Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

cnjcwoncdl

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

cmkslmcdl

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

cndn

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

No,

Please provide additional comments and/or suggestions in the space below.:

I think we need a capacity building element

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

No,

Please provide additional comments and/or suggestions in the space below.:

The stakeholders on the grounds should not be only heard, but they should be allowed to lead

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

How does this ensure that the on-the-ground stakeholders will be engaged as key stakeholders?

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

We should allow stakeholders whose political and scientific knowledge may not be extensive, but have strong experience in the field to participate.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

No,

Please provide additional comments and/or suggestions in the space below.:

Consulting the prescribers/users in the field is necessary.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Not necessarily a document, but a vision carefully constructed from the ground up that is owned by all.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

How do we ensure inclusion of marginalized groups?

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

Have we defined Global Leaders Group, Independent Panel on Evidence, etc. above? Who is accountable to whom?

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

As it is, it looks as if WHO has to go through OIE and FAO before reaching the Steering Committee.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

Start awareness raising and capacity building immediately with emphasis on the ground level, including ordinary citizens.

Q22

The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

As I stated I think that educational campaigns at local level involving also students might be effective to involve more people.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

members should be people taking care of the topic since one year at minimum maybe more, but also people with good communication skill in public health emergencies.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All actions mentioned but also the organization of educational campaigns toward high-school students but also primary school children with activities that involve also their partens. In this way a capillary sensibilization is reached

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Relevance on AMR activities.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Advocacy, Practical Implementation.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

As an individual expert, our knowledge must be considered too.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

It should be compulsory to have already partaken in country AMR activities to ensure a basic understanding of the topic

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Creating standarsized one health framework and methodologies that can be used across all sectors

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I agree but you must remember those from lmics do not make enough money to travel internationally and can take time to convince high level government officials to release funds

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Any persons dealing with animals at any level and capacity

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

cascade this to farmers associations/breed associations at country level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Country:

Bangladesh

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Should involve Regional organization

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Willingness

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All mentioned above should be gradually initiated to move forward.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Livestock farmers, feed manufacturers, vet. pharmaceuticals should also included as separate clusters

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Should be also represented by poultry/ pig/ cattle/ buffalo/ goat/ sheep and cooperative organization

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Excellent initiatives to mitigate AMR challenges with collective responsibility.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

country teams can be the building blocks

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Expertise and hands on experiences on the ground

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Work bottom-up and in reverse order up on syntheses

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All but tested. I have been contributing throughout the process for more than a decade on AMR, however, I did not see continuity of work and contribution at global level. I would suggest that this be improved.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I would suggest strong at the base than heavy headed and merit based and hands on experiences..

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

may need some improvement

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

as above

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

as above

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

But simplify the matrix as often seems complex

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

as above

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

But where are all what has been initiated before? Are we starting from the scratch?

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

All but tested. I have been contributing throughout the process for more than a decade on AMR, however, I did not see continuity of work and contribution at global level. I would suggest that this be improved.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

To be more effective the platform should only have the action groups

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

na

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

all of the above

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,
Please provide additional comments and/or suggestions in the space below.:
Global leaders group and independent panel of evidence are they relevant, when we have all components? If too big a structure it may became ineffective

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,
Please provide additional comments and/or suggestions in the space below.:
short and medium term are already in place in many countries. What we need urgently is global commitment and this should be the short term, or we may forget the current burden of AMR if we wait 10 years

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

SUDAN

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Aware with the concequences of AMR and commitment

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

should have a global vision.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

practical implementation of the activities

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Anyway clusters could lead to not work togheter

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Thailand

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

It could be made more specific. It remains quite generic at this stage.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Interesting approach!

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

I would make quite open. By joining, organizations could have to sign a declaration that they are joining with the aim to contribute to the fight against AMR. Organizations could have to explain why they would like to join (there could a list of answers to tick, related to different reasons for joing the platform). A company that has nothing to do with AMR should be excluded.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I wonder how sustainable will be this platform and thus, if the monitoring of impact will be feasible. Organizations need to be engaged in the long run. Good if the platform aims to last long. Very relevant otherwise.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

I support the practical implementation of activities. For the best practice guidelines: ok, but there are already many such guidelines,so they should be complementary and not conflicting guidelines.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Will NGOs and veterinary associations fall in civil society organizations?

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Not sure what is meant by "adequately high-level of their organizations". Proportionally instead of adequately?

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Partners need to have a forum for networking that operates on a continuous basis, right?

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The targes are relevant but hard to measure.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

It takes much more than 10-15 minutes to fill out ;-)

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Emphasis on research and development of novel therapeutics to mitigate against already existing AMR

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Good knowledge of AMR aspects especially at research consistency in follow up and execution of agreed action plans.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Active influence on government/relevant authority

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

AMR end users

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Information sharing

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Members who are stakeholders, directly in relations to AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Advocacy and more advocacy, enforcement of compliance of the guidelines, building capacities in research and collaborative research.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Need to involve those at the bedsides of the patients, frontline staff in policy and decision making

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Still you need to involve the communities frontline staff

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Under MOU

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

practical implementation/mentorship/training

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Relevance and commitment are both reasonable requirements

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

guideline creation will be challenging; focus on implementation probably best

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

There will be significant overlap between a number of these groups

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The targets are quite mild - only 200 members within a year and aiming to generate commitment at 10 years is probably not sufficient to address the challenge

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no thanks

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆ **4 - Actively**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below:: Government

Q26

If you have any additional comments or suggestions, provide them in the space below:

no

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

positive approaches and bioremediation should be priority areas

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

membership must include commitment to and ability to take action, and these must be evident within a reasonab e time frame.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

all these are useful; most important is to consider positive new approaches and how they can start to reverse the AMR cycle

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

govt representation needs to be at apt level, and a feedback loop regarding participation with these open and transparent. What have we learnt from Climate Action Coalitions?

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

TANZANIA

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

All AMR related stalkeholders

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Implementation of activities at regional level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The idea is appealing, but the scope and objectives of this Platform must be clearly defined. Feasibility is key to deliver concrete outputs and a stepwise implementation is maybe needed (e.g. start with antibacterials, not all antimicrobials). The Platform should be articulated with already existing regional/national platforms or networks of stakeholders, to avoid redundancies, save time/resources and create synergies. Transparent selection criteria, with full disclosure of potential conflicts of interests, should be in place for all stakeholders. Finding the right threshold between engaging a varied group of stakeholders (governments, NGOs…) and having a manageable number of stakeholders (not too large) might also prove challenging.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

You will need innovative and user-friendly IT tools for that. The current WHO website is not the most easy-to-use tool right now.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I suppose members will not be compensated for their time, which might be a problem. How will you deal with conflicts of interest ? and discrepancies between stakeholders ? Will you limit the number of stakeholders ? If yes, that might be a problem in terms of engagement and representativeness, unless you set up some kind of rotating membership and a flexible way to communicate with an unlimited number of stakeholders (e.g. regular webinars).

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Some kind of agreed written commitment is indeed needed. I agree with your suggestions and would add (absence or limited) conflicts of interest, past evidence of AMR action, outreach and representativeness.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Members should probably be compensated in some way for their work and time, and strongly supported by WHO-OIE-FAO for the day-to-day work. An excessive workload might be a deterrent to participation or hinder quality of work and progress.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

This needs to be agreed by the stakeholders, based on a needs' assessment. Developing best-practice guidelines is a complex and time-consuming process, I am not sure this is the main goal of the Platform here.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Gender balance is maybe not so relevant here, as the people will be nominated by their organization. Sectoral balance seems logical, but animal/plant sectors should probably count as one sector only (same 'weight' as for human and environment sectors). Stakeholders in the human sector are usually more numerous than in other sectors, so this also needs to be taken into account.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Disclosure of conflicts of interest is essential. It is important to avoid putting an excessive workload on members. Physical meetings are also important, to facilitate networking.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Strong logistical support from WHO-OIE-FAO staff is essential in order to avoid putting an excessive workload on stakeholders.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Possibly, but your figure is not self-explanatory, so I cannot say for sure.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

There needs to be a mechanism in place to interact regularly with ALL governments, not only the ones represented in the Platform.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Regarding the first long-term objective, antimicrobial stewardship is essential, but so is infection prevention and control.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

See antibiotiques.gouv.fr for more information

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,

Please provide additional comments and/or suggestions in the space below.:

But it will depend on internal validation + the workload and competing commitments (in particular within the national Platform we already have in France and the AMR One Health Network coordinated by the European Commission, that has some similar objectives as the Platform you are discussing here).

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below.:

The government representatives one

Q26

If you have any additional comments or suggestions, provide them in the space below:

None, good luck !

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

n/a

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

* Member being an active voice for proper use of antimicrobials (workshops, training, television programs). That member should be willing to set up a reporting mechanism to regional and international organizations on the type of antimicrobial used and how can it be accessed.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practice on use and disposal of empty contents

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Update of the legislation towards drugs registration and importations

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Also, platform members must have encouraged for their participation and time

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

But the chair person must be the CVO of veterinary department

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

Veterinary association and pharmacy associates

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Experience in AMR either personally or professionally

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Advocacy and practical implementation of activities at country level are actions which will help drive our objectives because it will be country specific and we know that various countries have different work to be done in combating AMR

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The plenary session should be attended by all stakeholders

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Oman

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

experience, accountability and competency

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

governance

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The call for membership should probably be broader than "the relevant Tripartite online channels"

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Perhaps there should be levels of membership - a core membership, representative of major government and non-government sectors involved or directly impacted by AMR, and then a second-tier membership for any other organisations/individuals interested in membership, to allow all interested parties to have a voice.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

There needs to be transparency and clarity around the composition of Action Groups, to ensure representativeness and that there are no conflict of interest, but also that there is sufficient remuneration of key individuals to drive the particular action(s)

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practice guidelines or policy oversight is very useful for countries/states etc to develop local guidelines. Practical implementation of activities at country or sectoral level requires local political endorsement.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

Not sure. It is not clear from the diagram whether the WHO is involved with the Action Groups or not

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

the candidate should have experience in the field of AMR , has worked actually in the field and has the commitment to and able to help

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

the steps involve several important aspecrs : having guidelines, advocacy and traning bu the most important id the pracircal steps for implelmentation

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? Organization/entity:

Israeli Veterinary Services

Q5

Type of organization:

Government representatives, UN agencies, intergovernmental and regional organizations

Q6

Country:

Israel

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Govermental officials with knowledge and ability to take actions in this issue

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Intersectional collaboration between govermental ministries, information sharing including a general and uniform database to collect all relevant information for animals and humans. In addition, practical implementation especially in all livestock sectors

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

what is the influence of the goverment/civil/private/etc. on the Plenary session?

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Israel is looking forward to participate in this platform

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**3 - Moderately**
Please provide additional comments and/or suggestions in the space below.:	We are currently in the process of writing a national plan regrading AMU and AMR.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,
Please provide additional comments and/or suggestions in the space below.:
what does this require?

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below.:
Govermental institute

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

But the platform may need to consider including the very high authorities of countries that have advanced AMR programs

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I would include ministries of the environment as microrganisms that are resistant to different antimicrobes may also prevail in unexpected environments

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

1. Members must recognise the serious consequences of resitant microorganisms 2. Those that are willing to develop a coherent national action plan (NAP) in line with what will be proposed by the TRIPARIATE forum 3. Countries that demonstrate transparecncy and willingness to have a legal AMR Unit responsible for coordination and reporting

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I look forward to be supporting these action groups in their deliberations

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Researcg Guideline development would be a useful component

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

The Action Groups may need to be more than 3 depending on the reports that come out after the plenary

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

an Office of Monitorig and Evaluation unit within the Tripariate Secreteriat is key to the progress and implemenation of the overall AMR agenda. I think it is missing

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Relevance to some aspect of the challenge of AMR, Commitment and ability to take action to combat AMR, Affecting or being affected by AMR, Expertise/knowledge/competence on AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; Maintaining an enabling environment for inclusive particiaption, Recommend research priorities

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

I would be useful to clarify in the image that the 5 in the left-hand box are the 'Cluster groups'

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I would be useful, at least for the long terms targets, to include at least of 'outomce' indicator in terms of "reduction of AMR", or of the threat thereof. I understand it is not easy to develop and monitor an indicator of this, but the present long-term targets seem focusing only on functional aspects rather than concreta impacts.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆ **4 - Actively**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Not sure,
Please provide additional comments and/or suggestions in the space below.:
It would depend on the TOR of my upcoming contracts, and it shuld be discussed with my supervisor and team.

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
International organizations

Q26

Government representatives, UN agencies, intergovernmental and regional organizations

Q6

Country:

Denmark

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

The platform should be open for all persons / institutions interesting in combatting AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All of the above

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

Problems with grouping according to institusion instead of grouping to e.g. actions - is that you do not get the interaction between the different groups

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Members should be able to show their contribution in the field. Membership should require commitment in terms of any action or activity related to AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Actions groups should consider a standard platform for execution of their activities. For example, JEE tool helps to understand the position of the members to various action package. Similarly, a tool or framework must be identified, and each member should be given opportunity to assess themselves and present themselves for the action.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. National Action Plan

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Both of the above

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Q5

Type of organization:

Government representatives, UN agencies, intergovernmental and regional organizations

Q6

Country:

Uganda

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Interest and relevant expertise/skills

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

best practice guidelines; political support, advocacy and information sharing; practical implementation of activities at country and sectoral level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

A more active role

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

None

Yes,

Please provide additional comments and/or suggestions in the space below.:

This will be also a way for political involvement in the figth agianst AMR

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Within the tripartites there is a need to have a coordenator. This role can be played rotatively

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Governments should demonstrate the commitment in the fight against AMR by budgeting activities of NAPs.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Identification of research areas in order to respond some issues regarding AMR

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The civil society should include medicines manufacture companies

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

If the meeting will imply travel costs, these should be shared by Governments and the donors.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Yes,

Please provide additional comments and/or suggestions in the space below.:

are the primary action groups an equivalent to technical working groups ?

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

should have been a recognised and accountable member of AMR CC of a country

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

practical implementation of all relevant activities with support from the secretariat

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

they may not be remunirated but should be incentivised to work, ie provided the needed logistics if need be to work on an assignement

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Would propose biannual meeting to especially if its a virtual session to encourage coverage of issues

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
Think all groups should be reporting to the coordinating team who should sit between the steering committee and planary

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Its a nice piece of governance directives. I hope others make their inputs.

Government representatives, UN agencies, intergovernmental and regional organizations

Q6

Country:

Belgium

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

It is relevant to also hear the voice of organisations from areas affected by AMR but mainly as 'collateral damage', who have no ability to commit to combating AMR. Representatives must have a good (technical) knowledge of AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Overview of international standards and guidelines. Best practice examples with proven result.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

The action groups are composed of members of the platform and should be directly linked to the members box. Action groups report directly to the steering committee. There should also be a link between the two. A description of the coordinating team is welcomed.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The Platform's membership shall include sectors that are underrepresented in the other global governance mechanisms for AMR, civil society private sector need to be focussed

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

A mechanism of qualified membership need to be established. Members should be more proactively engaged and contributing.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practice guidelines are really needed.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

group

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

A

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q5

Type of organization:

Government representatives, UN agencies, intergovernmental and regional organizations

Q6

Country:

Slovenia

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Active participation and motivation

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Novel data sharing and analysis for research

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Research for targeted actions

The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

I agree with the philosophy of this however I feel that you may not necessarily get the right people as these organisations do not widely consult for representation and it is very clicky

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

You should look at a wide, diverse and equal representation from different regions/jurisdictions, experience (human/animal/plant) and potential circles of influence (to disseminate and influence change)

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

practical implementation of activities at country or sectoral level; best practice guidelines/standards; advocacy and information sharing; education; ancillary tools such as fact sheets or implementation tools

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

but have the power to make an influence on the ground through their organisation or through policy changes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

this is essential and should be done frequently and widely

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

anything on developing and discovering new antimicrobial agents? improving antimicrobial use in primary care?

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Special attention has to be given to the existing power inbalance between groups and invest in finding ways to mitigat them as well as work with transparent conflicts of interest approaches - not just declarations of not having such

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Membership should require ability to take action and to stay member, progress has to be achieved

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Attention has to be paid that progress on the ground is more relevant than progress with plans only

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

best practice guidelines and sharing implementation experiences

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

interdependencies have to be made transparent (regarding finance, but also governance structures/ decision bodies etc)

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

pay attention that it serves more than just another talking/ info sharing round

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

not visible

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

might be

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Brazil

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

In my opinion all organizations from countries, regardless of social and economic level, could qualify for membership. However, countries and organizations must have as state policy the engagement against antimicrobial resistance, through a national plan that is in line with the global plan.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

The country's experience and level of progress in relation to its state policy for engagement against antimicrobial resistance. The constitution of scientific committees composed of specialists in the subject.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Cluster Groups should be maintained as administrative groups, as well as advisory groups for global issues related to the topic.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Cluster Groups can actively participate in plenary sessions, bringing questions to discussions.

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Granting authority to act when necessary

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

I think all of the above

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Have relevant backgroung

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Make frequent meetings

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

The most important is to include all stakeholders in each country which in some cases will not be easy. For example in Montenegro we have appointed national coordination body which is formed by 18 institution and they prepared National strategy from 2017 to 2021 with action plan. All of this institutions are important for AMR control

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Intergovernmental / cross nation agreements. Embedding a one health human/animal working framework

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

Governments formal approaches should feed directly onto steering committee

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Proactive engagement with governments ahead of development should be pursued.

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Need to have or lead regular discussions with stakeholders

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Membership may be renewable and should be action oriented. Members should be encouraged to share their work. Renewable Membership for a two year period or three year period with reminders set will be helpful

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practices at any level should be shared with a larger audience and should be encouraged

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Platform should have a dashboard to show the action trends towards reduction in AMR footprint globally. Projection of future trends with maps etc will be informative. Membership status advancements on a yearly basis and the big projects by members should be represented too.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Easy to use infographics for sharing information will be helpful to dissemination of information

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

Ensure more visibility and reach to national level and institutional level may be encouraged

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,

Please provide additional comments and/or suggestions in the space below.:

I view AMR as a black hole, where all the life will be sucked out, if we proceed in this current pace. Though, underprivileged community will be affected first, but no one will be spared from it, therefore I need to be in thick of action

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::

United Nations organsations or even Governmental Agency (I worked prior to join UN)

Q26

If you have any additional comments or suggestions, provide them in the space below:

Public does not know the reach of AMR issues, and may not have an idea about how it will affect ones life including themselves. Most of the public may not have heard about AMR unless they have a level of education, therefore awareness materials should aim to reach out to them clearly. School advocacy may be promoted and AMR stewardship and leadership throughout communities should encouraged if possible. Measures of Antibiotic disposal methods needs to be stressed out, either as a community bin for Antibiotic collection etc should be reached out to public awareness realm.

Q6

Country:

Jordan

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Organizations with experience in project implementation, strong network within relevant bodies in the country, preferably regional network as well. Able to demonstrate stories with similar projects

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Data sharing, sharing of protocols and SOPs, providing training activities for cluster groups

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

A more active role should be given to certain members depending on the relevance of their work and the extent of each member's experience.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Increased awareness about this global challenge

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Fostering inclusion and Better governance

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Lets make requirements To Ensure plurality

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Autonomy

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Please involve as many (and plural) actors as possible

The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

relevance in the topic of AMR, as researcher or member of private sector

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

best practice guidelines

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Cameroon

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

AMR is a silent killer and will be responsible for thousands of deaths in the future if nothing is done to prevent it.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I think the group should also advocate for funds mobilization to support developing countries. USAID and CDC are the only partners support the Cameroon government for the moment.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

ok

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

An expertise in one of the following domains: decision makers, diseases control, clinicians, lab experts, pharmaceutics, academics in disease control, members of national or international organizations in charge of disease control etc.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

advocacy (for additional funds for AMR)

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Groups need to play more active role

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We also need the advice from experts in administrative organization.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

When you say: The Plenary Session will be attended by the Tripartite senior leadership, you are limiting participation. What about country representatives?

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Recognising the issue and commitment

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practice guidelines on sectoral level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

Germany

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

As environment is adressed as well, UNEP needs to be included.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

To reach all relevant private sector partners representing that sectors that affect/are affected by AMR, publication via Tripartite online channels might not be enough, as many specialised sectorspecific associations might not regularly receive Tripartite information. Representatives of relevant sectors should actively be contacted.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

commitment to combat AMR should not be a requirement, as the views of sectors/regions/stakeholders not committed are an important factor in AMR work.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

not only evidence and science, but also practical experience should be considered by action groups. only actions which are actually implemented by the relevant stakeholders will produce progress.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

practical guidance connecting AMR-related measures with other relevant activities and goals of the given stakeholder, e.g. pointing out economic benifit, wellcome side efects, etc. This kind of document needs to be sector- and region-specific.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

these cluster groups are excluding the sector/topic as relevant factor. To ensure a true One Health Approach, it should at least be tried to have voices of all sides (human, animal, plant, environment, producer, consumer, ...) should equally be included.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

UNEP should be included

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

No,

Please provide additional comments and/or suggestions in the space below.:

What kind of decisions should the platform make? Does it have any legal status? UNEP senior leadership should be included. The main role should be central area for debate and exhange of views.

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

The roles of the different players are not clear.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

The title includes communication with governments and stakeholders, the text only adresses communication with global players.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

befor generating global commitment on prudent use a sector-specific common understanding on what exactly is prudent use needs to be generated. UNEP needs to be included

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

A clear distinction of the work of this platform to the work of specialised global organisations like OIE, FAO, WHO or Codex Alimentarius is missing!. What exactly is the benefit of this platform justifying that those people working on AMR at a global scale should take their scarce time for yet another new institution?

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

Preparation of legislation to ensure prudent use, funding of research, participation in national, regional and global expert working groups

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Not sure,

Please provide additional comments and/or suggestions in the space below.:

the actual work and its benefit need to be clarified

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::

Government, sector animal and plant

Q26

If you have any additional comments or suggestions, provide them in the space below:

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

National AMR Focal Points

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Strong Networking in member countries

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The UNEP representative should be included

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

UNEP should be assigned a role

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Botswana

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Commitment to asssiting on combating AMR through either financial or in-kind contribution. Other kinds of committment can be acceptable such as engaging with communities, research or lay person articles, advocacy campaigns, school or varsity lectures...etc

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Public engagement, Private-public partnerships

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Should also be attended by the platform members

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

All institutions directly or indirectly involved in AMR commitment and control have to be included as stakeholders to this platform. The participants should have some professional or educational background in ATB functioning, usage and microbial Atb resistance.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

It would be useful to have some “successful story” of AMR multisectoral implementation, including coordination and management of different interest group

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

It is supposed to include decision makers

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

practical implementation of activities in all sectoral level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

need more description

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

In the process of developing this kind of program involvement of policy makers also important in implementation process

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I think it is better to include laboratory networking and harmonization in the objectives

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Involvement of different stakeholders is highly important since these different sectors are under different ministries and authorities

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

But with the agreement of the government authority of each country

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

But, under the agreement of Sri Lankan government authority

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

It is highly important to do all the actions under the regulatory mechanism and the respective authority of the country

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

All members of action groups should be nominated by the OIE/WHO delegate of the country who is the responsible person for implementation

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Agree with above actions. Sharing of technical know- how in laboratory activities and guide for harmonization of surveillance and laboratory analysis are also very important activities

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

How is about drugs importers and distributers

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

At least acknowledgement of their honorary service needed

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

communication should always be through OIE/WHO delegation

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Philippines

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Perhaps people who can practice knowledge management of relevant AMR materials could be included as well.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Information dissemination for the general public on AMR.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

agree with relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR, also, willingness to work collaboratively with other sectors

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Social and behavioural science/learnings, best practice (including laboratory) guidelines,

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

Representation should be from human health, animal health, food, plant, and environment. Although I agree with the 5 cluster groups above, how can you also get the One Health spectrum across sectors?

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

expertise in AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

publishing list of research needs; best practice guidelines

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Would be good to have proportionate representation from all groups

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

virtual meetings preferred

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

long-term targets could be more ambitious and specific

The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:
Goals and targets should try to be set, or even the development of legislature to encourage people to take action.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

I agree with the 'relevance to some aspect of the challenge of AMR'. Institutes that are directly implemented in potential links to enhancing AMR, institutes that suffer as a consequence of AMR, and education institutes that can aim to raise awareness of AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Emphasis on practical implementation of steps that can be taken almost immediately for groups to follow or specific legislature or financial penalties to encourage action.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

no

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

no

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

no

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Support the veterinarians in Kuwait

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practice of veterinary services

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

The association must be composed of elements who know the AMR or work directly or indirectly with it. There must be commitment, responsibility and engagement to fight AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

In addition to the aforementioned, monitor the implementation of the national action plan, promote the semi-awareness of AMR to different parties involved (human, animal, environmental), promote debates at the academic level, among others.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The proposed group should be more active mainly in promoting actions to combat AMR and in advocacy.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

It would be good to have more specific criteria allowing to rank the candidates e.g. by assuring the outreach of organizations, active role and experience in the antimicrobial resistance fight.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

One of activities of the Action Group can be brainstorming on the update of 2015 Global Action Plan including environmental aspects.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

UNEP is missing in the Steering Committee.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

The proposed targets seem to be very generic. They should be more concrete (for example update of 2015 Global Action Plan) that would help to easily assess them in the future.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The problem of AMR spread is extremely important for our country. We want to bring best practices and policies into our fight against the spread of AMR.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We are interested in involving all stakeholders to find ways to jointly combat the spread of AMR and strengthen cooperation.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We fully support Platform’s guiding principles.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Ok, man, as you wish.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We fully support this form of organization of the Platform. Each recommendation of the Platform should be supported by all experts of a particular cluster.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Both those who can share useful experiences and those who need new experiences should apply for membership in the Platform. First of all, it is necessary to involve representatives of national executive bodies that implement state policy in the field of health protection (in particular in the field of public health, infection control and infection prevention); and specialists in the field of microbiological research, hospital epidemiologists and clinical pharmacists. Also, members of non-governmental organizations should be represented, as they are highly motivated.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We fully support the vision for Action Groups.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

The problem of AMR spread has been mentioned at every medical conference for decades. Advocacy and information sharing is not priority work area of the Platform but should remain among the list of Platform's actions. Some of the most important tasks today are: - creation of a tool for assessing the consumption of antibiotics at the national level; - integration of regional level data with the national level; - expansion of the network of regional and national microbiological laboratories and active reporting on MDRO detection; - dissemination of training programs in the field of infection control and prevention (ICP) and Antibiotic Stewardship directly to health care professionals, pharmacy and laboratory staff; - making changes to legal documents in order to prevent the release of antibiotics without an electronic prescription.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We fully agree with the proposed Cluster Groups.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We fully agree proposed roles and responsibilities of members.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We support proposed role and constitution of the Platform's Steering Committee.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We support this decision.

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

We support the proposed structure of the Platform.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The recommendations of the Platform should be implemented by all members of the Tripartite Group and the governments of the participating countries.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Item "Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy" should be moved to the medium-term targets block.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

The Public Health Center of the Ministry of Health of Ukraine is a key executive body that implements public policy in the field of public health. The tasks of PHC of the MOH of Ukraine include: - development of draft regulations (orders of ministries) and submission of proposals and amendments to regulations (orders of ministries, laws of Ukraine) in the field of public health; - conducting epidemiological research and investigations; - conducting trainings for doctors, pharmacists, and laboratory staff in the field of IPC and Antibiotic Stewardship; - conducting a broad information and educational campaign among the general population on the prevention of infectious and non-infectious diseases; - development of tools for assessing the consumption of antibiotics at the national level; - development of assessment tools spread of AMR.

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Qualifications and association to appropriate organisation

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Mozambique

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

It will contribute to standardize the actions to be taken to contain antimicrobial resistance at the global level

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Interest in containing RAM through multidisciplinary actions

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Summary of most advanced countries in the implementation of activities and the most backward countries

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

It is a timely initiative if the war against antimicrobial resistance will be a success

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Information sharing is vital , bring all stakeholders perspective on board

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Very necessary

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

There must be a governing body/ overseer to guide the initiative goals.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Breaking the process in clusters will allow more to be accomplished in a specified time frame.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Interested personnel /stakeholder that is determined to stem the AMR scourge.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Thats the strategy.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

As stated above.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

No one will participate actively and follow guidelines if no money will be received.e

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Multi-prong approach should be used for tackling AMR.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The platform may also be a think tank to review some progress made and make important stakeholders' contributions.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

AMR is also an OH issue.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Significant interest in AMR and AMU issues, commitment to the same issues.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

The Action group should focus on how best to transform scientific/technical discussions on the platform to translational/action research, for example by bringing social science dimension into it and create societal ownership.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

But there should be inter-cluster interactions so as not to create silo approach, or there should be time to time fora for open discussion wherein each cluster will present updates.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

I will like to know where key steering and advisory groups on AMR globally fit.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Where should pulling together all the global thoughts and opinions on AMR under a united coordination platform fits?

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆ **5 - Fully**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Not sure,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
The structure and final clustering will determine to have geographical, disciplinary and sectoral balance.

Q26

If you have any additional comments or suggestions, provide them in the space below:

No

Philippines

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Has the ability to take action to combat AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

conduct of research on AMR

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Q6

Country:

Morocco

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The platform should also promote best practices

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The platform should be in different languages and propose materials in different languages

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Totally agree

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Totally agree

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

No comments

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Membership should be agreed by UN agencies representatives with advice of different countries autorities

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

No comments

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

To share training material including laboratory SOPs. May be videos sharing

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Each cluster group should have representatives of human, veterinary, plant and environment sectors

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

No comments

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

This will depend on how encompassing the platform wishes to be, balanced against the logistical challenge of managing a very large membership. It may be appropriate to specify types of organisation that would automatically gain membership and then outline criteria for other organisations to join. It is assumed individuals would not be eligible for membership unless there were special reasons to do so. There also should be strong commitment to attend and contribute at meetings.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

• Infection prevention and control – best practice and exploring for novel methods to implement IPC. They need to also take into account the resources and situation in different countries or regions, a one fits all approach is not appropriate. • Surveillance in all sectors including collection of AMU data • Economic analysis of the impact of AMR in the agricultural sector

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It would be useful to have a cross cutting mechanism to minimize silo approach by each cluster group.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

How often will the membership and leads for each cluster be reviewed?

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It is assumed funding to attend the meetings will be at members own expense

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Not only to take action but to share informations on successes and failures. To facilitate accountability by making available information on actions being taken, etc.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The AMR agenda would benefit also from incorporating a broader approach of sustainability - how can we live healthy lives in a sustainable way? how can we live and interact with this planet in a sustainable way? what are the sustainable ways of ensuring our continued well being?

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

organisations active in the field of AMR or those who are impacted by AMR should be represented.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

agree with all of the above. Also mobilization of patient groups to promote awareness and change.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Also an online platform for sharing information?

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

long term targets could also include advocacy for WASH infrastructure, appropriate use of other tools such as vaccines, development of new drugs, etc

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

I'm interested to know result of researches on AMR

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Members should agree on the commitment required for each members.r.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Harmonization and sharing of laboratory protocols in conducting AMR researchers.ng AMR

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It would be important to reduce layers of groups in order to minimize complexity of the platform.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

- role in AMR work at any level; - interest, relevance, mandate and commitment to contribute to the implementation of GAP and/or NAP; - direct and indirect contribution to the emergence and/or impact of AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Need to ensure synergy and linkage of these AGs with existing technical platforms such as the Codex Alimentarius, etc.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

-Action planning; - Standardization of actions; - Guidelines; - Monitoring of implementation

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

What would be the role of cluster groups, which is different from the AGs? Need to critically reflect in order to avoid multiplicity of sub-groups under the platform. Maybe it would be better to keep them as administrative groups.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

May need to clarify linkage between clusters and AGs.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. SWEDEN

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:
The objectives are relevant, but the concept of "stakeholder" is so broad and inclusive that it is difficult to assess whether the goals can be achieved. Evaluation of the objectives might prove challenging.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes. It is important to protect the platform's openness and independence in its daily work, discussions, and proposals.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It is very positive that the membership includes such variation of sectors and disciplines. It is important to have structures in place to ensure proportionality of influence, so that the focus on issues impacting human, animal and environmental health is maintained . Also, geographic and economic representativeness is important and any imbalances in the GLG and IPEA should be compensated.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Important to ascertain balance in geographic, gender and economic representation, as well as between private, public and non-governmental organizations. The precise requirement for membership is complex but should be elaborated with this goal in mind. Clear and transparent recruitment procedure is important.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The above description is more of a work plan than a vision, which is why a vision should be developed. In addition, a clarification is needed of how members will participate in the different action groups. Will members participate in their own capacity or as representatives of their cluster group or both? Please clarify how proportionality and balance will be maintained in the groups?

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best to let the specific actions develop with time, based on the knowledge and competence of the group and allowing their actions to be adapted to the needs of the situations. Engaged people create successful action.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Please clarify the meaning of administrative role. It may be useful to divide the participants in different ways depending on the topics discussed. It is important that there are structures in place that facilitates communication between the groups and sufficiently dynamic to allow for action. In order to structure the work of the platform, the groups could be sorted under specific themes such as for example the ones highlighted in the GLG action plan.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Important to have a broad representation at the meetings, economic status should not be a factor. Sweden recommends that support for the groups should be possible ad hoc based on needs in emerging situations. Disclosing budget details and the like, is probably not possible for government stakeholders.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Important to secure geographical, gender and economic representation in this group.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
Please clarify relation between cluster group and action group (in both text and figure). Is the relationship between the Tripartite and the Platform as horizontal as the figure suggests?

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Some of the targets are goals rather than targets, clarify. If targets are used, it is important that they are reachable. Indicators are useful to include in planning. Suggestions: Attract over 200 members representative of different stakeholder voices, of different economic status and a balance across regions globally; Build upon the already existing global momentum and generate high-level advocacy to combat AMR; multi-sectoral one health approach; Generate global commitment to use antimicrobials in a responsible and prudent way, to prevent spread of infections and to develop new treatments, diagnostics etc, to ensure that antimicrobials will keep their efficacy;

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**5 - Fully**
Please provide additional comments and/or suggestions in the space below.:	NAP and measures in place

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below:: Government representatives

Q26

If you have any additional comments or suggestions, provide them in the space below:

A big challenge will be to get a united movement forward with so many different stakeholders diverging agendas and priorities on the table. The survey respons is a joint response from relevant Ministries and state authorities.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

We suggest to include in the description of the purpose that the platform is not only for Global level actors but also it would like to encourage the participation of regional/country level stakeholders to ensure that context specific needs are visible. Besides, the purspose should enphasize that the stakeholders shoul include those working woth AMR specific and AMR sensitive topics. The latest group has not been given high priority in other forums/platforms.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We would like to propose that in the item “Information-sharing and networking” the following sentence is added: meaningful consultation. Meaningful consultation means that the information sharing implies bi-directional communication with regular feedback on the final decisions and the reasons to choose the selected course of action.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Please include in the description of transparency and open access the implications of meaningful consultation explained in the previous question. Bi-directional communication to ensure Please emphasize in the item “inclusivity” the importance of balancing the voice of AMR sensitive and AMR- specific working groups.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

a) it should mention the quatripartite (UNEP), b) The accountability principle should include internal and external accountability with detail description of the procedures to ensure transparency.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Please add in the description: a) membership is open to groups owrking on AMR specific and AMR sensitive issues, b) The media can join, c) The call for membership should be accompanied by commitment for short term actions.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

To qualify as a member the groups must demonstrate experience working on solution to solve AMR sensitive and/or specific challenges.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

No,

Please provide additional comments and/or suggestions in the space below.:

Greater clarity is required here. Stand-alone roadmaps from several different action groups may lead to AMR action fatigue & should be consolidated/align with & not duplicate efforts of the tripartite & countries, either individually or collectively. Space for members to put forward topics facilitating a bi-directional communication. How to secure the effective working process of these action groups?

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

This does not align with the purpose of the Action Groups mentioned above where emphasis is placed on roadmaps which implies incremental progress towards pre-determined goals. Action on topics/sub-topics should be unpacked/clarified in the context of the envisaged roadmaps. Furthermore, the groups should be the one bringing new or relevant topics not considered by formal bodies.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

These are key stakegolders who must have a voice. They should thus be active participants and not merely administrative groups. Each of these clusters shoud be able to weigh in on any work of the Action Groups to ensure that their perspective is heard and included as appropriate – gives meaning to inclusivity

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

Please include that members should declare conflicts of interest, and specify the conditions for the coverage of travel expenses for onsite meetings.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

Priority setting should be a collective exercise & not the sole view of the Steering Committee whose main function should be overarching oversight and monitoring progress against agreed strategic and general workplans. The Steering Committee should be guided by a log frame and theory of change approach with milestones and process & output indicators

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

No,

Please provide additional comments and/or suggestions in the space below.:

Please include in the description the words: consultation, adaptable best practice.Furthermore, after "convergence" add the explanation "taking due cognisance of differentially resourced One Health systems". Finally, this is a very large group for the nature of activities to take place once a year. The agenda will have to be very structured with extensive pre-plenary preparation by members.

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

Include the reporting line of the Steering Committee. UNEP is glaringly omitted

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Communication should be bi-diectional, from the Platform upwards & from the GLG, IPEA, TJS etc downwards.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

Medium term targets resonate with the ToR of the GLG & IPEA as well as country-level NAPs. The ToR of the platform must be distict & not duplicative. Is the platform meant to be the operational arm of the GLC & IPEA? We again caution against a proliferation of action plans – action plan fatigue. How to the roadmaps align with the GAP and tripartite-specific action plans?

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

None

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

ability to take action to combat AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

practical implementation of activities at country or sectoral level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q5

Type of organization:

Government representatives, UN agencies, intergovernmental and regional organizations

Q6

Country:

Japan

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Relevance to some aspect of the challenge of AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practice guidelines

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Membership qualification should require expertise in at least one of the relevant AMR sectors (human, animal, plant, environment), with ability to take action to affect needed change.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Yes, all of the above.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

The Cluster Groups should have required qualifications to be experts in AMR from their specific areas of focus. Otherwise, guiding actions would potentially be led from personal perspective without scientific basis for need or realistic basis for ability to fix/change/improve.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Caution: This seems like a lot of responsibility for the Chair, so need to provide good amount of admin/support that the Chair can use/rely on.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
From explanations provided above, yes, proposed structure seems appropriate. If there was supposed to be an image to open, that didn't work for me.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,
Please provide additional comments and/or suggestions in the space below.:
I think the above makes sense. I am a little unclear of the role of the IPEA.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,
Please provide additional comments and/or suggestions in the space below.:
I would suggest making the "Generate" statement much broader and stronger than just prudent antimicrobial use. I would include: global commitment to control inappropriate access to antimicrobials, so only through certified professionals (e.g., clinicians, veterinarians), to implement strong infection control/biosecurity practices across one health sectors, to clean up waters and institute appropriate sanitation globally and set needed regulations to maintain, and to work on maintaining health of humans, animals, plants, the environment in the first place so infections are avoided and antimicrobials are needed less.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

4 - Actively

Please provide additional comments and/or suggestions in the space below.:

As much as absolutely possible, on a regular growing basis, from the space we are responsible for, and with the funds, people, and collaborative relationships we have at any given time.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,

Please provide additional comments and/or suggestions in the space below.:

I would be very interested in being a part of this large collaborative effort, to more wholly and intensively address AMR across the globe and One Health.

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::

As part of country government and scientific AMR expert leadership.

Q26

If you have any additional comments or suggestions, provide them in the space below:

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Knowledge in the area of AMOR and One Health. Have an interface with the National Action Plan. how should membership be agreed: Have a plan with objectives, strategies, execution plan and execution forecast.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Appropriate proposals for the Unique Health theme, with a scientific basis. Proposals must also consider the relevance of AMR as state policy in countries. The documents must integrate the various sectors related to AMR.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

Representantives of the GLG should also be part of the Steering Committee, and, considering the One Health approach, there has to be in place some kind of a mechanism that guarantees balance and representativeness of the different sectors in the Steering Committee, when choosing the leads from the Cluster Groups and the Action Groups

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

The Netherlands

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

No,

Please provide additional comments and/or suggestions in the space below.:

A platform bringing together stakeholders with the purpose of facilitating de exchange of best practices and sharing of experiences seems relevant. Nevertheless, duplication should be avoided. The platform should focus on bringing together stakeholders with the objective of strengthening the implementation of GAP and other relevant international agreements. The objective of the platform should not focus on the development of a new shared global vision. It is very improbable that such a group may achieve consensus on key elements of a global vision on AMR and this may affect the effectiveness of the platform.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

No,

Please provide additional comments and/or suggestions in the space below.:

See answer Question 7. Trying to agree on a shared vision may be not possible (divergent opinions). This may affect the effectiveness of the platform and the level of ambition. It seems more adequate that the platform primarily focus on engaging stakeholders to support the implementation of the GAP and other relevant International agreements.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We consider important that the platform attempt to reflect different positions, but the aim should be to advance on the implementation of the GAP and other relevant international agreements. See answer to questions 7 and 8 above. The relation with the GLG and IPEA should be clarified. The GLG and IPEA should be independent of the platform.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

The platform should also be accountable to the Ex Director of the UNEP, as member of the Tripartite plus.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Preference should be given to action groups, which may be underrepresented in other fora. For example, patient associations, civil society, NGOs., animal sector organisations, etc. Regional representativeness should be ensured. Official recognized/ associations representing sectors or professionals should be preferred above individuals, companies, individual academic institutions, etc.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Recognise commitment and ability to take action to tackle AMR is essential. Members should commit to catalize and drive action to tackle AMR. Recognised stakeholder status e.g. by registration in relevant UN or regional organisations. Individual companies should be excluded from membership. Consider the possibility of "observer" status.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

No,

Please provide additional comments and/or suggestions in the space below.:

Membership in a specific Action group should have as objective catalyzing action to achieve the objectives rather than hinder action. The last part of the activity of the Action Group is not clear and should be better described: “Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.”

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

The action should be limited to information sharing, and (advocacy for) practical implementation of best practices. The group should avoid practical work and should refrain from developing guidelines. These activities are the responsibility of other well established and recognised organisations, such as UN organisations (FAO, Codex, WHO, etc.).

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

The clusters may also be defined based on the topic. Add the possibility of participation at the platform as an “Observer” status, as to ensure more engagement and facilitate the practical work.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

Which is the difference between meetings of the platform and plenary sessions? Difficult to foreseen, it may also depend the number of stakeholders involved. The possibility of the status of member vs observers should be considered.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

The platform should be a network for exchange of views, etc. so no need to institutionalize the group with such a "heavy" structure. This may need additional resources, increased funding due to additional cost for a secretariat, meeting organisations, travel expenses, etc.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

No,

Please provide additional comments and/or suggestions in the space below.:

The groups may work independently No need for physical meeting, as this may increase considerably the cost of the platform.

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

See comment above not to create such a “heavy” structure. GLG and IPEA should be independent from the Stakeholder group.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

No, the platform should be a more informal network group.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

The goals should be linked to the outcome of the GLG and IPEA. Only short- and medium term goals seems relevant. Why the target “Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy” is a long-term, 10-year goal? This is in contradiction with the urgency of the GLG message and the messages of the UN resolution of 2016, Call to action 2021, etc.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

The financing of the platform should be described and agreed before launching it.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆ **5 - Fully**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,
Please provide additional comments and/or suggestions in the space below.:
Probalby yes, but this should be discussed at national level, between ministries involved

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below.:
This requires more discussion at national level between ministries involved.

Q26

If you have any additional comments or suggestions, provide them in the space below:

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Do the objectives of The Platform lead to the development of AMR policies and do the member states need to comply with the policies that have been developed?

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

We are somewhat satisfied and we would like The Tripartite to elaborate more details as follows: a. What are the conditions imposed to be accepted as a member? b. How The Tripartite make membership selection according to the geographical balance? c. How many memberships entries per country consisting of authorities and stakeholders?

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

We would like to suggest that the authorities of each country identify and recommend stakeholders who are committed to working together in addressing the problem of AMR in the country to become members of The Platform

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

We would like to suggest the following actions: 1. Development of guidelines, manuals and standards. 2. Organize training to members on AMR awareness, AMR surveillance, AMR risk analysis and management, AMU and laboratory

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

We are agreed that the cluster group should have more active roles. We would like to ask The Tripartite to define and detail out roles and responsibilities of each administrative groups and how they carry out their roles.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

We do not agree with that proposal. The Platform should consider in providing daily allowances to its members who participate in meeting.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

We would like to know to what extent the member states should comply the policies developed by The Platform.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

4 - Actively

Please provide additional comments and/or suggestions in the space below.:

DVS is actively involved through One Health approach with various agencies and stakeholders in addressing the AMR issues with the establishment of the National Antimicrobial Resistance Committee (NARC) and the implementation of the Malaysian Action Plan on AMR (MyAP-AMR) at the national level.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Not sure,

Please provide additional comments and/or suggestions in the space below.:

a. We would like to have more details on the implementation of The Platform and its benefits before taking any decision to become a member b. We would also like to know if there are any pre-requisites to the authority (government) and stakeholders for The Platform membership?

Q25

Not sure

Do you identify yourself in one of the clusters? (optional Q)

Q26

If you have any additional comments or suggestions, provide them in the space below:

We would like to suggest that the findings of this survey should be published and presented by The Tripartite to through a virtual platform and at the same time hold engagements session with member states

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

• The key role of the Platform is to bring in the private sector and civil society for clear added value. Important to have clear objectives, metrics and milestones for action delivery. • Bringing together multiple stakeholders across One Health to demonstrate a coordinated, multidisciplinary approach at the highest level is a welcomed move forward. It is important to find a way for this best practice approach to be emulated in other areas, such as research, which can be impeded by siloed working. • The Terms of Reference should clarify the precise role of the Platform and how exactly it will interact with the other global governance structures and add value. • UNEP should be included. • The Platform should – where possible – learn from and take the best from existing examples of cross/inter-sectoral partnership working, particularly those managed successfully by FAO, which has a track record of managing the tensions and trade offs when bringing the private and third sectors together on issues of global concern.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

• We would welcome greater clarity on how, in terms of providing a platform for information sharing, the Platform will differ from similar groups that already exist. For example, the Global Health Security Agenda AMR Action Package, which brings together member states and the private sector roundtable. • The objectives need more specificity about how the Platform will contribute to NAP implementation, for example, making NAPs achievable and relevant to context, with an underpinning of data on antimicrobial use and resistance. • A key objective to include is on proactively uplifting work on the less developed sectors focused on plants and environment. These are often under-funded and research gaps remain, so this forum could be a valuable space to influence the prioritisation of these agendas. • The terms of reference would benefit from greater clarity about how these objectives will be achieved. What are the concrete activities that the Platform will carry out? Will this approach recognise that priorities will differ in different places of the world and in countries with different income levels, and how will those differences be tackled?

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

• We welcome the principles of transparency. We would welcome online publication of all the Platform’s products (and would appreciate further information about what these will be), including major documents, decisions and worked examples of how to implement NAPs and open access to any academic publications. • The principle of inclusivity is also positive. But, apart from highlighting that settings and priorities differ, how will these differences be tackled?

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

• UNEP should be included in the accountability process; otherwise, how the Platform cannot be accountable on environmental issues.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

• We would welcome greater clarity on how the Platform will facilitate and enable fruitful and interactive discourse in the Action and Cluster Groups. • Relevant parties that develop policy but do not sit in any of the named types of organisation should also be included. For example, National Public Health Institutes should be included as members: they often have complicated relationships with government and do not always sit within the remit of health ministries. • Patients and 'AMR survivors' should also be included. • Calls for membership beyond the Tripartite's existing online channels could add value through engaging underrepresented sectors / organisations, including but not limited to smallholder farmers, healthcare professionals and patients in low- and middle-income countries. • Overall, the platform should prioritise convening voices that are not normally heard and/or sectors that do not normally work together on the issues of AMR governance. To this end, we recommend reversing the order of suggested participants, putting member states, UN agencies and other IOs at the end rather than at the beginning of the list.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

• Participants would need to have a) input into dialogue at a regional or national level b) ability to take learning back and enable local NAP delivery. • There could be requirements to encourage active participation from members. For example, membership requires participants to present on an idea/topic, share resources, share findings to GLASS; ideally an active contribution that benefits the overarching objectives of the Platform. • There should be a mechanism to ensure rotation occurs so that less frequently heard voices are given a chance to influence.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

• We would welcome greater clarity on how the topics and subtopics will be divided and prioritized. And also on the accountability of these groups, how they interact with National Public Health Institutes etc, and what their legal standing/authority would be. • Needs structures in place to ensure that the range of stakeholders is as diverse as possible and that best practice examples from countries, organisations and sectors are shared from a wide variety of settings.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

• Information sharing of practical implementation of NAPs, including mainstreaming of activities to address AMR through other, complementary initiatives. Development and promoting of policy level guidelines, awareness raising of AMR as a global issue, open access to data and information.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

• Membership should be representative of a range of country income levels, allowing for open and active discussion about the difficulties faced in implementing NAPs in countries with minimal resources. • Having these Cluster Groups remain as administrative groups rather than a more active role may help to ensure the governance of the Platform remains streamlined and straightforward. • We would welcome seeing participants in these Groups who are newer to the global AMR conversation, rather than the same faces. • It should be noted that without the active participation of UNEP in the Tripartite Joint Secretariat, the environment element of the ‘One Health’ interface will neither be properly represented nor accurately ‘monitored’ as per the current proposal, which is based on the involvement only of WHO, FAO and OIE.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

• We would welcome greater clarity on the responsibility or accountability of members to contribute to the year-round preparations of the documentation, data and other evidence for the Plenary Sessions, as outlined in question 7. • Agree that members should disclose details of their legal status, governance, membership, sources of funding and activities, and also wider potential conflicts of interest.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

• We would welcome greater clarity on how the Steering Committee will set priorities; we recommend they go out to consultation to understand priorities from members. We would also appreciate clarity on the legal standing of the group and its recommendations to the Tripartite Plus. • There should be co-chairs, or sub co-chairs, to ensure that the leadership is representative across sectors, gender, geography, country income level, etc. Representation across these areas should be taken into account in the rotation, as well. • It is not clear what the length of service will be for other members of the SC beyond the Chair. This should be clearly noted and rotation built in as a default. • The Platform steering committee should have a representative from UNEP, alongside the traditional 'three representatives of the Tripartite'. Without their involvement, this Platform cannot be truly deemed 'One Health'.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

• Further information on the frequency of the Plenary Sessions would be useful. It is important that information and resources are shared readily through the Platform throughout the year to enable up-to-date research and tools to be shared regularly. • Further information could be provided on how much resource will be required of members to participate in the Plenary Session. A concern is that if the Plenary Session is too resource heavy it might dissuade members from more active participation. • Need more clarity to see how useful this will be, and if attendance is limited, who is chosen and why, and how it will be ensured that outcomes are fed back into appropriate national and regional systems. • We would welcome further information on the logistics of the plenary session, including length, frequency and how outcomes will be fed to Tripartite Plus DGs and the governing bodies of the individual Tripartite Plus organisations from an accountability perspective.

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

• The Platform should feed directly into the Global Leaders Group, not via the Panel (IPEA), • UNEP should be included alongside FAO, OIE and WHO. • The nature and direction of the relationships should be indicated via arrows. • National Public Health Institutes should be specifically called out in the list of members.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

• The conclusions of the IPEA should be communicated with as wide of an audience as possible. • We would welcome further clarity about proposed outputs of the Panel.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

• The Platform should be more ambitious and strive for more concrete and tangible long-term targets, in keeping with other UN/WHO goals, e.g. on HIV and TB. Perhaps aligned with the sustainable development goals, or other clear milestones and indicators. • A long-term objective across on the join up across human-animal-plant-environment and a multidisciplinary approach should be included. • We would welcome further clarity on how progress against objectives will be assessed, including assessment of maintaining momentum and course correction for the Platform where this might become necessary.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

It would be beneficial to set out how this Partnerships Platform would work with other multi-party funds or platforms (for example the MPTF). It will be important that this is initiative increases alignment and doesn't simply add to a crowded space with lots of mechanisms set up, but rather works to tackle duplication and increase collaboration. The Platform should be seen as a key opportunity to hear and learn from voices who are not normally heard elsewhere and actively demonstrate how and where it sits in this crowded space.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆ **5 - Fully**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below:: Yes - Government representatives, UN agencies, international, intergovernmental and regional organizations

Q26

If you have any additional comments or suggestions, provide them in the space below:

No further comments.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:
Should be clearly identify

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

To be recognized and nominated by CVO

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Member with relevant expirience, scientific knowledge background and nominated by CVO

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

best practice guidelines draft

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes for the first part of question. Cluster group should be maintained as administrative groups with possibility to delegate them if necessary

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

have to be quite clear what responsability will be expected in the future regardig the fundings, legal status or other activities when joined the Platform

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

maybe to be consider having the Planery session in the time when OIE general meeting is organized

Q19

Do you think the proposed structure is appropriate?

No,
Please provide additional comments and/or suggestions in the space below.:
Not clear who is Global Leader Group and Independent Panel of evidance for Action and what are they responsibility, not clear explanation in the text, aslo for Coordinating Team and TJS on AMR the same

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Please see coment under question 19

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,
Please provide additional comments and/or suggestions in the space below.:
to be regularly updated and review

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

ability to take action

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

/

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

/

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

/

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

/

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

/

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

/

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

/

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

/

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

/

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

Organization/entity:

The Danish Veterinary and Food Administration

Q5

Type of organization:

Government representatives, UN agencies, intergovernmental and regional organizations

Q6

Country:

Denmark

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Requirements to qualify for membership should include the opportunity of broad collaboration across sectors, and at the same time be balanced in relation to being able to take action.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Information sharing could be one action useful to be taken forward by Action Groups. For instance sharing of best practices, projects, reports etc. within a given topic that could lead to further discussions in a Cluster Group.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We agree with the proposed Cluster Groups, however we believe that they should have a more active role rather than be administrative groups. Administration of the Cluster Groups could lie within the Action Groups.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We agree that members should participate at an adequately high-level of their organizations, but that Action Group and Cluster Group members/participants should be at an adequately high and specific professional level within their field of work.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

"Cluster Groups" could be added as a heading to the green box on the left side.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

requirements: knowledge about and relation to AMR challenge; relevance considering the need for a One Health approach, balance and inclusiveness; how should membership be agreed: through a signed term of agreement which includes the goals of the Platform, benefits, expectations, rules and guidelines (such as responsibilities, participation requirements, restrictions, privacy policy, among others).

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

it is important that the actions proposed have an adequate balance considering the One Health approach and are scientifically supported to be relevant to mitigate AMR; documents prepared by the Action Groups should address different sectors and organizations involved in the AMR challenge

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

Representantives of the GLG should also be part of the Steering Committee, and, considering the One Health approach, there has to be in place some kind of a mechanism that guarantees balance and representativeness of the different sectors in the Steering Committee, when choosing the leads from the Cluster Groups and the Action Groups

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The platform should be open to as many stakeholders as possible. Geographic and sectoral balance is important, however, stakeholder should not be excluded from the platform because of the lack of balance. The balance should rather be achieved through the composition of the Action Groups.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

See Question 11. A prerequisite for participating in the platform should be the possibility of taking measures in one's own area (country, sector,...), i.e. being able to contribute in some way to the implementation of the GAP.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The action groups should orientate themselves on the GAP with the aim of advancing its implementation. At the same time, it must be ensured that the solutions developed are sufficiently differentiated. For example, there are differences between HIC and LMIC in terms of the problems to be overcome. Who is deciding on the number of Action Groups and the topics they work on?

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

The exchange of information should be an important task of the platform, which should not be limited to the Action Groups but should also take place in the Cluster Groups. An important task of the Action Groups could be to find concrete solutions to existing problems, whereby best practice examples should be taken into account. When selecting the areas of work, the recommendations of the GLG and the findings of the IPEA should be considered.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

For general comments on the membership see answer to question 11. We see the cluster groups more as an administrative group, e.g. without own work plans. Activities should from our point of view primarily take place in the action groups, unless aspects are addressed that specifically affect individual cluster groups. However, existing networks (e.g. of government representatives) should be taken into account in order not to cause duplication.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

With the proposed composition of the Steering Committee, the number of action groups (three) is anticipated. Shouldn't their number be kept open? Individual action groups might only deal with a specific topic for a shorter period of time.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
In general we agree with the proposed structure. However, UNEP has to be involved in the platform und should show up somewhere in the graphic. See question 17 on the number of Action Groups.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,
Please provide additional comments and/or suggestions in the space below.:
The general population should be taken into account in the communications strategy and informed about conclusions and evidence for example via social media channels.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,
Please provide additional comments and/or suggestions in the space below.:
The targets are not very specific and do not stand out sufficiently from the targets of other groups and bodies on AMR. The added value for participation should be emphasized more strongly - e.g. how existing networks and their work (e.g. EU networks, GHSA) can be integrated into the platform. The roadmap under the long-term targets should be drawn up earlier, not only after 10 years.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**5 - Fully**
Please provide additional comments and/or suggestions in the space below.:	Germany is implementing its national One Health AMR Strategy, the “DART”.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below:: Government

Q26

If you have any additional comments or suggestions, provide them in the space below:

no

Switzerland

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

One should be careful not to multiply the working groups. In addition, the format of this platform needs to be clarified.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The objectives are very relevant. Considering the current discussion within the Codex Task Force on AMR, I think this will be very difficult. If it can be achieved, it would really be a break-through. But how binding will this be?

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes, that makes sense. However, the UNEP should be welcomed. This is in the spirit of the "Tripartite plus".

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

See comment above on "Tripartite plus". In addition, the aspect of animal welfare should not be forgotten.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

We think relevance and commitment besides the ability to take action are the essential parts.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

How will the proposed actions fit into other activities at international level? Duplications should be avoided.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Practical implementation and information sharing.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

Environment and animal welfare interests should also be represented in the Steering Committee.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Statement based on the graph in Word format of the survey.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Targets should be revised once the Platform is operational.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Common topics and common strategies to start with

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Practical activities at country level as an initial step

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Organization/entity:

National Food Safety Agency

Q5

Type of organization:

Government representatives, UN agencies, intergovernmental and regional organizations

Q6

Country:

Republic of Moldova

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

List of national stakeholders should be endorsed by CVO

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Share documents, guidelines, National AMR Plans etc.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The Cluster groups should be maintained as administrative groups.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**2 - Slightly**
Please provide additional comments and/or suggestions in the space below.:	There is a draft AMR. But technical assistance is needed to review and implement the national AMR Plan.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below:: Government department with responsibilities for animal health, food safety and animal food and feed production.

Q26

If you have any additional comments or suggestions, provide them in the space below:

Malaysia

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

CGIAR AMR Hub and the new CGIAR One Health Initiative will embark on similar work in close partnership with countries and international organizations like OIE, FAO and WHO

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Supporting LMIC to develop and operationalize AMR and OH strategies and action plans will be very essential

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

food producers especially small scale producers often get blamed for irresponsible use of antimicrobials. The role played by various supply chain actors and policy makers in not fulfilling their responsibilities in facilitating prudent use of Antimicrobials is often not mentioed.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

But must ensure national governments and their CAs are also accountable

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Views of primary producers, front line health workers, supply chain actors must be considered

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

must be mainly commitment and ability to take action and having access to all the knowledge and resources to do it

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

WorldFish, CGIAR AMR Hub, CGIAR Covid Hun, CGIAR One Health Initiative would be interested in the action group work and also willing to contribute

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

best practice, stewardship, research and development, working with national partners

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

WorldFish, CGIAR will be interested and can contribute to AMR and one health issues from a Aquatic food systems perspective

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Members to be allowed to share outcomes of their research and development activities - in our case from an aquatic food systems perspective

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

showcase success models of novel interventions to combat the impact of AMR

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

consider the need for food system transformation within planetary boundaries and give importance to all food systems. Often aquatic food systems get left out conveniently though it has the potential to offer solutions to global food systems transformation.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**4 - Actively**
Please provide additional comments and/or suggestions in the space below.:	WorldFish is my organization. Implementing AMR and OH projects, part of CGIAR AMR Hub and CGIAR Covid Hub, part of the OH initiative of CGIAR

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,

Please provide additional comments and/or suggestions in the space below.:
have been actively involved in this area of work for several years from a aquatic food systems perspective. Have worked closely with FAO and OIE on aspects of aquatic animal health and AMR. Implementing projects in partnerships with key institutions like Cefas UK, RVCL, ICAR, etc. Actively involved in supporting Fleming Fund OH projects and programs

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
better practices to reduce AMU, systems thinking approach to understand drivers for AMR emergence, development of novel interventions including social behaviour change communication.

Q26

If you have any additional comments or suggestions, provide them in the space below:

Happy to share our work and published literature on OH and AMR from an aquatic food systems perspective

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

We agreed with all the examples described. No other comments.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

[redacted]

Q4

Organization/entity:

USDA APHIS Veterinary Services

Q5

Type of organization:

Government representatives, UN agencies, intergovernmental and regional organizations

Q6

Country:

United States

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The objectives of the platform are relevant, though I have concerns about the word "targets" in the first objective. Targets seems much more specific than a shared global vision and narrative, and targets are likely to vary by region and sector. There is also no mention of how to take action when there are conflicting viewpoints on the best approach.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Applaud the multisectoral and multidisciplinary systems approach. While transparency and open access are important, confidentiality of certain sensitive information is also critical for gaining access to data.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

What happens if there are differences of opinion of different Directors-General? How will different financial investments in addressing AMR across sectors be accounted for (for example, less money directed to addressing AMR in animals than to addressing AMR in humans).

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

Still somewhat confused about membership - who ultimately decides on members? It is mentioned that geographic balance will be ensured, but what about balance among the various stakeholder groups?

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

It seems that if one of the guiding principles is transparency, then membership should be open.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Biggest concern about action groups is duplication with work in other fora and limited resources available for participation.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practice guidelines are helpful, as are practical implementation of activities. The Action Groups should determine their own types of action that they believe will be useful.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

Concern about the proposed clusters as they are more about type of entity rather than the work that they are involved with. For example, private sector partners could include a private hospital system (human), a private veterinary clinic (animal), as well as a private waste management company (environment), all with different areas of focus on the topic of AMR. Perhaps clustering by sector would be more useful, though this would limit the cross-sector engagement desired by the Platform.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Still a little unclear - for government agencies, are members of the Platform individual people? Or specific agencies working on AMR?

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

Not sure why the SC is limited to 5 cluster group leads and 3 action group leads - these numbers should depend on the total number of cluster groups and action groups so that all have representation on the SC.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Needs additional context as the Plenary seems to be different than all of the rest of the entities.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Overall concern about duplication with other entities, such as the Transatlantic Taskforce on AMR, and limited resources (human and financial) able to be contributed to the Platform.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

Please provide additional comments and/or suggestions in the space below.:

The Intellectual Property Rights (IPR), Health and Safety Program of the WCO maintains its resolve to protect consumer health and safety and continues to combat counterfeiting and piracy through a variety of activities. The WCO's main activity is to raise awareness about Customs work in this area with towards other international organizations and by promoting capacity building activities for our Member administrations. The capacity building consists of two main components; training through workshops and education and training through operational activities, such as; Operation STOP I, operation PANGEA, online workshops and training activities, e-learning module etc.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Relevant to AMR aspects

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Specific intervention depends on situational analysis

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Government representatives, UN agencies, intergovernmental and regional organizations

Q6

Country:

Republic of Armenia

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Commitment and ability to take action to combat AMR globally.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

practical implementation of activities at country

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Involve NGOs focusing on AMR stewardship

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Different approaches to fight AMR equally represented (surveillance, reducing inappropiate use of AB, political commitment, infection prevention in care settings, development of new AB)

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

practical implementation of activities at country level, advocacy to change behavior and (national) guidelines

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

I don't understand the practical role and added value of cluster groups, other than ensuring equal representation. Maybe don't use this term?

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Make medium-term targets more specific as soon as platform is established. What are the actions that are most needed, how to organize advocacy on all levels?

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**4 - Actively**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below:: Government but also research institution (national institute for public health and the environment)

Q26

If you have any additional comments or suggestions, provide them in the space below:

no

Country:

Republic North Macedonia

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The multisectoral approach is important

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The multisectoral approach is important

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The multisectoral approach is important

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

In the platform should be included associations of primary food producers, associations of societies and public organizations engaged in the treatment of humans, animals and plants against diseases, competent authorities involved in policy making and control over the implementation of measures for the protection of human, animal and plant health and the protection of environment, post primary food producers, academic institutions and laboratories

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

I agree with the proposition above

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Within the cluster groups, some of the activities of the action groups related to the respective cluster could be performed.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Australia

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

We suggest including a statement to differentiate it from existing AMR stakeholder structures to make it more attractive to potential participants. For example, is part of its purpose to work in partnership to recommend practical ways to implement the GLG/IPEA action plans or elements of the GAP? Would linking it more closely to the action plan of the GLG and/or giving it a solutions-focused mandate provide it with a greater degree of ‘authority’?

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We suggest consideration that this group could provide practical advice on how the GLG recommendations/action plan can be implemented on the ground, barriers and the flow-on effects; and provide advice on who would be responsible for implementing elements. ‘Taking action’ should be highlighted as the first objective and changing the first objective name to ‘Promotion of shared vision’ and moving to the third objective.

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

This could also include a principle on 'solutions focused'. The Platform will provide opportunities for stakeholders to contribute ideas that can result in change.

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

The Platform needs to be differentiated from other AMR stakeholder forums and have an active role in identifying and implementing practical actions – i.e. not be just an engagement/discussion structure – with authority through being clearly connected to the work of the GLG; perhaps through its SC Chair being a member on the GLG itself.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Agree this should move beyond the usual players and involve those currently under-represented, especially in the government (countries) sphere, and should be substantially focused on the civil/private sector stakeholders. Care is needed to ensure government representatives do not duplicate those involved in the GLG. Suggest including the Steering Committee, its role and proposed membership.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

While acknowledging this suggestion may result in a very large group, it should be open to all stakeholders with a role in AMR who wish to be involved, with the commitment and ability to take action to combat AMR, to meet the 'inclusivity' principle. It would be unfortunate to limit participation based on defined criteria that could inadvertently exclude important experiences/views/ideas that could shape new thinking.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

To ‘drive actions’ is key.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Development of targets. Practical implementation of approaches and activities at the country or sectoral level. Identifying barriers and develop ways to overcome them.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

This appears to be an administrative categorisation. Suggest these groups should have an active role in developing positions to take to the Action Groups to develop up – action being the key word. Another suggestion would be to create one group to support administrative processes.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

This is an extremely complex structure. We envisage that there will be self-nominations along with the Tripartite representatives. The process involving the chair is suitable. The activities for the action groups will follow on from the planning process.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

This appears to be an annual conference. There needs to be further thought on the group's ongoing role, rather than being solely focused on an annual event.

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

This structure appears to focus on the annual plenary event. We suggest that further consideration is needed on how the work of the action groups can have an ongoing effect to benefit the work of the GLG, rather than relying on information sharing/decision making at an annual plenary event, particularly if part of its rationale is to drive action.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

These are quite generic. Further consideration is needed to differentiate this group from other AMR stakeholder groups and how it can deliver outcomes not occurring through other like mechanisms. Suggest word change from Build to Boost global momentum. Suggest word change from Generate to Maintain global commitment.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Communications should focus not only on what value the Multi-stakeholder Partnership Platform will bring to AMR action, but also the perceived benefits for being involved on the platform. It appears that considerable commitment is required to have an active voice in these discussions and civil society/ community groups may not have as many resources to put towards their involvement as the private sector or government organisations might.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

4 - Actively

Please provide additional comments and/or suggestions in the space below.:

Australia would rank as 4/Actively

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Not sure,
Please provide additional comments and/or suggestions in the space below.:
We will give consideration to Australia's involvement as the role of the Platform is refined.

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
We would be in the Government cluster group.

Q26

If you have any additional comments or suggestions, provide them in the space below:

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

acquired prior knowledge of AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

practical implementation of activities at instutional or sectoral level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Republic of North Macedonia

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Relevance of Institution for identifying/diagnostic of AMR, capacity for work on prevention of AMR, collaboration with other institution involving in the problem-dealing with the various aspects of AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Yes, all..best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The purpose of the Platform is very relevant because it will facilitate multi-sectorial stakeholder engagement on combating AMR in One Health approach. The Platform will be able to bring together members of the Tripartite Organizations, UN agencies, governments, civil society, private sector and academic institutions and to develop and implement a share global vision on AMR.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Civil society organizations and networks, representatives of private sector, governments and multilateral agencies across One Health (ex. National Agency for Public Health, National Food Safety Agency)

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

It will be useful Action Groups to advocate and advise all stakeholders on how to address professionally the problems related to AMR. Also, to exchange, share experience on practical implementation of AMR activities. Another very important action is to share guidelines and evidence based information. Collaboration between action group and government on creating and implementing One Health approaching policies.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The Cluster groups should be maintained as administrative groups.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

National members should work closely with government, to identify areas for technical assistance and implementation on AMR activities.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Governmental organizations should be also part of the action groups.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

As a mid-term or long-term target should be helping countries to implement actions to control AMR.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Thank you for opportunity to participate in survey. We hope the partnership will be created and will support countries in fighting AMR.

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

No,

Please provide additional comments and/or suggestions in the space below.:

Inclusiveness of the multi-stakeholder platform must be balanced with the capacity of stakeholders to participate and differentiating their roles.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

No,

Please provide additional comments and/or suggestions in the space below.:

the platform should aim to advance action on AMR, but the stakeholders are so diverse with various interests and different capacity to engage that emphasising as objective of the platform a shared vision, narrative and targets may diminish the actions necessary to tackle AMR

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

No,

Please provide additional comments and/or suggestions in the space below.:

Generally these principles are supported but the proposed procedure for inclusivity will not provide for balance to ensure effectiveness. As a priority it is necessary to support the engagement of civil society organizations as recommended by the IAGC with financial and technical support

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

As recommended by IACG the AMR governance structures should be reporting at UNGA level and not under the tripartide institutions. The tripartide institutions already have their own set ups for participation of stakeholders.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It is not clear how balance will be ensured in participation by the different stakeholder groups given their diverging capacities to engage, and diverse interests. Support for civil society organizations to participate, in particular from developing countries, would be important. It is not clear how the work would be carried out under action groups and cluster groups and how different stakeholders would be able to engage on equal footing

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

do not require membership

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

No,

Please provide additional comments and/or suggestions in the space below.:

Greater clarity is needed on how all key stakeholders would be able to effectively contribute, will there be support for the engagement of stakeholders such as CSOs from developing countries, and what are the incentives to do so

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Foster discussions of successful interventions and practices in diverse country settings, idenaps in failed interventions, share examples of campaigns that have had evidence of impact, explore successes in sustaining efforts on survaillance, evidence of actions that have led to change of practices in animal food industry and pharmaceutical industry

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

as noted from concerns on participation

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

conflict of interests disclosure is important but conditions on participation may reduce incentives for participation. Openess and transparency should be promoted and support for stakeholders that have less human and financial resources to participate

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

preference for representatives of the tripartide not to be part of the steering committee

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

In addition to the senior leadership of the tripartide, other governance bodies (GLG) and other relevant agancies and stakeholders should be present without membership requirement

Q19

Do you think the proposed structure is appropriate?

No

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

the accountability of the IPEA to the tripartide is problematic for communication to governments, loss of independence

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

unclear why there is a target for 200 stakeholders, the value added of the platform and strategic role should be the focus

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

promote the concept of "one health" through the platform

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

encourage collective engagement and establish a platform with information available to all

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

establish regional independent responsible bodies

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

the only condition for membership is the appropriate level of activity of the member

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

guidelines and practical implementation

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

the role of the cluster should be maximally active and minimally administrative

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The term of the Chair will be one year maximum.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

commitment and ability to take action to combat AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practice guidelines

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Украина

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Both those who can share useful experiences and those who need new experiences should apply for membership in the Platform. First of all, it is necessary to involve representatives of national executive bodies that implement state policy in the field of health protection (in particular in the field of public health, infection control and infection prevention); and specialists in the field of microbiological research, hospital epidemiologists and clinical pharmacists. Also, members of non-governmental organizations should be represented, as they are highly motivated

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

The problem of AMR spread has been mentioned at every medical conference for decades. Advocacy and information sharing is not priority work area of the Platform but should remain among the list of Platform's actions. Some of the most important tasks today are: - creation of a tool for assessing the consumption of antibiotics at the national level; - integration of regional level data with the national level; - expansion of the network of regional and national microbiological laboratories and active reporting on MDRO detection; - dissemination of training programs in the field of infection control and prevention (ICP) and Antibiotic Stewardship directly to health care professionals, pharmacy and laboratory staff; - making changes to legal documents in order to prevent the release of antibiotics without an electronic prescription.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

Government representatives, UN agencies, intergovernmental and regional organizations

Q6

Country:

India

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

using a one health approach to fight AMR

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

should include the Drug Regulator

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

commitment to reduce antibiotics in food systems

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

information sharing on antibiotic usage

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

there should be a cluster of drug regulators

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

include country drug regulator

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

all drug regulators of countries to come together to protect antibiotics for future of humanity and animal production, some arrangement like IAEA

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

With the existing AMR Multi-stakeholder coordination mechanism could drives this platform to meet this planned objective.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

These objectives are being gained by some countries/projects. Example the MPTF on AMR.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Significant or influence that can be made on action to combat AMR (delegates from a high position in the government)

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Support the coordination mechanism and partnership at country or sectoral level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Agree with the propose concept

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Fees or other remuneration are not be a sustain incentive, but other type of benefit/gain should be encouraged

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
The composition of the structure should be completed while the direction of the communication flow might be changed/adjusted as applicable

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Q4

Organization/entity:

Food and Veterinary Agency

Q5

Type of organization:

Government representatives, UN agencies, intergovernmental and regional organizations

Q6

Country:

Republic of North Macedonia

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

/

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

/

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

key word is implementation

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

action please

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Not yet sure

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Action action action. Have enough reports already

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Education of legislators. More frequent standard of care protocol updates.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Please include more private sector partners - big pharma, small pharma, agriculture, hospitals, etc.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

Can't be a resume stuffer. Need at least 10% of people's time if they want to be on

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Where is money coming from?

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

More Private sector please

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

Need financial targets. Sounds like the goal is to have a bunch of meetings

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Like it but would like more private/commercial input

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Very relevant as the concept of One Health is getting familiarized. However for doing real work and implementation this platform would be of much health. The platform is the place to share and to guidance for one health approaches

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

the platform will also be able to provide guidance and technical assistance

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Inclusivity will be including stakeholders from hard to reach areas as well

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Need to observe closely how does it work after the platform starts working, currently it seems Okay to me

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

currently not working for AMR, however is very motivated and wants to be active- this may be considered in the initial phase

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

currently it is Okay however after some time of work I may have some more ideas

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

providing technical assistance to any group /stakeholders who really need that

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Cluster group should be careful regarding inclusion of the remote or less representative areas / groups as a member

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It is Okay for now

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Unless starts working, it is difficult to visualize and comment, too much theoretical for me, currently

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

It seems Okey, however unless starts working it is difficult comment on relationship of different groups

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

As a theory, the communication flow is fine, however in real life some government focal persons or stakeholders are very difficult to work with. In that case the communication flow needs to be contextualized

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Need to identify some indicators and good to fix some timebound targets related to activities

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**5 - Fully**
Please provide additional comments and/or suggestions in the space below.:	Fully

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,
Please provide additional comments and/or suggestions in the space below.:
I am keen to work as a member of the platform as I am currently providing technical assistance to the MOH&FW, on AMR containment activities as surveillance lead from Fleming Fund Country grant to Bangladesh

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below.:
International Financial Institution

Q26

If you have any additional comments or suggestions, provide them in the space below:

No thanks

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Fully support the proposed key elements

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

none

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

None

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

To qualify for membership an organization should have shown commitment and have the ability to take action. A transparent application process with well-defined criteria is recommended.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

No,

Please provide additional comments and/or suggestions in the space below.:

Action groups are intended to “Drive multidisciplinary actions at global, regional, and national levels … working on key issues of multi-sectoral interest and developing action plans.” It is unclear what the scope of the three groups will be and whether it will encompass all aspects of the One Health AMR topics. To limit the number of Action groups to three seems premature given the complex nature of the societal challenge of AMR. It can be envisaged that the need for a specific Action group may change over time or disappear. We propose a more flexible structure with time limited mandates of Action groups of 1 to 3 years which can be renewed.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Global level actions to sharing best practice guidelines, implementation of national action plans and information sharing.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

It seems very challenging to administrate all diverse stakeholder in the One Health spectrum in only five Cluster Groups. To start it should be managed as administrative groups to coordinate sharing of information and facilitate discussions.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆ **5 - Fully**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,
Please provide additional comments and/or suggestions in the space below.:
The Joint Programming Initiative on Antimicrobial Resistance, JPIAMR, is an international collaborative platform engaging 28 nations, including Argentina, Canada, Egypt, India, Japan, South Korea, Turkey and South Africa, and the European Commission to curb antimicrobial resistance (AMR) with a One Health approach. The JPIAMR coordinates national research funding and supports collaborative action for filling knowledge gaps on AMR with a One Health perspective. Our shared Strategic Research and Innovation Agenda outlines the key areas to be addressed and provides guidance for countries to align their AMR research agendas nationally and internationally. The initiative jointly invests and coordinates national funding to support transnational research, international collaboration and alignment within the scientific, research support and policy areas outlined in the shared JPIAMR SRIA. Through implementation of the six research priority topics of the SRIA, the JPIAMR supports innovative research on the early development of new therapies, stewardship of new and existing antibiotics, and strategies to monitor and prevent the spread of AMR between humans, animals, and the environment in a One Health lens, with the overall goal to decrease the burden of AMR. In the last 10 years, the JPIAMR has mobilized over 100M€ in research funding to support a portfolio of 118 projects and networks and 1,300 researchers across 71 countries. JPIAMR has also been recognised as a key international AMR initiative by different international organisations as highlighted in the UN IACG report 2019, the G7 declaration 2017, the G20 Health Ministers declaration 2018 and the EU Council Conclusions on AMR 2019.

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below:: International and regional financial institutions, philanthropic donors.

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I suggest to specify professional societies also for example farmers, Medicos, Vets associations etc though broadly they are covered.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Stakeholders that can or be affected by AMR should qualify for the membership.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Sharing of good practices

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
As a Tripartite plus, may be UNEP can also be added together with FAO-OIE-WHO, if they agree.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

None

Egypt

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

reminder e-mail

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

no comment

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The platform should avoid duplication of effort of the GLG, IPEA and other national activities

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human-animal-plant-environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human-animal-plant-environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Members (organisations) should be able to demonstrate their relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Sharing of best practice examples, case studies. Providing contact points for those of similar interests. For example, RUMA is focused on the use of antibiotics in the UK livestock sectors, it would be happy to share its lessons learnt with others internationally but does not have an easy to use or reach network or similar livestock orientated organisations. I think the closer people are in terms of similar activity, the more rewarding networking and sharing of ideas will be. That said it is important that we realise AMR requires a multi discipline approach (livestock, human health and environment) so awareness of high level actions, successes and lessons learnt across the whole spectrum is useful.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

From the information given it is hard to visualise what these groups will do or how they will operate in order to usefully answer this question. We would agree with the principle of cluster groups establishing and bringing together like minded organisations internationally, sharing of knowledge would be an easy function to achieve, but committing to physical actions will be dependant on so many factors

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Virtual meetings would be our preference

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes
