fund Regional Grants and other similar programmes, in One Health/AMR space

Q15

Yes

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,
Please provide additional comments and/or suggestions in the space below.:
where does a for/non profit organization fit? where does a research organization fit? the green box on extreme left should be more comprehensive..

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,
Please provide additional comments and/or suggestions in the space below.:
all this is very top level. What is important is to get the messages implemented..how do we ensure that governments indeed take action to nip over the counter sales of antibiotics, how do we ensure that stewardship principles are well known to practising doctors..we have to think out of the 'box' and 'high level meets'. We know that AMR is spreading because of reckless us of antimicrobials and inability to contain it..

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

all this is very top level. Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The purpose is clearly relevant and highly important. To effectively combat AMR actions must be taken within and across the three areas (human, animal and plant). One clarification is I'm not sure it is correct to say that antimicrobials need to be preserved as a life-saving medicine for plants. Antimicrobials utilized on plants tend to be for the purpose of pest and fungus control. I would say this is in some ways analogous to use of antibiotics as a growth promoter on animals utilized for food. In both of these circumstances, use of antimicrobials may be largely or entirely unnecessary.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The objectives are relevant. I recommend that another objective be added, this being that the work of multi-stakeholder groups be utilized to establish and advance best practices, metrics, guidelines, policies and regulations that will advance the proper use of antimicrobials and dissuade (and possibly at some point, prohibit) misuse of antimicrobials in areas that contribute to threatening their continuing viability as a classes of life-saving medications. There is a clear opportunity in my view to connect multi-stakeholder engagement, consultation and action-planning with what can emerge as sensible and viable best practices, metrics, guidelines, policies and regulations.

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I support these guiding principles and recognize that the complexity associated with AMR as a global threat and breadth of relevant constituencies and stakeholders make this a challenging undertaking. I recommend that another guiding principle be added, that being a bias for action. It will be essential for this effort to prevail beyond engagement, information sharing, consensus building and communication to identify and catalyze concrete actions that substantially advance progress in containing, combatting and ultimately reversing AMR. These concrete actions should be a direct outcome of the AMR Multi-Stakeholder Platform process and proceedings, and should include a method for prioritizing actions based on key criteria such as strength of impact, cost, global reach and complexity.

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

This is fine but it is incomplete in my view. Effective action on AMR will require accountabilities to be identified and assigned to a broader number of key stakeholders. As influential as the governing bodies of the Tripartite are, there are limitations in their levels of reach and influence to translate accountability into actual change (each agency does indeed have substantial influence and ability to catalyze change, though only to a point). I believe accountabilities need to extend to each primary participant group (cluster) in the Platform, including governments, the private sector, academia and even civil society. Defining these accountabilities early in the process may be instrumental in helping also define the priorities and actions that ultimately will need to be pursued and implemented.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I agree that organization around Action Groups and Cluster Groups can be an effective way to move this effort forward. I assume the Action Groups will focus on topic areas that could either fit within or cut across the three Tripartite Group responsibility areas (human-animal-plant), and will cut across the clusters. For example, use of antimicrobials as a growth promoter in animals and for pest/fungus control in plants represents misuse across two responsibility areas (animals and plants) that threatens the continued viability of antimicrobial use in the third area (humans). It therefore cuts across all three responsibilities areas. Addressing this misuse will require effective cooperation and coordination across multiple Cluster Groups such as governments, the private sector, academia and the financial sector. It therefore will also cut across clusters. One important thing to consider is whether there are subgroups within Cluster Groups that need to be prioritized and recognized. For example, in human health, practitioners (doctors in particular) are an important subgroup. In plant health, farmers are an important subgroup. As the Cluster Groups are formed there will need to be deliberate anticipation of the subgroups that are most highly relevant. Lastly, as the Action Groups advance their work, it will be important to prioritize the issues and interventions that can have the most impact. I expect there may be an 80/20 rule that can be applied. Other relevant variables are complexity and cost of implementation. At the risk of stating the obvious, high impact interventions that are low in cost and are not overly complex should be prioritized first. An overall prioritization of actions can be established along these lines.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

I think you have captured key requirements: 1) relevance to some aspect of AMR, 2) commitment to dedicate the time and effort needed, 3) ability to take effective action to combat AMR. To this I would add alignment of motives. While each participant may have motivations that are aligned specifically to their constituency group, it will be essential to have some consistency in the overall motive for engaging, which is to tackle, contain and combat the global threat of AMR. If this is in place it will be the unifying factor that avoids this effort fractionalizing into separate groups primarily focusing on protecting the self-interests of their sector, constituency or organization. Some level of self-interest and even some level of conflict of interest is to be anticipated (and needs to be transparent). Though all involved and particularly those in leadership positions must share a common and deeply held commitment to the cause itself. In my experience, this is among the most important and powerful factors impacting the success of multi-sector/multi-stakeholder collaborations.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I like the way the interface between the Action Groups and the Cluster Groups (and the Platform) is described. It sounds highly participative and collaborative. Reading the paragraph above also gives me a stronger sense of the level of work effort that will be required. I think it may be difficult to accomplish these tasks in the expected manner purely with volunteers who only have a portion (perhaps a fraction) of their time to devote to this effort. There will need to be dedicated and funded resources (people) to support these activities, likely for each Action Group and Cluster Group. I don't believe many people will be needed to support each Group, though their roles will need to be clearly defined, and there will need to be a high level of competence and commitment to lead and manage this work. The level of need here will be linked to how ambitious we are in our expectations of the output. If we simply want to identify key priority issues, that will be a lighter undertaking that doesn't require as much dedication. If we expect full developed action plans supported by documentation and data (as suggested in the paragraph), that will be a heavier undertaking that will require more dedication.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

1) Clear identification of the primary drivers of AMR which are associated with the Action Group's areas of focus, 2) Clear definition of the underlying factors (practices, habits, behaviors, incentives and disincentives, etc.) influencing the primary drivers, 3) Clear articulation of what needs to change in order to address the primary drivers, 4) Proposed plan of action (in outline form) that can enable the necessary changes to be implemented (these would include topics such as guidelines, practice changes, advocacy, information sharing), 5) Identification of barriers to accomplishing the necessary changes, 6) Articulation of the roles and accountabilities of major stakeholder groups (likely organized by sector), 7) Recommendation on where primary responsibilities can feasibly reside for taking these 'preliminary plans' forward.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I think the five primary membership groups make sense. Though as mentioned earlier, representation of certain subgroups within the Cluster Groups will be essential. Two examples are medical practitioners (doctors) and farmers. Would these both fit within 'Civil Society'? Or will doctors fit within 'Academic and research institutions'? That is unclear to me. There may be a risk here that if these Cluster Groups are comprised too broadly (which could happen in light of the representation goals) then their relevance, influence and impact may be diluted. Thought needs to be given up front to which specific groups and subgroups will have the most ability to influence and enact change. This should not be a 'first come – first served' approach, it should be deliberate.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I concur completely with the last two sentences on transparency and no remuneration. For the first two sentences, there may be a practical trade-off between the level of the participant in their organization and the time these representatives will have available to participate. If the process is more so consultative, and with minimal/reasonable time requirements, then higher level participation may be feasible. To the extent that members are expected to devote a more substantial amount of time, recruitment will become more challenging in general, and it will be more difficult to engage high-level participants. I think it would be useful to benchmark other efforts (both within and beyond the UN system) to determine what this effort might be most similar to and what worked well (and didn't) in the past.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Is it anticipated that all these lead roles will be voluntary, and part-time? If so, it might become difficult to staff and sustain leaders in these roles. Again, I would come back to how much depth is anticipated in the work. If this is more so a consultative process for input, it is more feasible, but less impactful. If it is expected that these groups will lead and drive change, then more thought needs to be given to establishing the conditions under which the right levels of talent, time commitment and focus can be obtained and sustained.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

This makes sense to me, it is straightforward, and I don't think there is a practical alternative to this type of plenary session. The question I would have is, what happens in between the plenary sessions? How will the work efforts be organized? Will those decisions be left to each Action Group and Cluster Group, or will there be an effort to achieve some level of consistency in the organizing mechanisms and cadences. How will the various groups interact between plenary sessions? These questions will need to be addressed.

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

I would say my answer is more so “I’m not sure” than “No”. But I didn’t think it appropriate to simply answer “Yes”. I have the sense that this may be a top-heavy structure, meaning there are more ‘bosses’ than ‘workers’ (forgive the analogy). Each of the three agencies will expect to have a certain level of authority, as will the Global Leaders Group, the Independent Panel, the Steering Committee and Governments. Much of the ‘legwork’ may fall on the Action Groups (each of which will have a leader who will also expect to have some authority), which unless I’m mistaken will be comprised of volunteers. This structure may insufficiently identify where the heavy lifting work will get done. That is where I think the progress really will be made. I’m sure that is anticipated but it is not clearly articulated or shown in the structure. Otherwise, I think it is fine because it captures all the elements. One other point to consider, if we compare and contrast how this is organized to how the AMR Review was organized, I think we would identify many differences. Principle among these is the additional complexity resident in this proposed form or organization. The AMR Review, led by Lord O’Neil (with Dame Sally driving so much of the activity both behind and in front of the scenes), and actively supported by the Wellcome Trust, had a much more simplified organizational structure than this. I know this isn’t an apples-to-apples comparison, and a big part of our goal is to now catalyze action around the type of issues identified in the AMR Review. Though I wonder, if the AMR Review had been organized as depicted above from the outset, would as much progress have been made in developing and issuing comprehensive reports? Reconciling these thoughts, I think there needs to be a highly competent, influential and well-funded ‘work leadership group’ supporting this structure, analogous to the role that the Wellcome Trust played for the AMR Review. And there likely needs to be a strong identified overall leader or set of leaders, analogous to the roles Dame Sally and Jim O’Neil have served.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

Again, my real answer here is " don't know." I agree with part of the statement indicating that the Platform should devise a communications strategy. I'm less certain of the second part of the sentence that states "...will enable them to act on the Platform's reports." I think the standard of achievement on 'enabling to act' is much higher than "bringing conclusions to the attention of priority stakeholders." Enabling to act implies that deep thought and planning has been given to defining implementation mechanisms. If the objective is purely communication, then the recommended approach should be sufficient. If it is to mobilize action, it will be a much heavier lift.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

I didn't realize until now that this is envisioned to be a 10 year+ effort. I agree with this longer-term timeline because combatting AMR is going to require a marathon, not a sprint race. However, sustaining momentum on this with what will be a very large (200+) and likely (over time) unwieldly groups of participants and constituents will be very challenging. I think more thought needs to be given to how the large, engaged group transitions to a tighter leadership and action group in a 1 to 3-year time period (simply because I don't think 200+ people can be held together for much longer than that). I also find the 10-year goals to be somewhat lacking ambition. If this is successful, there will need to be more than a "global commitment to use antimicrobials in a responsible and prudent way." This commitment could be a nearer-term goal. Similarly, the words "keep the momentum going" are not particularly ambitious. I think by year 10 there should be much more clearly defined metrics that reflect a true change in the trajectory of the AMR threat. Words such as "eliminate use of antimicrobials as growth promoters in animals," and "eliminate use of antimicrobials as pesticides in agriculture" would not be overly ambitious as 10-year goals, or even as 5-year goals.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

This is a very ambitious undertaking. I would try to simplify it. I hesitate to say exactly how with only a few minutes of thought. But one component I think I can cite now would be to form a very strong, highly competent, core hands-on leadership group that can assume the key role of strategic and operational leadership, and does advance work identifying the major priorities, challenges and actions that need to be undertaken and pursued. We know much of this information already, and by casting the net so wide in this proposal, there is a risk that these various groups will reiterate knowledge that already exists. The Action Groups and Cluster Groups would also benefit from some form of central leadership (different from and in parallel with the leadership functionality of the Tripartite Group). This is what I referred to in our conversation as an 'orchestration' group/secretariat. There is a direct analogy to the conductor of an orchestra. The conductor doesn't personally play any of the instruments, but pulls everything together, and is recognized and respected by each of the individual musicians. I think this effort needs an orchestrator/conductor, but not only a single person, rather a highly committed and sufficiently funded operational team and leadership group.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**5 - Fully**
Please provide additional comments and/or suggestions in the space below.:	I'm responding here on behalf of the Antimicrobial Resistance Fighter Coalition. With respect to AeroFarms, I would answer '3'.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,
Please provide additional comments and/or suggestions in the space below.:
I think I can bring useful perspective to this effort based on my unique sets of experiences.

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
Logically I would be identified in the Private Sector cluster group though my experiences with AMR are much broader than a typical private sector leader.

Q26

If you have any additional comments or suggestions, provide them in the space below:

No additional comments other than best wishes for moving this forward successfully.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9	**Yes**
Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.	

Q10	**Yes**
Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

COMMITMENT AND WILLINGNESS TO PARTICIPATE

Q13

Yes

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

SHARING OF BEST PRACTICES

Q15

Yes

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Commitment to combat AMR and Commitment to better stakeholder engagement.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All of the above and stakeholder engagement

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q5

Type of organization:

Other (please specify):
Healthcare Professional Organisation

Q6

Country:

Belgium

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The platform should also involve umbrella organizations that bring together the interests of multiple different national actors.

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Members need to demonstrate previous activities in the area of AMR. The platform should bring together interconnected stakeholders with a proven history of successful multi-sector cooperation.

Q13

Yes

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

The following action could be envisioned: o AMR Guidelines all-encompassing and transversal. In other words, guidelines which will be ready to be implemented by various stakeholders and each stakeholder may be aware of other stakeholder's actions and priorities.

Q15

Yes

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Efforts to build more consensus globally are very welcome

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9	**Yes**
Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.	

Q10	**Yes**
Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

All those who have the ability to influence positive action on AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Improvements in global harmonisation of evidenced based guidelines based on One Health principles.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

There may also be value in establishing a cross cutting Cluster Group or a mechanism to exchange views between Cluster Groups in a dynamic way.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The Platform is relevant to the extent it is operated according to its aspirations, especially that it is truly inclusive, international, and multi-stakeholder for those perspectives from low- and middle-income countries and the breadth of its civil society –including medical associations, pharmacists, patient groups, and patient groups. It also depends on what priorities are set by the Platform, and who sets those priorities. Finally, it also depends on whether the findings and recommendations of the Platform are applied to the deliberations of the GLG and the research agenda of the IPEA.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

These appear to be appropriate aims and objectives for the Platform. It is important also that: (a) the Platform does not merely work with those entities and organizations already or solely focused on AMR, but seeks to work with those not yet engaged on AMR but with the capacity or reach to have an impact, and (b) that the Platform does not merely confirm existing approaches to AMR amongst the largest and most well-resourced stakeholders but functions also as a platform for engaging and illuminating perspectives and approaches that otherwise are ignored, not understood, or not known.

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

While we support these guiding principles, there may be additional Principles the Platform should take into account. First, while the Platform should be inclusive of all voices, it should take steps to ensure that it identifies and manages conflicts of interest, e.g. entities with commercial interests Second, while the Platform will want to illustrate its effectiveness, it should make sure it is transparent and communicates where there are differences of opinions within the Platform that could not be reconciled yet exist.

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

While these criteria for participation appear to be appropriate, we are concerned that participation may not extend to those entities and organizations that have neither the relationships nor the resources to ensure their perspectives are taken into account. The concern is that the inequity in policy-making that already exists between governments and between sectors will merely extend to the Platform, in lieu of rectifying such an imbalance. And while there may be elements of the private sector (notably smaller companies) that traditionally do not have an opportunity to offer their perspectives within inter-governmental agencies, many of the largest companies already have significant influence and opportunity to influence their own government's agenda on AMR, and the resources to do so. Furthermore, for instance, an industry cluster group may be dominated by the biggest entities.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Entities and organizations should either have an existing relevance to AMR or can make a case to take action to combat AMR. Arguably, the second category is more important since success in addressing the many dimensions of AMR depends as much on the investments of those who are at the forefront of implementation as it does upon implementation by those who are indirectly affected or can have an impact. The Platform should also consider assuring some minimal commitment of those who join – the quality of participation should matter as much or more than the quantity of participants.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

See our concerns about divisions into action and cluster groupings.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

The suggested activities appear appropriate. The Action Groups should especially be able to focus both on best practice guidelines and practical guidance – informed by their own activities – that can serve as a model for others. Action Groups may also want to develop their own training programs that can be used more widely to put into practice the knowledge and information that is collected and disseminated by each group.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The proposed cluster groups appear appropriate- but please see the concerns highlighted above. though it should also reflect that some organisations such as GARDP that harness public private partnerships cut across several clusters. Each Cluster Group should be able to define its own activities and role according to what it may believe is necessary and useful for its wider approach to AMR. One concern is that the creation of too many groups – e.g., both Action Groups and Cluster Groups – could lead to either 'fatigue' with these Platforms amongst entities or could be too resource-intensive for specific groups, and especially civil society organizations and networks, to participate fully and equally. As such, groups should only be set up if there is a need to do so and if it serves a function (this applies also to Action Groups).

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We would note a few additional issues to consider: 1. Where there is a clear conflict of interest, members that have such conflicts of interest should avoid participation in discussions, or at least such conflicts should be shared. 2. A form of remuneration may be necessary for groups and organizations that operate with little to no resources but may be especially critical in providing perspectives from countries and settings that larger, well-resourced organizations, neither have nor appreciate.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

While the composition appears to be well balanced between each of the cluster, action groups and agencies, we hope the representation is appropriate from a geographic, gender, and functional expertise, as well as the perspective of LMICs, academia, research organizations, and civil society.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The Plenary Session appears to be appropriate. However, we question whether a single Plenary Session each year will be sufficient to ensure that all relevant topics are covered and that the discussions of the multistakeholder group are keeping up with a field that is fast moving – in part due to the scrutiny and awareness raised by COVID-19. It may be better to have several plenary sessions – each with a thematic focus that differs – and hold them across the calendar year (with each plenary being shorter in duration).

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

The main concern overall is the complexity of such a structure and the risk for WHO and the Tripartite to be absorbed by the organisation of events, meetings and committees and not be able to focus on normative and policy work and country support. Overall, it may be better to choose between action and cluster groupings (both may be too much).

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

While the information flow between different entities is probably sufficient, the one shortcoming may be that there is not adequate information shared with external parties, and especially key opinion makers and the media. Recent efforts on climate change do not just rest on sharing scientific consensus and policy guidance with the same parties working within the global climate framework, but with the effective communication of scientific consensus and action to media. While journalists may not necessary be included in the platform itself, there needs to be greater inclusion of the media into any communications externally to ensure the various entities' work reaches a broader audience.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,
Please provide additional comments and/or suggestions in the space below.:
We agree with the targets but also feel there should be additional targets added. First, as to the short-term target of attracting members, it may be that the Platform needs to define the targets for different stakeholder voices with more specificity to ensure adequate balance, and to also set targets for non-AMR stakeholders that should be engaged to integrate AMR into their operational, programmatic, or public-facing activities. Second, there should be a long-term target not only of ensuring responsible use, but also to ensure that there is an appropriate focus on the development of new or repurposed antimicrobials that are required alongside sustainable use- and access ensured for these, especially in LMICs where burden may be highest. Third, there should be a medium-term goal for increased investment in AMR – especially financial or technical investment – by different stakeholders. Fourth, there should be a specific target that seeks to measure awareness raising and external communication with media and other opinion makers that helps to build on the work of the GLG, IPEA and Multistakeholder platform.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

This is a highly complex endeavour, key to success will probably reside in 1) lessen the complexity that may be generated by both the Action and Cluster Groups for example; and 2) the need to invite smaller and more country level organisations, especially from LMICs, and be willing to provide some support for the latter.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9	**Yes**
Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.	

Q10	**Yes**
Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Commitment and ability to take action

Q13

Yes

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Practical implementation at country level

Q15

Yes

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

The RSPCA thinks all organisations with a genuine commitment to, and business interest in, the group's remit should be admitted. This should involve a genuine desire for open, informed discussion and debate as well as a knowledge of the topics being discussed by the group.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

In the RSPCA's experience, action groups work well when there is a clearly defined goal with a timeframe to achieve it. Action groups should be outcome focussed, enabling small groups of experts in the subject matter to come together and develop a response which can be given the final sign off by the group as a whole. The production of best practice guidelines, advocacy, and information sharing, as well as practical implementation of activities at country or sectoral level (as relevant), would all be considered appropriate actions for the Action Group.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The RSPCA believes this ensures Action Groups can remain small and effective whilst representing the views of the relevant members of the platform, without duplication. It seems like it will ease the load on individual representatives by those making up the clusters taking turns at participating in Action Groups as appropriate. This also streamlines the action groups to ensure there is no duplication in discussions and where individuals within a cluster vary in opinion on a point it can be discussed in the cluster among the experts of that area, before being discussed with the broader memberships represented in the action group. It seems logical that these remain administrative, largely, but the RSPCA would envisage there would be some activity when deciding representatives at the action group level and ensuring those representatives are informed of the breadth of views of the cluster.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,
Please provide additional comments and/or suggestions in the space below.:
The RSPCA agrees with the steering committee proposed in principle but envisaged Action Groups being time-limited and flexible and made up of varying members of the cluster groups and thus, in our view, wouldn't need to be represented at the Steering Committee level if this were the structure Action Groups were to have.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
Arrow directions would make this diagram clearer, but we believe the cluster groups (represented on the left hand side) should feed into the Plenary and the Action groups should come out of the plenary, rather than into it (it is unclear if this is how the structure is intended or if action groups are also feeding into the Plenary).

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,
Please provide additional comments and/or suggestions in the space below.:
It is unclear how communication flow is likely to look, but if the Platform is held in high regard and is seen to develop feasible proposals and take advice on AMR and make real headway on achieving the goals in practice then the RSPCA is confident that the Platform will be given the attention it would deserve by governments, thus allowing a two-way flow of communication and action.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

No

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9	**Yes**
Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.	

Q10	**Yes**
Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

No comments

Q13

Yes

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Core curricula and course content on AMR

Q15

Yes

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

As long as there is a good connection with relevant stakeholders: the ones that have to do the implementation (farmers, veterinarians, medicals etc.)

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

As long as the representatives of the different people working in practice (farmers organizations etc.) are included and involved.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

It is important to have a stakeholders impact analyses, to cope up with the need to implement actions effectively.. The most challenging part is not only developing solutions but also bring it into practice and having good cooperation with the ones that have to action on the ground.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We would like to stress again the need to connect policy making with the practice, the field where it has to happen/change.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Seek for cross- fertilization with ongoing/implemented projects (qi.e European H2020), consultations with relevant stakeholders to gather needs, expectations and solutions, create space for peer – to – peer exchanges.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We want to stress again the need to involve farmers and their representatives in the platform.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
We want to stress the importance of stimulating commitment of the stakeholders involved, on which depends the success of the Platform.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

WFO Policy on Antimicrobial Use and Resistance in Livestock Antimicrobial resistance (AMR) threatens the effective prevention and treatment of infections in humans and animals. Resistant bacteria and infectious diseases do not respect borders and are present in all parts of the world. Global action is needed to preserve the long-term availability of effective treatment of infections for future generations. AMR is of great importance to human and animal health and a One Health approach at global, regional and national level is crucial for tackling AMR. Close cooperation between stakeholders in human and veterinary medicine is needed and everyone must take part in the fight against AMR. WFO will support and encourage farmers, veterinarians, specialists in livestock production, and food specialists to join forces and combat AMR together to minimize the risk of it spreading, while taking into consideration the human, animal and environmental dimensions. https://www.wfo-oma.org/wp-content/uploads/2019/06/WFO-Policy-on-AMR.pdf

Job title:

[redacted]

Q4

Organization/entity:

Turkey Farmers of Canada

Q5

Type of organization:

Other (please specify):
Producer Organization

Q6

Country:

Canada

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9	**Yes**
Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.	

Q10	**Yes**
Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.	

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

...

Q13

Yes

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

...

Q15

Yes

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22
