Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Commitment and ability to take action to combat AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Practical implementation of activities at county or sectoral level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Existence of a national plan that identifies the role of the potential member entity

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

National action plan development, resource mobilization, development and operationalization of national AMR reporting

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Private sector may be more representative of businesses. Animal food producers and other grassroots stakeholders identified separately.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Experts in the field

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practice guidelines

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Professional Associations and Consumer groups should be represented.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Antimicrobial use SOPs for the different sectors and purposes.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,
Please provide additional comments and/or suggestions in the space below.:
Need to represent the interests of the final users e.g. farmers, consumers, patients and professional associations.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Medical, veterinary or agricultural background

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Science based recommendations and information sharing

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Requires broad based representation

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

It will be useful if it can help focus on a coherent analytical framework for AMR

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

These headings are a bit vague. I suggest that this works towards a common analytical framework to understand the costs and benefits of different interventions across On Heath settings. Otherwise I do not see the additionality

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes - a bit vague and no entirely additional to what we have now

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

no - broaden the accountability to more stakeholders

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

This whole area needs more economists - not just health economists either

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

No sure - but if you strive for inter sectional representation you may miss the Anglo Saxon white man who has a lot to offer

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

A cost-effectiveness framework to evaluate interventions to moderate use of antimicrobials across all settings

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

yes providing the clusrter group members have something to offer and are not just there to make up numbers

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

No,

Please provide additional comments and/or suggestions in the space below.:

This survey is now taking us into rather micro process, which you cannot expect people to answer or even care about at this stage

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

Depends on the alternatives - what's the role of the "Global Leaders Group " anyway

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

who knows at this stage?

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Seems reasonable

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

How will this be funded ?

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆ **5 - Fully**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,
Please provide additional comments and/or suggestions in the space below.:
To provide any economic input

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes

Q26

If you have any additional comments or suggestions, provide them in the space below:

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Requirement: be a representative capable of presenting the ideas at local, national and/or international body. The agreenment should be done by signing a special designed forms

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

practical implementation at sectoral levels especially on implementation and stregntherning regulatory tools

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Active litterature knowledges, evidence-based data, meta-analysis, publications

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Strong litterature review, evidences, data mining...

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Hard to say like this. This is a possible structure, among others.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Active programs or experience of different aspects of AMR, or ability to implement change. However care must be taken to ensure that a wide range of disciplines are considered beyond the traditional scientific/ epidemiological perspective to take into account the economic and social aspects of AMU and the barriers towards implementation of change.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

The action groups should focus on the specific challenges of different sectors within different countries/ discrete geographical regions otherwise the platform will fall into the trap of producing 'one-size fits all' guidelines that are not fit for purpose

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

In principle this works up to a point however the groups need to demonstrate effective communication to work towards end goals together

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

In my opinion, it should be welcome as a member all organizations that develop actions that have potential to reduce the risks of AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

I suggest being more inclusive, making room for organizations that work in the development and dissemination of the "One Welfare" concept, after all there are several actions with the potential to reduce the AMR that are not directly linked to health.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

No,

Please provide additional comments and/or suggestions in the space below.:
Only identifying the problem but where is the solution

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

Not getting opportunities for us

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Given importance who are already working in this area

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

No,

Please provide additional comments and/or suggestions in the space below.:

not identified the alternatives to antimicrobials

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

With alternatives they have to address the issues

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

They ahve not communicated

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Enthusiasm on the topic should be the only requirement and members of all sectors should be warmly welcome, the more the better

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Practical implementation of agreed guidelines is usually the problem so would hope the action group would have some recognised authority to work on this.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

I think we should all be enmeshed together and listen to eachother

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Quite complicated

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy should be in all three groups, short, medium and long term target

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

1 - Not at all

Please provide additional comments and/or suggestions in the space below.:

In the veterinary sector, not enough is being done on the small animal side. The vets are not very well informed of the topic and do not find it important. Hospital management does not support the efforts of those that are trying to raise awareness nor are they required to evidence the efforts taken on this topic.

Q24

Yes

Are you interested in becoming a member of the Platform? (optional Q)

Q25

Not sure,

Do you identify yourself in one of the clusters? (optional Q)

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
Clinical human pharmacist and a veterinary pharmacist at an academic institution I can see myself in multiple clusters

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Organizations participating in delivering the AMR National Action Plan for respective countries should be encouraged to members

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

develop the framework and stools for wider stakeholder engagement

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**4 - Actively**
Please provide additional comments and/or suggestions in the space below.:	We (Burnet Institute) are supporting the PNG National AMR Steering Committee in facilitating the delivery of the PNG AMR National Action Plan

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,
Please provide additional comments and/or suggestions in the space below.:
I am interested to be a member

Q25

Do you identify yourself in one of the clusters? (optional Q)

Not sure,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
My institution is a public health and research institute

Q26

If you have any additional comments or suggestions, provide them in the space below:

NO

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Most high level "One Health" initiatives focus on human health and the input from other sectors on human health. It would be good if this was truly an inter-sectoral effort, not an "Our Health" approach.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

A commitment to cross-sectoral programs that address the drivers of AMR in all sectors and promote solutions that identify and encourage appropriate AMU in humans, animals and plants.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Better data capture platforms to record and report the indications for antimicrobial use in human, animal and plant sectors would enable inappropriate uses to be identified and action taken to reduce inappropriate antimicrobial use.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Academic and research institutions will likely be dominated by well funded human health organisations and animal health will (again) be under-represented and unheard.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Past experience to management of AMRs

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practical guidelines

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

to be actively involved in some aspect of the AMR, representative (technical people) of different AMR issues

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Practical implementation of activities at country, based on my experience in my country

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

National farmer associations should also be invited to participate

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Ability to impact a larger group of stakeholders should also be considered. For example, leaders of national and regional farmer groups often have great influence on their members, and they will be useful for training purposes

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Actively soliciting feedback from national and regional stakeholders on activities

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Recognized national farmer groups and relevant NGOs may also be included

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

If members have to travel for meetings, their transportation will have to be catered for

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

In the short term target, extra effort should be made to have representations from regions where invitations to become members are not readily responded to

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

No,

Please provide additional comments and/or suggestions in the space below.:

The differencse between the Platform, and the GLG and IPEA are not clear

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The objectives are somewhat relevant but fail to address the large difference in current action and progress on AM use & addressing resistance between different industries and regional/national stakeholders. It seems to show poor awareness of existing efforts to combat AMR.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

No,

Please provide additional comments and/or suggestions in the space below.:

I doubt it will be possible to balance inclusiveness and effectiveness, particularly in effectively addressing over-use by self-regulating industries (e.g. feedlot industry in high-income countries) and unregulated industries (e.g. emerging livestock production systems in lower-income countries). I don't see how these principles effectively support the Platform's objectives.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

It is vital the Platform is accountable but I don't think the Tripartite is the ultimate stakeholder for AMR - they're bureaucratic organisations that don't always show success at implementing change for these sorts of issues. I think the Tripartite's governing bodies will unconsciously politically derail the Platform's accountability because it will be difficult to have the OIE and WHO governing bodies reach consensus on how AMR should be managed.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

This is worthy but I suspect certain key groups (e.g. private sector groups from high-income jurisdictions) will struggle to see the relevance of the Platform unless it affects, or is influenced by, IHRs or Phytosanitary regulations that affect international trade, and will not support it sufficiently. How will this membership particularly seek to include the environment sector?

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Industry stakeholders (livestock, medical, manufacturers, prescribers, regulators) AND/OR technical expertise AND/OR regulatory role (actual or potential), plus others

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

There should be a clear draft list of Action Groups determined a priori, with room for a limited number of additional ones later. The Vision is acceptable but the efficacy of Action Groups will critically depend on setting clear outcomes and timelines for AGs' outputs.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Recommendations for improving AM regulation in jurisdictions currently lacking effective AM & other pharmaceutical regulation. Practical implementation. Gap analysis of factors contributing to poor AM stewardship e.g. poor clinical capacity; lack of regulation; burden of disease

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

The Private Sector has a major role to play here (as cause and potential solution of the problem of AMR) but it seems underweighted compared to the other clusters. It does not represent the likely diversity of private sector stakeholders (e.g. different kinds of livestock producers, AM manufacturers/distributors/prescribers/etc, etc)

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Feels like another talk-fest.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

Insufficient detail to endorse. It is unclear how a relatively small Steering Committee will represent the geographic, institutional and industry diversity of the Platform.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

No,

Please provide additional comments and/or suggestions in the space below.:

We will know after the first Plenary whether it was useful.

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

It looks like all roads lead to the Plenary, where everyone talks but with no clear pathway for action.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

No - see above.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

Doesn't seem to pay heed to any existing efforts on AMR e.g. European Parliament, national jurisdictions

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Main comment is that the pathway for effective actions is unclear

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**4 - Actively**
Please provide additional comments and/or suggestions in the space below.:	Working in livestock production systems to enhance productivity using evidence-based interventions

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Not sure

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

avoidance of finanicla conflict of interest

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

membership contingent on data sharing

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

Perhaps too complex. A leaner structure mioght be more efficient

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

It's really urgent that Italian populations understand how serious is the problem. Please read our article just published here: https://www.nature.com/articles/s41599-021-00852-4

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The most important stakeholder is the population, and in particular the Italian population.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

In my opinion could be better to include, in accountability roles, the governament of the countries where occure the higher use of antibiotics and antimicrobials

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

However, in my opinion, it should be open also to private citizens

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

the requirements should be only for representatives groups, while for citizens it should be open-access. Obviously, citizens will be include in order to improve the problem awereness. So, they could just add comments and interact with the platform.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Business Marketing and Innovation Plan in all networks that are affected by the problem and influence itself the problem.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

see the previous comments

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,
Please provide additional comments and/or suggestions in the space below.:
but see the previous comments

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

No,
Please provide additional comments and/or suggestions in the space below.:
please see the previous comments

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
but please see the previous comments

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

But, only if the communications strategy will able to reach the citizen level trough istitutional channels (e.g. by Public TV of each countries)

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

There is urgency in establishment of the platform to share experiences

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I think it might also be an avenue to Technical Assistance on AMR

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

All basic principles are covered

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

However, it will be important to clarify to whom and how accountability will be done....perhaps by more clearly explaining how the platform will function.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Perhaps it should be constituted in a manner similar to GHSA

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All the actions mentioned in the example including resource mobilisation for LMICs

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

But perhaps manufacturers of antibiotics should be a stand alone cluster

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

In general yes, BUT consideration should be made to support members from LMICs

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Action Groups should have the involvement of multiple disciplines and sectors across the human-animal-environment interface (One Health).

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

The requirements to qualify for membership are detailed in question 5: The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Training for Civil Society

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Suggestion: Communication network between action groups 1, 2 and 3 before plenary

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:
One other area would be to perform estimation of the burden of AMR and the associated costs to society of AMR. The One Health crossover is crucial as this helps with the development and transmission of resistance and understanding the societal cost and the subsequent impact of inaction will hopefully help drive behavioral change

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The global nature of AMR is key, and representation from all geographies will be crucial

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

discipline expertise will be important, but key will be the inclusion of decision-makers (or people that decision-makers listen to) as this will be needed to help enact change

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Definitely 'best practices', but also ways to build capabilities at country levels, method of integrating data into policy recommendations

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Agree in priciple, but certain representatives may have experience or relevant input into >1 cluster groups, and ways that this might be accommodated should be considered

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Clear communication channels will be crucial.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

I would like to see the long-term targets be achieved in a time frame shorter than 10 years. Given the paucity of the clinical pipeline, the time required and the scientific challenges involved in the development of new products, obtaining a global commitment to responsible stewardship is very important and achieving this in <10 years should be a high priority.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆ **5 - Fully**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Not sure,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
My role now is as a funder, but my disciple expertise is as a drug developer and microbiologist, so I could potentially fit into >1 cluster

Q26

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Scientific background and/or representation of local authorities

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Funding local activities aiming to educate related professionals

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Twice a year to be more involved and active

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

create scientific-evidence to desicion markers through policy diaglogue

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

best practice guidelines and enforcement of the regulations at different levels

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

producers, consumers associations

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

A difficult questions. Probably it would be best to let health care authorities of individual countries suggest their representatives.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Most important from my side would be to connect human, veterinary and enviromental health. For each of these comprartments already a lot of collaborations are existing, and it is important not to overlap, too much with these existing formats.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No thanks

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Contribution and engagement

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Local context application of interventions

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

And be able to educate about the combat of AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Education to enhance knowlwgde level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

No,

Please provide additional comments and/or suggestions in the space below.:

Please make the output available

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

UK

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Proven experience in the relevant fields of AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All of the examples given above

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

What does it mean for the platform to be accountable to the tripartite? What happens in a case of disagreement between members and the Tripartite or between Tripartite DGs?

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Membership should be broadly open to those working in AMR specific or AMR sensitive (IPC, WASH, Climate etc.) areas.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Advocacy, Implementation, Evaluation

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Cluster groups should have a more active role

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

At 200+ members, this is an substantial request for volunteer labour.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

The proposed structure is very difficult to understand and doesn't adequately delineate roles and responsibilities.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

Commitment to responsible antimicrobial use is a foundational principle for this group and consolidating this should be a 1 year goal, not a 10 year goal. More concrete outcomes and indicators will be needed to accompany these goals (e.g. build momentum)

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:
the platform could have public information and a public space to share articles and data from antimicrobials use and antimicrobials resistance genes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

The participation of researchers is very important together with the government representants

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Multicentric researchers together with productive sectors and government representants

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

This is a very important initiative!

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

the member must be related to the health field such as medical, vet...ect and at research area

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Awareness is more important

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes -- some level of coordination and management will be needed to achieve the targets set out

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Interest, some knowledge on any of the proposed topics including policies, institutional and programs on AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

But a technical group can be set up to also design topical questions/issues which the action groups can work on

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All the above but more importantly how to transform existing knowledge into actions

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

I think the action groups should be a mix of the listed clusters

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Social Media experts who can advise on strategies to maximize use of these platforms

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

There should also be a Vigilance group or legal advisory group that can help formulate terms of compliance and penalties on non-compliance to aid and support monitoring by respective local authorities.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

4 - Actively

Please provide additional comments and/or suggestions in the space below.:

There is a full fledged Hospital Infection Control Committee as well as Antibiotic policy committee. The access to higher antibiotics is restricted and monitored.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Not sure

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below.:

Advocacy group

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Data and visualizations should be shareable and downloadable

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Should build on existing initiatives and alliances

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Inclusion of private sector data presents a challenge due (concerns about privacy, security and liability)

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Also needs to comply with accepted data standards such as FAIR and CARE

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Membership requirements should evolve over time

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

How will they be funded?

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Data governance

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

If a cluster group wants to take action, they should

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

There should be funding opportunities for coalitions of members

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Most of the work will have to be done prior to the actual meeting in order to gain concensus

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

It would have been helpful to see this diagram at the beginning of the survey

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

Need to establish measurements of and targets for AMU and AMR as soon as possible

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

3 - Moderately

Please provide additional comments and/or suggestions in the space below.:

Many individual researchers are working on AMR, but there is not a coordinated effort

Q24

Not sure

Are you interested in becoming a member of the Platform? (optional Q)

Q25

Not sure

Do you identify yourself in one of the clusters? (optional Q)

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:
The wording of the last objective needs improvement for clarity. It is too long and difficult to read, possibly with grammatical errors.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The third principle mentions inclusivity and inclusiveness (according to Cambridge Dict, they are different), not sure if this was intentional. Probably best to choose one and keep it consistent to avoid misinterpretations.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Previous experience in AMR/AMU/AMS in any of the related disciplines.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

strategic planning of activities within each action group, development of tools/templates for all the above.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Clusters should have both administrative and active roles, with parallel meetings and activities to those of the clusters. Each cluster will likely include many different organisations whcih will need to articulate to set common goals and reach agreements on actions.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes in principle, but "devising a comms strategy" is very vague.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

sop

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

This is an area of my research and a topic that I teach to college level students

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I believe that education is critical to this effort

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Either direct or indirect involvement in this topic locally or internationally.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Some evidence of prior work that may enhance the project

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

One area that has been problematic has been surveillance in lower income areas.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Advance material I assume will be provided

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Is there a means of follow up on recommendations?

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Important to include different species within "animals"

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Information sharing in standardized format is particularly important

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I would suggest that vegetation is better descriptor than "plant"

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

I would prefer that there be a distinct governing body set up for this platform and it reports to the DGs, rather than "their governing bodies"

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

action groups should include the standardized information collection strategy

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Should consider different categories of membership so that those interested in receiving information are different than those interested in being part of operations.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Consideration for how to work in species groups (e.g. dairy cattle, tilapia, poultry) without lumping them all as one food animals or even as one group like aquaculture.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Need to include an ability to identify high AMU rather than just put out prudent AMU guidelines.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

there is more to cluster them on activities than on their representation. For example, dairy will transcend across gov, academia, NGO, etc.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

There also needs to be a secretariat that will facilitate the processes.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

virtual meetings will be more environmentally sustainable

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Will stakeholders listen? The coordinating team should have high level (CVO?) involvement

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

By "sharing evidence" I assume this means building a baseline of AMU and AMR so that temporal trends will be reported and used in AMR actions. I agree with this.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

4 - Actively

Please provide additional comments and/or suggestions in the space below.:

Faculty are involved in AMR monitoring as part of research initiatives. It is grant funded research so its magnitude is influenced by available resources.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,

Please provide additional comments and/or suggestions in the space below.:

My specific background is aquaculture and I think it has a role to play somewhere in the larger scheme.

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below.:

academic and research; but species is less identifiable in the cluster

Q26

If you have any additional comments or suggestions, provide them in the space below:

Clinical and epidemiological research is included under research and probably should be highlighted.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

natural, biological, medical and social science

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

practical implemantation and control on coutry level, demonstrate best practice examples

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

A term of two years for the chair seem rather short to be able to reach targets

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Practical implementation is missing - in my opinion

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Try to reach long-term targets after five years. More ambition. Reduce AB amounts right away and reserve last resort ABs for targeted use only.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆ **4 - Actively**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Not sure

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
Reducing use of antibitics by improving health, housing and environment.

Q26

If you have any additional comments or suggestions, provide them in the space below:

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

There may be overlap with other platforms such as the JPIAMR-VRI - alignment would be good

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

No,

Please provide additional comments and/or suggestions in the space below.:

I think it should be interdisciplinary and also consider wide participation that includes the people on the ground

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

I think accountability should be to the members and users of the platform

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

relevant experience in AMR with practical application in any part of the system ranging from primary use to policy

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

No,

Please provide additional comments and/or suggestions in the space below.:

I think the element of consensus building and joint vision is missing

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

agreeing on a shared vision; elaborating a detailed Theory of Change with subsequent support to implementing countries, e.g. advisors to country teams

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

I am missing a clearer visual representation of the Global Plan of Action committee and the national teams defining and implementing National Action Plans. I think it would be important to make sure that the people working on this as part of their daily job have a clear role. I think the JPIAMR-VRI should also be formally listed: The JPIAMR-VRI (Virtual Research Institute) Digital Platform is a free access point for the entire AMR community to facilitate knowledge exchange and data sharing of antimicrobial resistance research data across the globe

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Looks great, but would change to interdisciplinary

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Fantastic initiative and survey!

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

United efforts for enhancing preventive measures for AMR and Medication safety together.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Practical implementation

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Take action to combat AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Advocacy and Information sharing

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

There has to be an incentivised accountability aspect included for translating the intent of the Platform

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

A passion in combating AMR, Alignment with the SDGs, and an understanding of One Health. Should have no financial expectations to start with.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

An official conditional Affiliation is required to ensure impactful translation of the vision of the Platform

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Meetings should be preceded with action taken data.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

You can also include Volunteer groups and Student groups

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

A brilliant initiative that needs to have a translational approach of accountability incorporated as part of the USP.

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

s

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

s

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Provided that there is clarity over pathways to identify and implement best practice at a local level.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

An one-health approach is welcome - we have applied this Scotland. Challenges include educating clinicians & the public to understand & follow best practice.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

This is fine; a block could be how these groups communicate their findings & recommendations to first line antimicrobial users. In my experience, this delays change (although stewardship has started moving more quickly in the last few years in the UK).

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Training, experience and actions in AMR/AMS (verified activity & publications); set points-based criteria for objective assessment of applications; commitment to activity/actions; points based review of activity for renewal of membership. This approach works well with the International Committee on Allergic Diseases in Animals (www.icacd.org) for example.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All of those plus practical concerns over licensing and availability of antibiotics (e.g. using PK/PD based licensing, regulatory back up for antibiotic tiers), practical & effective approaches to diagnosis, overcoming challenges in low-medium income countries, training local/regional antimicrobial stewardship champions.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I can see a 'top-down' approach stopping at national/regional levels though. The challenge will be filter everything into best practice guidelines appropriate to users. A 'bottom up' approach should be encouraged to raise awareness and desire for better practice. This could involve training local AMS champions for various stakeholder groups - e.g. medicine, veterinary medicine, public, animal owners/workers, microbiology labs etc.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The aims are laudable but won't achieve results unless there are practical ways to implement them & achieve change.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**5 - Fully**
Please provide additional comments and/or suggestions in the space below.:	We're heavily engaged in this through undergraduate & postgraduate teaching, clinical best practice, research and public engagement

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below.:
I'm primarily based in academia but I'm also involved with Scottish & UK governmental & other bodies working with AMR & AMS in veterinary work and one-health.

Q26

If you have any additional comments or suggestions, provide them in the space below:

No.

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Need to be completely free of conflict of interest. would be great to link with ACVCP and other pharmacological boards

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

No financial institution should be involved. This should be 100% free of conflict of interest

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

membership should be open to all skateholders in medicine (vet and human at least) but the membership who could share info should be recognized expert (diplomate in pharmacology/searchers) and be free of conflict of interest (Financial institution and government should get access but not participate at all)

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

but finanicla institution and government should not have full open to speak

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

best pratcice guideline/region and practice. Publish in JVIM and other journal consensus statement

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

they should be more restriction to financial institution and government

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

should be more rules about financial and government

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

financial and government should not be represented in the committee at same level than people without conflict of interest.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

government and financial institutions should be apart and with bigger restrictive power

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

An option "not sure" should be available

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

The relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR, as said above.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

practical implementation of activities at country or sectoral level, There are plenty of guidelines but farmers for instance are not eager to adhere them since there is not enough controling measures implemented.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

at thirst glance approach looks multifaceted.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

I agree with the statement of "relevance to some aspect of the AMR challenge, commitment and ability to take action to combat AMR." I also think that student organisations that represent students that will go into professions (human medicine, veterinary medicine) that will prescribe antimicrobials need to be engaged as they are the future of antimicrobial prescribing in the world

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All of the above. Also ensure excellent teaching of students in medical and veterinary school to ensure that curricula reflect our global goals

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Relevance and experience

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Essential drug list for veterinary medicine, setting research priorities

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

Interaction between the groups that are now clustered together is essential. Grouping according to issues/themes with representation from the different sectors may be more appropriate.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Relevant input from all perspectives- I would say that the biggest challenge is to get good representation from all perspectives

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

I would say best practice guidelines and practical implementation at country/sectoral level mainly

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Members should be able to share a unique perspective on how AMR effects health and wellbeing of animals, humans or plants. They should have a demonstrated history of working in teams to solve challenging problems.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

clinical guidelines for small animal patients, broad monitoring of antimicrobial usage

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Beyond disclosure of what is listed, members should disclose all financial and potential (real or perceived) conflicts of interests

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Some ability to comment on the challenges of AMR in a specific field, research experience within the field of AMR in any sector (One Health or other)

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Development of guidelines for different sectors, development of education materials for the general public and prescribers/antimicrobial users, development of support for improved stewardship in countries without infrastructure for large scale stewardship efforts

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

It is important to ensure that veterinary representation includes those in the small animal field due to the risks companion animals pose to humans in terms of zoonotic transfer of possible AMR pathogens

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

4 - Actively

Please provide additional comments and/or suggestions in the space below.:

Currently involved in developing a stewardship program for the small animal veterinary hospital in addition to a program already in place at the human medical centre. There is a One Health team with representatives from both hospitals who regularly meet to help improve the program in the veterinary hospital.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Not sure

Q26

If you have any additional comments or suggestions, provide them in the space below:

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Researchers in AMR. Product developer to combat AMR and AMS

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Research, monitoring and surveillance of AMR

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Sharing best practices on rational antibiotic use on livestock.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Belonging to a university or government institution

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Validate tools for conducting epidemiological surveillance.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

In addition to the above suggestions, diversity is key in terms of geographical representation, gender balance and balance across sectors and disciplines

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All of the above. I think there remains a gap between the awareness of policy makers of the importance of the problem and action, so practical implementation tool kits might be very valuable

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

As long as the clusters do not end up dividing people that needs to be talking to each other

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

can we state that reasonable expenses will be reimbursed?

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

I think this needs to include a statement on how the Platform will receive information. When the flow is obviously unidirectional, it tends to get ignored

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Perhaps an upfront statement about Engagement in the short term goals would be valuable

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Balance will be the challenge given the common barriers/conflicts between groups and the common disregard for challenges outside rich countries.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Is it 'organizations' or 'individuals'? As an academic, as worded, it seems like it would require my institution to be a member, not me (meaning individuals might not be able to participate if their institution isn't motivated).

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

It depends on how members will be managed and what they will do. At a highly inclusive level, anyone that loosely fits the criteria would be engaged. That's fine if members that come with a specific agenda and are not collaborative cannot derail processes.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All those are fine. There are myriad potential opportunities. Mapping these to existing recommendations (e.g. recent GLG statements) would be a good start to address the higher profile, more important and generally accepted areas.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The challenge will be implementation, as the potential participants are so numerous and broad. Getting all those areas alongside balances will be a challenge. It's important but hard to assess without more details.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Meetings aren't where things get done. They can be discussed, finalized and similar things, but content development really needs to be at a lower level with highly engaged working groups, to get the required depth of discussion and to address complex, controversial issues.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Diversity of representative across the human/animal/env areas will be important. Need to have all those represented adequately.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

No,

Please provide additional comments and/or suggestions in the space below.:

I agree somewhat. As indicated earlier, large plenary sessions may not be the best way to move forward and actually develop content or consensus. They are cumbersome and prone to being dominated by a vocal minority. They don't foster the amount of discussion needed to navigate this complex area. Plenary sessions are good for higher level discussion, approval and things like that, but working groups will be important to drive action.

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
Action groups may need working groups within or below them.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Yes, but communication pathways need to go both ways.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,
Please provide additional comments and/or suggestions in the space below.:
I'd be more granular. 200 members mainly from human health or 200 mainly from ag would not be a success. There must be adequate representation across the spectrum. Also, one area that I personally find missing from most of these activities is involvement of antimicrobial users/prescribers. Decisions are often made solely by people that are well informed but have not prescribed a drug in years (or ever), leading to predictable deficiencies or unclear aspects in documents that are produced. From my work with groups, I know that my experience as a prescriber and someone who has to deal with the day-to-day aspects of AMU and AMR has helped shape discussions.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆ **4 - Actively**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
I'd have to see them again to make sure I was getting the detail correct (and can't go back with this survey) but my area is in the animal health sector, with a strong emphasis on AMU, AMR and One Health aspects.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Relevance to some crucial aspect of AMR and ability to take action to prevent the spread and progressively reduce AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Compliance with controls and sanctions imposed at any level for the use (or abuse) of antibiotics (for example in animal or fish farms), both in Europe and outside Europe for food materials and products (and not only) in and out of Europe. Active monitoring of nations that do not respect the regulations for the production and use of antibiotics.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It could be suggested the creation of an intergovernmental task force with decision-making powers could serve to monitor, prevent and sanction the illegal activities related to the improper use of antibiotics and to make the various sectors such as Health, Environment, Agricultural and Animal Policies, etc. directly responsible.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The effectiveness of the project will occur precisely with the ability to make effective the actions that the stackholders, who will be selected, will be able to undertake to prevent the maintenance and spread of illicit procedures that support the AMR phenomenon and to propose new procedures that may gradually reduce the AMR.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Equal balance between HIC and LMIC members, and gender

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Current active participation in AMR specific research or advocacy. A track record showing expertise with the subject area.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

LMIC specific guidelines or messaging, considering the diversity and informality of the systems. Can we establish targets and indicators?

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

UNEP is excluded

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Willingness to collaborate with interdisciplinary groups and acceptance of OneHealth as the basis of AMR action

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

database building, standardized AMR surveillance protocol development

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Special focus can be made to involve youth in any of the term targets, which will help form a parallel cohort of young AMR professionals that can be motivated to take up AMR in social sciences or scientific phd courses

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

As mentioned in earlier responses, special attention can be given to engaging young researchers and professionals (Below 35/30 age). It can be substantial in outreach programs or taking up AMR topic for further studies.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆ **4 - Actively**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
I am a part of a non-profit scientific research institute

Q26

If you have any additional comments or suggestions, provide them in the space below:

United States

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

While the focus on technical or practical aspects of AMR is essential, stakeholder engagement should also address the social science and political aspects of AMR and AMS.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

No,

Please provide additional comments and/or suggestions in the space below.:

These are great, but insufficient. What about commitments to health equity? To a OneHealth framework? To health security? While policy initiative like these have broad visions out of necessity, I'd suggest you consider some of the main obstacles to AMR mitigation and incorporate recognition and the imperatives to overcome these in your guiding vision

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Will there by public or community engagement that these governing bodies engage as well?

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Can individuals join in addition to institutions?

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

clarify individual-level membership; clear commitment of time

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

willingness to engage problems that seem tangential, but are actually crucial. E.g. consolidation in agricultural industry is a huge driver of overuse; global laboratory capacity building and supply chain issues; global IP agreements

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

I think the cluster groups would be better organized by topic area and then include representatives across these areas, to better ensure the ability of products to speak across stakeholders

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Again, this is a little confusing because from before it sounded like all members are the institutions, not individuals

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I would clarify the relationship of the full time staff to these entities. This will protect them from members as well as head-off internal platform internal conflicts when staff members are granted too little autonomy or, on the other extreme, too closely tied to some members over others.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

Can you revise so as to clarify the relationship between member and the leaders group and steering committee? There's no direct connection here, which is fine if that's the vision, but it seems from prior descriptions the intended link was tighter.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

I would move some of the policy deliverables to the medium-term targets, and specify policy deliverables in the long-term targets. Even if early successes are pilot programs or draft model legislation, it is better to start with action as early as possible. The convening power of these groups can crowd out other activities unless the organization develops an explicit policy arm early on that can be scaled over time.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

I specialize in ethics, community engagement, biobanking, antimicrobial resistance. Please feel free to reach out.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

Please provide additional comments and/or suggestions in the space below.:	3

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,
Please provide additional comments and/or suggestions in the space below.:
would be especially interested in social science and/or ethics groups of scholars/policy makers

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below.:
Academic/Research institution

Q26

If you have any additional comments or suggestions, provide them in the space below:

Excellent work so far, it is so exciting to see a group like this coming together!

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The One Health approach and the inclusion of multiple stakeholders from diverse geographical areas is absolutely crucial.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

A diverse range of public, private and third sector stakeholders/contributors is important as long as the private sector remains in balance and does not appropriate agendas to serve economic interests.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Expertise in AMR from either the human, animal or plant focus. They must be open to interdisciplinarity as this is a problem best explored through interdisciplinary collaboration. There should be a commitment to achieving positive environmental benefits (including the social and natural environment). The economy and private enterprise have a role to play in this but economic advantage should not be prioritised over that of human/animal/plants. They should respect a One Health approach.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

This is something that may require some resource if Action Groups are to be an ongoing mechanism of change.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All of the above. They might also identify evidence gaps and priority setting activities.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

I am concerned that the overall balance of these groups might be weighted too heavily towards private/financial interests that may well also tie into or constrain government agendas.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

While I agree in part that members should participate on a voluntary basis, this might vary according to level of participation. If a core group were established that were regular contributors to various interests this could have capacity issues for individuals and may require some sort of remunaration to e.g. academic instutions rather than to the individuals themselves. This would ensure that higher education institutions supported staff and allowed them both recognition and time to contribute to initiatives. .

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

College of Agriculture and Veterinary Medicine, UAE University

Q5 **Academic and research institutions**

Type of organization:

Q6

Country:

United Arab Emirates

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Any researcher, policy maker, drug sponsor who has the mettle in combating the challenges of AMR should be allowed to be a member. The basic qualification for a membership needs to be having a graduate degree and a recommendation letter from a mentor or manager for early-career individuals.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Sharing or publishing of research data on AMR from researchers seems to be tightly governed in UAE. This is often not clear or vastly unknown. This will have to be identified for the action groups to share information in an uninhibited way, if AMR needs to be combated

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Information sharing and implementation is one of things that will be a driving force. How long will it be sustained and how deep are we willing to advocate the best practices? Will the action group be empowered or supported to spread information at different sectors - veterinary or human use of antimicrobials at the grassroot levels?

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Human and Veterinary Clinicians need to be involved, sensitized and be networked in addition to the suggested members

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

The platform members not receiving a fee or remuneration will be a difficult component in the mission. A nominal sum or a recognition that will count towards their service component at work will be necessary. Will participation or contributions be covered under an umbrella of continuing education so that it counts towards upkeep of their certifications for example

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Commitment/supported by local/national policies

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

pilot project at representative sector/area

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

This kind of platform is need of the hour to guide and reach mitigatory measures in stipulated time.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Information-sharing and networking shall be easily accessible, especially to low income group countries

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

In Multisectoral and multidisciplinary systems approach needs to bring all sector with definition that include all sector , for instance when we say Line Departments , what they also be included

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I am fully supportive of Platform in view of its positive impact in improving health of humans, animals and environment

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

As I have mentioned previously we need encompass very one in Action Group so as to ensure that ultimate goal are attained in time.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Membership as of now encompassed all stake holders. Some degree of leverage is necessitated to add new members to facilitate changes in policy matters or governments in developing and under developed countries

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The vision in appropriate

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Country level is very important, besides others,

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

This has taken care every one

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

As of now get going will help us to know lacunae if any and necessary changes can be brought in at a later date.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The time period of committees need to extended when the outcome is too good as changes brought in the committe requres incubation period that may lead to lapses

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Please encourage virtual in Plenary Sessions with quarterly in puts

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
Non- Governmental Organizations need to be mentioned. No arrow s are showing in the structure that can indicate relatedness and interactions

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,
Please provide additional comments and/or suggestions in the space below.:
This is fine.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,
Please provide additional comments and/or suggestions in the space below.:
We need target the way SDG are planned by 2030. In this case 2050 is more appropriate

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

We need target the way SDG are planned by 2030. In this case 2050 is more appropriate

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

Please provide additional comments and/or suggestions in the space below.:	Very actively engaged

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,
Please provide additional comments and/or suggestions in the space below.:
As an individual I can provide what all the in puts necessary and can actively involves as I am carrying AMR related works for more than a decade.

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes

Q26

If you have any additional comments or suggestions, provide them in the space below:

I have provided previously. To repeat once again aprt from short term, mid term and long term goals we need a target year that is 2050 to assess where we stand in three years intervals so as facilitate to know which direction we head for.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

member of the institution with role in taking action to combat AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

best practice guidelines; advocacy and information sharing

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Organisations must have a reputation in the field of AMR - or have a dominant program/or significant nmber of leaders that work in the AMR space. A membership committee should be organised (perhaps on a volunteer basis) that will access the level of AMR research programs, and ability to take considerable action.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

advocacy and information sharing is critical,

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

Formation of these clusters groups segrates the big-thinkers that need to be in the room together to identify the big issues and look for solutions.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

This also concerns us, AMR requires big changes across every sector, this type of clustering of senior level thinking could essentially stagnate the drive to enact change.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

We are extremely excited that this initiative is taking consultations. AMR needs a co-ordinated global response and won't work if it operates in silo's.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**5 - Fully**
Please provide additional comments and/or suggestions in the space below.:	OUr organisation is 100% committed to discovering sustainable solutions to AMR

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
Our research centre only works on AMR issues- we have no other rsearch goals.

Q26

If you have any additional comments or suggestions, provide them in the space below:

We are incredibly excited about this new opportunity, we think it is a high value initiative and are willing to commit staff in kind to helping it succeed

The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Strong commitment.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practices.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

the responsible goverment institutions should be included

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

relevant group within countries should be established

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

intersectorial cooperation at national leverl within national action group

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

It would be extremely valuable if we could have one platform where we can collate data on the use of antimicrobials and the data regarding antimicrobial resistance from all production, health and research sectors involved.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Membership should be possible for any institution/organization/agency/society (or similar) that is affected by AMR, or has any impact on AMR, and is actively committed to prevention of the increase of AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Agree with all of the above, but the first priority should be to determine the current use of antimicrobials across all involved sectors (production/health/research), and to assess the current status of AMR in the same sectors, to assess the areas of higher/increased risk.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Medicines for animals: also pet animals should be taken into account, like ornamental fishes. Thank you.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Please also including AMR related to the private sectors of pet animals (with world trade of ornamental fish for instance).Thank you.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Very important initiative.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes, as they can make changes at a certain level.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The approach looks sound and effective.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

I would suggest, membership is whether linked to an important role in the business around AMU and AMR, or a proven expertise through highly relevant peer-reviewed publications of the expert or organisation.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Thereby it is important, that Action Group members can consult other experts outside the project to acquire information. Thank you.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

To start, I think, the action groups should draw the whole field of actors in the AMR-issue. Than, by taking parts of the schem they made, they could make smaller groups to explore the background of the AMU and AMR for each animal husbandry and pet branch for instance. Keeping the globe in mind, I mean, the transport of live animals and humans, and the impact this may have on AMR spread. When the Action Group has made up the status quo based on all the information they gathered, they only can further devide the tasks, and develop a Best Practice Guideline, per branch/sector, per region (more than by country, I believe).. Then it is important to keep the important stakeholders on board, in the improvement development this action aims for, so, good and frequent communication in the right way is crucial.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The Cluster Private sector partners to my opinion should also have input from (or participation by) some members of academia, as I expect, that as the Private sector partners depend on the trade f.i., they will not have an objective view on the must to battle against AMR, and the way to achieve this.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Seems fine.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Seems fine.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I understand, this Plenary Session is only for members of the consortium? Would external keynote speakers be invited as well, as a suggestion? Thank you.

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
Yes. Again with input from externals, when appropriate, when certain developments at a global level would ask for this. What is the mode of action/procedure for new members to join in, and old members to leave the groups? Thank you.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Fine.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Fine. Just also important to keep monitoring the situation in practice. Promises are easily made, but do they work out? How would this be addressed?

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

As long as AMR is also a result of commerce and salaries, it is a tensed subject. I believe, especially the Private Sector needs good information, to keep them on board of the Platform. They know the situation in the field the best, and scientists measure the AMR in the field, and should convice the Private Sector. Thank you.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

My direct colleagues are working at the AMR Laboratory of our Government Veterinary Institute WBVR. Regarding ornamental fish and AMR development I am also involved and have published with FAO in this.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Not sure,

Please provide additional comments and/or suggestions in the space below.:

I am interested, but my input would go no further than AMR issues in ornamental fish. I believe, my direct colleagues Kees Veldman and Mike Brouwer are much more candidates for this task. However, I would also be willing to give a keynote on the ornamental fish trade and issues regarding AMR.

Q25

Do you identify yourself in one of the clusters? (optional Q)

Not sure,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::

Please see above. If I would participate, and this would only be possible when costs would also be compensated for, I would be part of the research cluster, but would be in favor to have direct contact with the (ornamental) fish and shrimp branches.

Q26

If you have any additional comments or suggestions, provide them in the space below:

Your initiative makes me happy! very important. I also have always appreciated to work for OIE (AAC, 2009-2012) and FAO (running), so, I wish you very good luck with this initiative! Kind regards, Olga Haenen

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

All members included in the Risk Analysis approach (assessors, managers and comunication)

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Risk assessments, guidelines

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Relevance to some aspect of the AMR challenge

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Practical activities at country level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

members shall be selected from different fields; people who work or study AMR spread in Georgia and relevant topics

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Additional research shall be done to research AMR spread in Georgia through food chain and research results shall be shared with all concerned: e.g., producers; government and non-government organization, consumers

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

As representative of young Georgian scientists who is researching AMR spread in georgia and works in Georgian food sects having abelite to be part of this project is upmost importance

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

I think emphasis should be placed on commitment rather than ability to take action on AMR. Significant sectors of the globe currently have limited ability to take action on AMR; this should be fairly recognised and incorporated into capacity building plans.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

These are all fair suggestions for Action Groups. Significant care will be needed to ensure such action groups are closely linked enough with those 'on the ground'. For instance, best practice guidelines are only useful if widely implemented; this is ensured by engaging those with best local knowledge on how to develop guidelines that best reflect their local working environment.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

There could be value in creating cross-cluster groups. There is some degree of risk of echo chamber creation otherwise.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Clarification might be needed on fees/remuneration - would this include travel etc.? If no this might present a barrier to LMIC engagement especially.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

This has a lot of potential to include individuals and groups with a major conflict of interest in the prevention of AMR (e.g. individuals benefitting from the sales of antibiotics for medical or veterinary use). Also a lot of people with zero specific knowledge of the problem who can be included in discussions but should not have the right to express any opinions in areas where they do not have explicit expertise. The leadership and responsibility distribution within the platform seems to be a critical point when absolute clarity is required to avoid generating another public communication disaster.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

No conflict of interest (including share-holding). Tiered or segmented inclusion based on expert level. Suggest to establish this via a series of questions during recruitment rather than by self-declaration.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Support for non-antibiotic approaches to bacterial disease management (vaccination, hygiene, animal husbandry, ethical GMO application)

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Where an individual could fall into more than one group, they should be in the group with the highest potential conflict-of-interest risk (e.g. if both private sector and academic, they should be placed only in private sector).

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

Specifically they need to be a verified expert in their field to be able to contribute to action groups. Non-experts opinions can be asked, but should not detract from the expert work.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

Additional emphasis should be put on promoting alternatives to antibiotics (vaccines, hygiene, animal husbandry, GMOs etc). Increased AMR stewardship is not going to solve this alone.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

This should be a body for real action and not just another sounding box for people who like to hear themselves. The risk that this becomes overly beaurocratic is high I feel, and the ratio of academic/research to non-experts seems far too high to be useful. It would make sense to me to generate a leaner expert panel (covering medical, veterinary, pharmacy and international relations and development) with the potential to reach out to public/private sector representatives for feedback on actions.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

interest, concern and actively participate in aspect of research, monitoring and control of AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Regulation, monitoring and information system

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

in the future might be regrouped according to the problems similarity and combating approach

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**2 - Slightly**
Please provide additional comments and/or suggestions in the space below.:	start to increase awareness for aquaculturist and policy makers through several seminar and conference

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes

Q26

If you have any additional comments or suggestions, provide them in the space below:

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

multiple areas of knowledge and aggregated knowledge integrated thinking from different areas of knowledge to implement AMR combat actions

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

best practice guidelines for best practices in combating and using medications; advocacy and information sharing; practical implementation of activities in specific areas of knowledge and in the total and global context

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Be a relevant stakeholder in the food chain supply

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All of the above, but the most important is consumer's education on the importance of prudent use of antibiotics in the food supply chains and therefore most important issue is the information presented in the marketing of any product for the "life cycle assessment of antimicrobials used in the chain bringing the product on the market" following the LCA (life cycle assessment of green house emission on products

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

We agree that the combined efforts of human, plant, and animal sectors to combat AMR is important.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We agree that it is important to have a One Health approach in order to most effectively combat the growing threat of AMR.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It may be beneficial to expand how accountability will be held.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We agree that it is important to have a broad range of members in order to cover various areas of AMR issues, as well as to obtain multiple focuses of expertise.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

To qualify for membership there should be evidence of substantial participation, knowledge, and interest within the AMR community.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Action groups should come together to create frameworks such as guidelines, as well as work toward the practical implementation. It will be important to not only have guidelines and information in place and accessible, but to be sure that the plans are feasible and can be implemented and national and local levels.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

When feasible certain groups should have an active role, unless they are maintained as administrative with oversight of the action groups. Though then they should stay involved closely with the action groups to ensure progress at national and local levels.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

We have a fully functioning microbiology lab monitoring resistant pathogens, as well as a strong antimicrobial stewardship committee with continued addressing of motives to improved stewardship and decrease resistance within our hospital system and community.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below.:

Academic and research institutions

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Gender Equality

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Importance of academic groups to disseminate information

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Commitment to foster the social awareness of the problem

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Practical implementation of activities at country or sectoral level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,
Please provide additional comments and/or suggestions in the space below.:
I agree

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,
Please provide additional comments and/or suggestions in the space below.:
I agree

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
I have no suggestions

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It's right

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Experience with or interest to work in combatting antimicrobial resistance; and more importantly in establishment of antimicrobial stewardship across all levels of care, community and the society as a whole.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Standardization of availability of Antimicrobial Stewardship programs in every healthcare setting; practical transfer of know-how in AMS

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

In addition, the healthcare providers and medical societies/community also have to be considered into these groups or as a separate group

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

If the composition is of 11 persons, than the first mention of the chair needs to be removed (chair will be elected from the PSC membership afterwards, as explained above).

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,
Please provide additional comments and/or suggestions in the space below.:
In addition, might be good to clarify the links between the action groups and the cluster groups; healthcare providers and medical community/societies need to be added to the clusters or form a separate cluster.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,
Please provide additional comments and/or suggestions in the space below.:
Provide quantitative indicators for medium and long term targets as well

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Thank you for the invitation to be part of this initiative

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

Radboudumc has established the innovative programme "Dutch Antimicrobial Stewardship: Masterclass & Expert consultancy" through which AMR is addressed at hospital level with training and coaching. Teams from interested hospitals are attending a 5-day course during which they develop their AMS programe for their healthcare setting, and aim to implement it with mentorship and guidance from Dutch senior consultants who visit and work with the teams in their local setting. The programme is running in the Netherlands, and since 2021 is being established in LMICs (starting with Egypt, India, to be followed by SouthEastern Europe, Suriname, and other countries).

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below:: Academic and research cluster, but also in the health providers' / medical professional community.

Q26

If you have any additional comments or suggestions, provide them in the space below:

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Commitment, ability and resources to take action to combat AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

BEst practice guidelines and workable implementation at the national and sectoral level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Please include local government units

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

LGUs can help in the implmentation and monitoring

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

commitment and ability to take action to combat AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

advocacy and information sharing; practical implementation of activities at country or sectoral level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Active participation in any aspect of AMR challenge

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Data sharing; Formation of multidisciplinary teams (national and international)

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

To conducting Global Action Plan(GAP) you should consider differences in internal laws of local governance across the world as a barrier in implementation of AMR activities at local level.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Mass media can play a important role in encourage of action group and cluster group to join AMR activities.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

High Authorities of every country should be selected as leader of national AMR committee for strengthening political and social commitment and ability to take action to tackle AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Other action can be request from donors group in each country to financial support of AMR activities.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Under the responsibility of TJS on AMR, an specific coordinating team is required to support AMR activities in low income countries and area with civil unrest.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

practical implementation of activities at country or sectoral level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Accountability is itself a system of norms that regulate the relations between "duty bearers" and "rights holders", who are affected by the measures taken by the first party. The mechanism of interaction between the platform and the tripartite organizations should not be based on accountability, since the Platform is a discussion expert platform for forming proposals to solve the problems of the AMR. Consequently, the Platform's activities can result in thematic reports, analytical reviews and reports, recommendations that are sent to the Directors General of the Tripartite and their governing bodies. Perhaps an explanation of this provision should be made more extended. At the same time, the work of the Platform should be ensured through a Tripartite Secretariat.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The second paragraph duplicates the content of the first paragraph. It is difficult to agree with the underrepresentation of civil society, private sector and financial institutions in the topic of AMR. Agriculture and the pharmaceutical industry mainly represent the private sector, take an active part in the implementation of the NAPs.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

The right to membership should be determined by: - work experience in the field of NAPs implementation; - participation in international projects and organizations on topics related to AMR; - work in agricultural, food, and pharmaceutical industries where antimicrobials are used and there are problems related to AMR (including the private sector); - work on scientific projects in the field of AMR, microbiology, pharmacology, infectious diseases in humans and animals, environmental protection. For civil society and financial organizations, the main criterion is their interest in participating in the work of the Platform.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level. These are very important proposals and they should be worked out on the Platform site. However, there is still a problematic issue of multisectoral interaction on the topic of AMR in the countries, including within the framework of the implementation of the NAP (exchange of information, maintaining unified databases on resistance, making complex decisions on AMR problems, etc.) One of the important issues is the integration of the environment sector into the solution of AMR issues, it is necessary to identify activities and indicators for them to be included in the GAP and NAPs.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level. These are very important proposals and they should be worked out on the Platform site. However, there is still a problematic issue of multisectoral interaction on the topic of AMR in the countries, including within the framework of the implementation of the NAP (exchange of information, maintaining unified databases on resistance, making complex decisions on AMR problems, etc.) One of the important issues is the integration of the environment sector into the solution of AMR issues, it is necessary to identify activities and indicators for them to be included in the GAP and NAPs.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

The proposed structure does not quite correctly reflect the information provided in the introduction paragraph 1 of the questionnaire. The Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA) are independent groups, but the Platform is planned as an accountable platform of the Tripartite. Therefore, all interactions of these Groups should be carried out through a Tripartite Secretariat (Coordinating Team).

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The Platform's proposals aimed at the development of the GAP, which is the basis for the development of NAPs, will be effective.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

I believe that 200 people is a difficult team to manage. It is necessary to understand how their work will be organized. More than 170 countries are already implementing NAPs, reporting to WHO on their implementation, teams of people who know the problems of AMR have already formed and are already working on the proposed goals. In this case, the Platform will be engaged in duplicating their work, and not in large-scale development of global and national efforts.

Q22

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

None yet

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Commitment

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

None

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

None

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

YES! The idea is to tell everybody so that no more unnecessary ATB are ever used

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

In my field (academics) the background of the interested person or group should be evaluated. A relatively long period working in the field means interest and formation.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Sectoral level, in our area (animal production) we need to talk directly to producers and explain as simple as possible in order to be understood and generate an impact.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Who will spread all results to public and general audience. That should be clearly defined here.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Assesment of the problem in different sectors and countries

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Disclosure of conflict of interest

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Seems reasonable. Need to somehow also recruit participants to represent areas with fewer formal organization such as companion animal medicine where stewardship is often championed by individuals at academic institutions.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Guidelines would be great and identification of areas for research calls (ideally supported by funds or at least recommended for funding support) could be useful

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The purpose of the Platform is relevant for bringing together different sectors involved in the discussion on antimicrobial resistance. Our group is made up of nationally and internationally renowned researchers in the study of antimicrobials in animal production. A platform with the proposed objective is important to assist in the discussion of actions to be taken to globally regulate the use of antimicrobials

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

all platform objectives are of relevant importance

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

"One Health" is one of the main lines of investigation of our research group

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It is important that the platform takes decisions for the collective well-being

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

organizações acadêmicas e de pesquisa em todo o espectro da One Health são extremamente relevantes para AMR

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Platform members should contribute to the scientific discussion on AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

In our institution we have a group formed by researchers who have adequate training for this discussion and carry out research in the field of AMR

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

another important action that could be implemented is to discuss the indiscriminate use of antimicrobials in animal production and try to regularize this situation

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I agree

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

I agree

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

I would exclude any private sector companies

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Independent professional organisations only

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

International guidelines for the use of antimicrobials which should be updated on a regular basis

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

Private sector partners to be excluded

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

Private Sector to be excluded

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Commitment and ability to take action to combat AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practice guidelines

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

relevance in the first place

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Practical implementation of activities

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

those in areas of AMR, antimicrobial use measurement, antimicrobial stewardship, etc

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Guidelines, support for implementation, especially in areas (like veterinary medicine) where human and financial resources for stewardship programs are lacking

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes, BUT how will these groups share information and ideas? It could be counterproductive to work only in these silos. Perhaps representatives from each group could be assigned to other groups as well

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

What do you mean by "adequately high level"? This needs to be defined? - you may be missing important voices.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Involved somehow in the use, sell, study of antimicrobials

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Investigation on the magnitud of resistance genes present in different ecosystems.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Include clearly if any conflict of interest exist

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Veterinarians, chemists, farmers and veterinary distributors

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Above to all producers both large and small-scale

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

no comments

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

no comments

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

The AGs could be organized by topic: (1) Stewardship; (2) IPC; (3) Access to therapeutics and prevention; (4) R&D; (5) One Health, etc. Each group then would use the full toolkit of advocacy, guidelines, info sharing, implementation, etc.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

Very useful to have a balance between gov't, IOs, donors, civil society, academics, & private, but why organize the CGs along those lines? See my comment above on organizing the groups based on the key topics.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

For civil society and academics, offer a stipend for members from LMICs, to support diversity and inclusion. Otherwise, this will be dominated by governments, industry, and the Global North

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

This is unclear on the "independence" of the IPEA

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes, but IPEA should have its own independent comms channels such as publication in peer-reviewed journals and issuing reports, in addition to the description above

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

No numerical targets other than 200. I would set medium-term targets of: (1) choose 3-5 target metrics (i.e., what we will measure, akin to CO2 levels or global temp rise. Not the numerical target itself, but get agreement on the thing we will attempt to quantify. Long term target: set numerical goals for these targets and measure progress globally, with adjustments as needed based on IPEA

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

I would like to speak to the team working on IPEA

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆

5 - Fully

Please provide additional comments and/or suggestions in the space below.:

CARB-X is the world's largest charitable supporter of preclinical antibacterial product R&D, including therapeutics, vaccines, and diagnostics, with a budget of approximately $100M/year, supporting 60 product development teams in 12 countries.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,

If yes, could you please specify?Please provide additional comments and/or suggestions in the space below.:
R&D (in your categories, both academic networks and civil society)

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

It should be open also to individuals interested in AMR

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

interest to combat AMR

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

guidelines, information sharing, continuous training, awareness campaign

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Individual to include in Civil society organizations and networks as distinct entity

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Experience working in the relevant sectors. Emphasis on including decision makers

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

No,

Please provide additional comments and/or suggestions in the space below.:

Would prefer paid staff to putting the burden on action groups. Action groups should serve as reviewers

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

advocay do donors and government, information sharing, contextualization of outputs

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

Would like to see less silos between action groups and other stakeholders

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Long term goals should go beyond committments. Perhaps enacted pollicy

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Good governance models under the Triple Helix Academia-Industry Government Nexus would be introduced for establishing productive linkages among the stakeholders.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Traceability of the products across the food value chain would be provided its due importance in the implementation strategies.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The lethargy and hostility of the public sector organizations may impede achievement of the objectives so the civil society and private sector would be provided appropriate access to the activities of the Forum.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The country heads may be influence by the powerful local stakeholders, providing biased opinion.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The civil society and private sector must be provided due representation in the membership process.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Master degree in any social or natural science and active involvement with any private or public sector organization or civil society.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Implementation status of the best practices, state of preparedness of the stakeholders and management of database of traceability of products, may be compiled and shared.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The Global partners requesting as well as to develop regional platforms

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

requirement most include the professional responsible use medicines

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Awareness creation on the AMR

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

no

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Our activities are defined by beekeeping. Since the population of bees as a pollinating insect is declining. It is necessary to study the diseases that prevent their development.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Collaboration with various organizations is one of our goals

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Organizations that actually operate

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:
Information in a lay-friendly way, using a range of appropriate channels, and following health literacy and numeracy principles is important to encourage awareness and build knowledge among lay persons (including patient advocates, patient organisations and other civil society actors). Our experience shows that awareness of the magnitude of the threat of AMR and its implications is low. Having easily accessible lay-friendly, factual information would be a cornerstone towards enabling meaningful engagement by civil society and the general public.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

As above, open communication of key messages will be key to foster civil society engagement. Inclusivity also means reaching out to those people who are marginalized or whose voices are less hears; civil society organisations are an important conduit between the people whose interests they represent and institutions.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

We believe that a commitment to some level of accountability towards civil society organisations and other stakeholders that contributed to the Platform’s work should be included. Adding this extra layer of accountability would enhance the Platform’s democratic structure. I would also enhance trust towards its structure, in turn fostering the scalability and implementation of its work.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Although we welcome that the platform is open to the participation of private sector partners affected by AMR, it should be ensured that its work is not dominated by industry's concerns, or that the topics tackled are focused around public health objectives. This is a concern because in our experience the disparity of available resources between commercial organisations and civil society or public bodies can be huge and can inadvertently impact the outcome of, on the face of it, "equal" conversations.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

We believe that Members should be stakeholders who are affected by AMR directly, who represent other stakeholders affected by AMR, or who can substantially contribute to tackling AMR. In addition, applying members should be able to prove some previous work (e.g., articles, statements, or other forms of contribution) on AMR that they may have carried out in the past.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

To ensure meaningful involvement and equal contributions, and to avoid action groups being dominated by private actors, we would recommend that certain supporting structures should be put in place to enable civil society organisations, which often work with extremely limited resources, to engage in these groups. These can include but not be limited to enough time (e.g., for internal consultations), targeted communications, compensation if available, and dedicated consultations with civil society.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

We suggest the following: -Best practice guidelines (particularly on how to engage with those stakeholders that are at the forefront of AMR, such as patients and the medical professions). -Activities aimed at fostering the advocacy capabilities of participating stakeholders (both within their membership, if they have any, as well as in front of other international stakeholders). - Capacity-building, including for civil society

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We agree that disclosure of funding sources is necessary to ensure transparency and avoid conflict of interest. The process should be kept as simple as possible with clearly defined criteria. We would like to point out that not reimbursing members the costs they may have incurred as part of their work within the Platform may systematically exclude those with more limited capacity (especially some civil society organisations).

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Balanced representation of stakeholders on the SC should be ensured.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The possibility of attending the meeting virtually should always be offered to participants, with the view to increase participation rates (regardless of if the meeting is taking place physically too, or not).

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Please see our comments on the need of appropriate and targeted communications for lay people, above.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

We agree with the above but would like to emphasise the need for evaluation. Some key indicators should be agreed on to gauge impact over a specified time period.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

NO

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆ **2 - Slightly**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
“Civil society organizations and networks”

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

A global vision is essential.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Implemeting coordinated global/collective actions are exteremely important to control the AMR issue.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Transparency and information are essential.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Membership should be agreed on the indication of past actions aimed to fight AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Practical implementation of activities at national or international level.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes as a principle, but avoid complexity.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

The Swiss Round Table Antibiotics is very interested to a membership.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**5 - Fully**
Please provide additional comments and/or suggestions in the space below.:	The aims of the RTA are 100% compatible.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes,
Please provide additional comments and/or suggestions in the space below.:
Yes, very interested.

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below.:
Civil society / economic issues (R & D)

Q26

If you have any additional comments or suggestions, provide them in the space below:

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

No,

Please provide additional comments and/or suggestions in the space below.:

The assumption behind the Multi-Stakeholder Partnership Platform is that convening a diverse set of stakeholders across the One Health spectrum will strengthen a “shared global vision,” build consensus, and contribute to the implementation of the Global Action Plan on AMR. A more efficient approach to all of the above might be in identifying the coalition of the willing around strategic priorities. Even more important, it might be critical not to assume that coalescing around what are areas of consensus will necessarily address strategic priorities for tackling AMR, but instead may serve as a needless distraction. In fact, it is quite likely that actions contributing to the Global Action Plan on AMR will require resolving differences among key stakeholders, not all stakeholders. Yet the Platform proposes to recruit as many as 200 groups in the first phase of its efforts; has no clear principles to which participating stakeholders must be committed; and has no process for resolving, let alone defining, consensus (are we talking unanimity or overwhelming majority?). The IACG report, No Time to Wait: Securing the Future from Drug-Resistant Infections, called upon “All stakeholder groups – including governments, civil society and the private sector – need to be engaged and to collaborate in an unprecedented effort across the human, animal, plant, food and feed production and environmental sectors, based on a shared vision and goals.” However, “Stronger political leadership, advocacy, coordination and accountability are needed at all levels to enable a sustained One Health response to antimicrobial resistance.” The IACG indeed meant accountability at all levels, but none of the three component parts of global AMR governance—the Global Leaders Group on AMR, the Independent Panel on Evidence for Action against AMR (IPEA), or the Multi-Stakeholder Panel—are set up to hold the Tripartite Agencies—the key implementers of the GAP on AMR—accountable. This is a serious shortcoming. The IACG not only called for the creation of a Multi-Stakeholder Platform, but also for strengthening the role of civil society groups in “accountability, advocacy, planning, monitoring progress and ensuring responsible and prudent use of antimicrobials.” Yet as the one policy venue in the proposed AMR governance structure, where civil society groups might be potentially well represented, the Multi-Stakeholder Platform seems moreso to stand behind the Tripartite Agencies as part of a consensus than as constituents to which the Tripartite Agencies might be held accountable.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

No,

Please provide additional comments and/or suggestions in the space below.:

“Are the objectives of the Platform relevant?” is not answerable as a binary question. If this refers to the linkage between the three specific objectives and how they contribute to GAP and NAPs, the answer may be different for each of the three quite different objectives. Taking each in turn, the Platform could certainly support these objectives. However, these three objectives are neither necessary, nor sufficient to achieving the GAP and NAPs on AMR. After all, key barriers to tackling AMR often involve conflicting interests among stakeholders—antimicrobials used as growth promoters in food animal production; lack of commitment to controlling antibiotic pollution from hospitals or pharmaceutical manufacturing plants; misaligned economic incentives for prescribing antibiotics or paying for wastewater treatment. Agreeing on a shared vision is not meaningful unless there is also consensus, or at least commitment among key stakeholders, to implement a common approach to achieving the agreed-upon vision. Regulatory measures or tax-supported interventions may not draw a consensus, but might well be the optimal and needed approach to be taken. If the Multi-Stakeholder Forum just results in the paralysis of consensus, it will be a disservice to advancing the GAP and NAPs on AMR. As an objective, information sharing and networking are worthwhile. However, this should not substitute for ongoing, timely, and greater transparency and opportunity for public input into the Tripartite agency work and other global governance on AMR across the board, including of the Global Leaders Group on AMR’s Action Plan, priority setting and development of key performance indicators. We would also encourage the Tripartite Joint Secretariat to use these information-sharing sessions to discuss progress and accountability on their part to well-defined milestones in efforts to tackle the intersectoral challenge of AMR. Taking action similarly may or may not have value. Collective engagement limited by consensus among those with interests that run contrary to public health concerns on AMR could both distract and waste limited resources that otherwise could have been spent mobilizing a less inclusive, but more powerfully effective coalition of the willing. With a hoped-for membership and consensus among 200 organizations, the structure proposed for the Multi-Stakeholder Partnership Forum risks paralysis or worse yet, diversion down unproductive paths. One partial solution might be to work instead to empower public interest, like-minded civil society groups to carry forward projects that promise effective change, even if there is no consensus from all parties. Governments, even the

Tripartite agencies, shy away from being held accountable, and private sector interests also defend at times their short-term economic interests over public health concerns. The IACG recommended clearly for the “systematic and meaningful engagement of civil society groups and organizations as key stakeholders in the One Health response to antimicrobial resistance at global, regional, national and local levels.” This includes the “provision of political, financial and technical support for civil society organizations to enhance their engagement, including for work with governments while keeping their independence.” We do not know if the Multi-Stakeholder Partnership Forum could accommodate this, but there ought to be multiple mechanisms, including with the Tripartite Agencies more directly, that should make good on this IACG recommendation. Beyond the three objectives put forward, there ought to be more ambitious ones, such as reviewing the progress of the Tripartite Agencies towards achieving the milestones benchmarking implementation of the GAP on AMR and mobilizing sufficient resources and financing for such implementation.

Q9

Are you supportive of the Platform's guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

No,

Please provide additional comments and/or suggestions in the space below.:

We do believe that these "guiding principles" speak to both operational and strategic approaches to tackling AMR, but they fall far short of what might be called guiding principles. A multisectoral and multidisciplinary systems approach is useful to take into account when designing, prioritizing and harnessing resources from AMR-sensitive intervention approaches. For example, an integrated, One Health AMR surveillance system can more effectively track the emergence of new drug-resistant pathogens across healthcare delivery, food production, and environmental systems. There may be co-benefits from developing a low-cost, rapid, point-of-care diagnostic in dual markets that serve remote healthcare clinics or points in the food production supply chain. A global wastewater surveillance network might piggyback on infrastructure still in place from poliovirus surveillance, already now being tapped for COVID-19 surveillance efforts. At the level of priorities, work plan and Plenary reports, transparency and open access are part of basic good governance practice. However, the transparency required should extend to how the Tripartite Agencies and other governing bodies notably the Global Leaders Group on AMR relate not just to members of the Multi-Stakeholder Partnership Forum, but to the public more generally. Insofar as these other governance structures hope to tap the collective support of the stakeholders involved in the Forum, there needs to be reciprocal transparency of how they set their priorities, work plan, reports, and importantly, measures for accountability (e.g., how the Key Performance Indicators of the Global Leaders Group on AMR relate to AMR priorities, when public reporting might emerge for the indicators in the 2019 Tripartite Monitoring and Evaluation Framework). On its face, inclusivity may strike some as egalitarian. Of course, it is not for those who understand the principle of equity. In fact, the Multi-Stakeholder Partnership Forum would have to work much harder to lift up the voices and perspectives from civil society and low- and middle-income countries (LMICs). Some parts of the industry, notably the research-intensive pharmaceutical companies and their trade associations, have had little difficulty accessing and influencing policymakers at all levels. By passing these costs onto consumers and the public sector through sales of their products, they also can afford to attend in-person meetings, find staffing to ensure that their perspective on project implementation carries the day, and fund reports to sway the direction of policy efforts. Such resources do not abound for civil society groups or LMIC country governments. So the principle of inclusivity actually risks

fostering greater inequity, paving unequal access to Tripartite and other governance structures, unless steps are taken to level the playing field. Such efforts to level the playing field were, of course, the impetus behind the IACG recommendation to provide “political, financial and technical support for civil society organizations to enhance their engagement, including for work with governments while keeping their independence.” We recognize that it is challenging to lay out a set of guiding principles for such a diverse group of stakeholders. Even the guidance from the Tripartite Agencies on the use of antimicrobials in food animal production is not consistent, even though the “WHO Guidelines on Use of Medically Important Antimicrobials in Food-Producing Animals” came out in 2017. However, we do believe that true guiding principles on tackling AMR that offer clear direction, not just process points on good governance, are possible. It may be a work in progress for the Multi-Stakeholder Platform to undertake, particularly around potential projects where key stakeholders are willing to act collectively to take up new, catalytic approaches to address this global health and development challenge. Founded in 2014, the Antibiotic Resistance Coalition brought together an intersectoral coalition on these issues ahead of the WHA’s adoption of the GAP on AMR. This diverse group of stakeholders was able to arrive at a set of guiding principles in its inaugural Declaration on Antibiotic Resistance, upon which its members, now comprised of over 25 of the world’s leading public interest NGOs in this space, continue to build joint positions and actions.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

The responsibility for the performance, success or failure, and return on investment to participants in the Platform certainly does involve ensuring that the Tripartite Joint Secretariat on AMR is accountable to the Directors-General of the Tripartite and their governing bodies. However, this is not the accountability principle that should be guiding the work of the Multi-Stakeholder Partnership Forum. The real question is in what way will the Platform be accountable to those who volunteer their efforts in support of a “shared vision”. Furthermore, such a principle suggests an inequitable relationship between the Tripartite agencies and partner organizations in the Partnership Platform. After all, why would other UN agencies (e.g., UNICEF, UNEP and UNDP) in the global governance of AMR consider their AMR efforts as “ultimately accountable to the Directors-General of the Tripartite and their governing bodies”?. Instead, the accountability principle should consider how the Tripartite agencies and key implementing agencies might be held accountable to multiple stakeholders to clear milestones for making progress to address AMR and to mobilize financing for such efforts.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

Membership implies those who are inside and those who are outside of the work of the Multi-Stakeholder Partnership Forum have differential access and opportunity to contribute. That signals the opposite of inclusivity and of transparency and open access. Many civil society groups and LMIC groups might be enlisted for specific projects, but would have little reason or bandwidth to join a Multi-Stakeholder Partnership Forum with such unclear tangible direction or resourcing. Yet keeping the doors open, the Forum could build over time such projects that might draw new partners, local stakeholders, and others who may not initially have imagined that they could contribute to addressing AMR. Instead of a cumbersome bureaucracy, it could become a place where those with visionary approaches could recruit, with Tripartite Joint Secretariat support, new partners. What lessons could the Tripartite Joint Secretariat learn from efforts like the "Save Lives: Clean Your Hands" campaign that has enlisted over 23,000 healthcare facilities from around the world? The architecture of the Multi-Stakeholder Forum should be less focused on accommodating 200 stakeholders, but more committed to mobilizing the 20,000 that might be enlisted on campaigns. It is unclear what are the benefits of membership, and we would argue that this should not take the form of restricting access to policy briefings or the opportunity to contribute to potential projects on AMR by non-members. The benefits of membership could be in what the Tripartite Agencies in supporting this Forum as part of the AMR governance structure can do to advance the collective work of its members. While we do not support this as the only approach by which the Tripartite agencies might support the work of civil society groups, it would be useful to learn what resources—technical and financial—that the Tripartite Agencies, plus other governance bodies, might bring to facilitating Forum efforts to tackle AMR. The Antibiotic Resistance Coalition sees value in like-minded groups working together. However, we have many reservations over how the Action Groups and Cluster Groups might be set up. If made overly inclusive, it will freight the work of Action and Cluster Groups with unnecessary transaction costs, and we know well that industry groups have done exactly that in many policy processes. This will just result then in such work being taken outside of the auspices of the Forum as we already have effective, alternative channels for bringing together intersectoral partner organizations. So the value-added benefits of membership require a much clearer definition and deeper thought.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

As noted in the response to question 5, the Antibiotic Resistance Coalition has reservations over the notion of membership. It is at odds with the proposed “guiding principle” of inclusiveness and transparency and open access and erects a divide between those who might join and those who might be precisely the strategic partners that need to be recruited to advance efforts to address AMR, but who do not presently see AMR as a priority to which they can contribute meaningfully. So we would recommend rethinking membership and the unwieldy bureaucracy that the Forum’s proposed structure would entail. Maintaining this structure will be a huge drain on the limited resources of the Tripartite agencies and those involved as members. We should be focused on how to mobilize efficiently and speedily stakeholders that might make an actual difference in advancing AMR. Perhaps the Tripartite Joint Secretariat could put out examples of how they might support and facilitate the collective action of stakeholders in this policy space, and self-identified Action groups could step forward and request such resourcing under the Forum. At the start, these Action Groups might have limited membership, but as plans mature and with the nurturing support of the Tripartite Agencies and other governance bodies, they could over time bring on board a wider set of stakeholders. The Forum could provide varying levels of support, depending on its available resources and also the likelihood that the project might catalyze progress in addressing AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

No,

Please provide additional comments and/or suggestions in the space below.:

The proposed vision for the Action Groups poses significant risks. If every Cluster Group must be represented and consensus is a prerequisite for taking action in each Action Group, then there remains a risk that this will do more to prioritize low-hanging fruit, where consensus already exists and where little value add would come from bringing together such stakeholders in the Forum, rather than high-yield activities. Under these operating rules, the Forum would not provide a safe space for like-minded groups to find common cause in an Action Group or enable a period for maturing ideas before those opposed might slow progress before the Forum could bring value add to the process by gradually recruiting likely supporters or even groups that might not know of their potential contribution to such a project. As already noted, the inequity across different stakeholder groups in having the staffing, time, and resources to join Forum activities is already considerable. The focus on year-round work “to prepare documentation, data and other evidence for the Plenary sessions” is not likely to be an invitation that most civil society groups or LMIC stakeholders are going to find attractive. Perhaps this calculus would change if the Forum’s vision made clear what is the value add of participating and what resources the Tripartite agencies plan to bring to the Forum’s work.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Given the currently proposed process, the Action Groups risk focusing on only areas, where there would be ready and likely existing consensus as well as already aligned or available, if minimal, investment. These might be productive activities, but these might not be catalytic, game-changing efforts. Worse yet, such activities might distract or take up limited resources from activities that might be. As for best practice guidelines, there certainly is value in identifying case studies of successful approaches to tackling AMR and sharing how such approaches might be scaled or replicated in similar settings. Of course, we would caution that this should not loosely be construed as the kind of practice guidelines involving clinical decision-making, the appropriate use of antimicrobials in food production, or regulatory limits on environmental discharge. Such practice guidelines require review of scientific evidence, expert evaluation and analysis, and careful consideration of context. These are best left to the work of the formal guideline processes, such as at WHO, or the soon-to-be-announced Independent Panel on Evidence for Action Against AMR.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

We are unclear as to how the proposed classifications by which Cluster Groups might be constituted would work. The Antibiotic Resistance Coalition is comprised largely of civil society groups working across healthcare, food, and environment sectors and a leading intergovernmental think tank with 52 Member States, but has a Secretariat housed in one ReAct's nodes (a network of regional nodes headquartered in both academic and non-academic institutions). All of our members strive not to have financial conflict of interest that might unduly influence their work on behalf of the public's interest in AMR. So should the Antibiotic Resistance Coalition consider membership as a whole in the Civil Society Action Group, or also in other Cluster Groups? We remain concerned as well that the "Civil Society organizations and networks" Cluster Group will face the same challenges that the WHO's Non-State Actors designation has posed for years at the World Health Assembly. The only difference is that industry-aligned groups will have a seat at the table in both the "Private sector partners" group and also in the "Civil Society organizations and networks" Cluster group. Their presence in the latter could further vitiate the value of coming together under the Forum's auspices. The attention to geographical, gender and sectoral balance across the One Health spectrum is useful when applied appropriately in context. Not every group, no matter how small, will have such representation, and it is a burden—particularly on those groups that are relatively under-resourced—to be called upon to be represented in every such Platform, Action or Cluster Group, whether value-added or not to their mission. Some initiatives also might be better focused on a specific geography or within a particular sector, and these might or might not benefit from an enforced effort to check off the box of broad representation, especially when there are more compelling issues of equity at stake.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

As we have detailed in other responses, there appears to be an undue emphasis on the entitlement of members rather than the inclusivity, transparency and open access of the Forum's work, and insufficient emphasis on how to build the value add of Forum deliberations. Civil society groups should have the right to designate who might best represent their organization and best positioned to support the work of the Forum. For particular Action Groups, this might well devolve upon an individual skilled in that particular area, but not necessarily "high-level." This description of proposed roles and responsibilities of members lacks a clear understanding of how to mobilize the resources of participating organizations and weighs unduly non-relevant factors, like leadership status over technical expertise. Different Action Groups may call for different representatives of organizations participating. We would not want, for example, the best practice guidelines set by leaders who have no direct familiarity with the best practices implemented by actual, on-the-ground staff. While remuneration is not expected for most Platform activities, it is important to have clarity as to whether the Forum would work to level the playing field, for example, by providing reimbursement for travel expenses for non-profit, civil society groups without the means to participate in Forum activities, where possible. Also some projects from Action Groups may result in activities that might become fundable by outside donors, and civil society groups should not be denied the opportunity of receiving such support, especially if they were instrumental in developing these efforts. However, we are agreed that transparency of Member financing would be important if such funding might result in significant bias in the workings of the Forum's Platform activities. However, we believe the paperwork and need to know legal status, governance, membership, sources of funding and activities should be commensurate with how such information helps to determine financial conflict of interest in the Forum's activities. Otherwise, this again will act against the interests of equitable participation by civil society and LMIC stakeholders by imposing another bureaucratic hurdle. Most of the Forum's activities do not involve policy decision-making or expert guideline development, nor should it, so it would be important not to burden unnecessarily participation with paperwork.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

The Platform Steering Committee could offer useful coordination of the Forum's activities. However, its structure limits Action Group representation to three leads, despite the fact that most of the collaborative work is meant to unfold through Action Groups. So commitment to engaging in Forum activities may not be matched by the opportunity to participate in its governance. Yet governance is weighted heavily towards five Cluster Group leads, each of which are likely to be quite heterogeneous and not easily represented by any single stakeholder organization, and the three Tripartite agencies. The Tripartite agencies also should be playing a support role for Forum activities, but by also holding a governance position, undermine the Forum's ability to ask for greater accountability of these agencies on making progress on tackling AMR. It would be much more strategic if the Tripartite agencies removed themselves from the governance structure, allowing for other intergovernmental organizations to step up. By focusing five Cluster Group leads, it also is entirely possible that the breadth of civil society groups, which is breathtakingly broad, might be limited to just one group, and low- and middle-income stakeholders might be missed entirely in the governance structure. The proposed role and constitution of the Platform's Steering Committee focuses more on process than action. Its description is somewhat opaque about what support the Tripartite agencies would provide. Without that support, those stakeholders with the most to offer might not have the resources to take on all of the administrative tasks, whereas those stakeholders with the most financing behind them might have little trouble taking over the Forum for their purposes. Maybe the Forum governance might be developed stepwise, lifting up those most constructive and contributory to its mission.

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The goals of the Plenary Session sound fine if these activities emerge organically out of the Forum's activities. If there are important differences that surface from the consensus discussion process, lessons that might come from Action Groups that actually took action, or opportunities for coordination that otherwise would not have arisen outside of the Forum's facilitation, the Annual Plenary Session would be an excellent venue to bring these forward. However, if the Plenary Session becomes one more show-and-tell gathering of stakeholders every year on AMR, we would not want key stakeholders nor the Tripartite Agencies to be distracted from more meaningful efforts to address AMR. While we may still have a dearth of novel antibiotic classes, we most assuredly do not have a shortage of such meetings on AMR to attend. Again given limited resources among civil society groups and stakeholders from LMICs, we are concerned that the Forum's Annual Plenary Session not become an end unto itself, rather than the culmination of productive efforts by the Forum. So long as the Annual Plenary Session does not substitute for year-round, actual work on Forum activities, we are supportive of such efforts to exchange, share and inspire activities on AMR as well as to forge new, catalytic collective action on AMR.

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

The appropriateness of the structure depends on the relationships among these entities, and importantly, how collectively this ensures accountability to achieving milestones towards the GAP on AMR. The Global Leaders Group has been issuing brief position statements, but without the backing of expertise and evidence that might be recruited through the Independent Panel on Evidence on Action. The GLG has also called on a broad range of stakeholders, without clear target or strategy, to curb, but not ban the use of antimicrobials in food production. However, it does so without having mobilized constituencies that might draw upon members of a Multi-Stakeholder Partnership Forum. The locus of responsibilities for priority setting, coordinating, and mobilizing finances for the work ahead, let alone strategic planning, are unclear. The limitations of the Multi-Stakeholder Partnership Platform were detailed earlier. For accountability to hold, the Tripartite Agencies should be in a supporting, not governing role, if their progress is to be held to independent review by any of these entities. Instead, they serve on and as Secretariat to these entities. So which of these entities is in a position to ask and hold publicly accountable a Tripartite agency to milestones that would mark progress on AMR? Absent that, who can independently make the case that their work is deserving of greater resources, even within their current budgets? Another way to assess the appropriateness of the structure is to ask what role each of these entities might play in aiding, accelerating or amplifying specific, key projects to advance the work to tackle AMR. Is the sum greater than the parts? The non-centrality and non-specificity of governments and international organizations, international financial institutions, civil society, universities and research institutions, and private sector are certainly not intended, but being lumped into a single box, one might also ask how might these entities actually relate to the multiple entities that comprise a global AMR governance structure.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

The focus on how the Platform might serve to bring IPEA conclusions and evidence to the attention of priority stakeholders is but one strand of a much larger need for any proposed communications strategy. The Platform is not just an instrument to be used, without a clearly reciprocal relationship. How does the Platform's work inform and set priorities for attention by the GLG or key issues for the IPEA to consider? How does it ensure that financial conflict of interest is managed in its own deliberations, so that its inputs to the GLG, IPEA, Tripartite agencies and other global governance structures will carry the weight of the public's interest and not just the advancement of pecuniary interests? Little has been shared in this Public Questionnaire of how the Tripartite agencies will be accountable to the public through entities, like the Platform, or through other public consultation and Monitoring and Evaluation processes. Yet without the Tripartite agencies demonstrating commitment and progress towards addressing AMR in these various entities, mobilizing resources, financing and support for its work will be challenging.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

Apart from attracting over 200 members for the Platform in the first year, it is impossible to gauge the value, let alone the content, of these targets. We have already noted reservations over structuring the Platform as a closed plenary, no matter how seemingly inclusive, of 200 or whatever number of members, as opposed to a dynamic coalition of partners working towards actual, concrete and catalytic projects. However, the targets as proposed are troublingly vague. For the organizers of the Platform, are there not any priority goals that might serve as initial guideposts or even examples of what is envisioned as part of the shared vision, opportunities for mobilizing finances, or even collective focus of the Tripartite agencies working towards One Health efforts? Is there a framework for priority setting that might unify and guide the Platform's efforts? Change is a vector with magnitude and direction. The above targets suggest the need for a greater magnitude of efforts, but of the many directions this momentum might take us, where is the compass for the direction?

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

No, we have provided feedback under other items that cover what we might have volunteered here. Clearly, the range of concerns flagged over the proposed structure and governance of the Multi-Stakeholder Partnership Platform requires significant changes and overhauling, if not further consultation and discussions with key constituencies, before it should proceed.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆ **5 - Fully**

Please provide additional comments and/or suggestions in the space below.:

The responses to this Public Questionnaire, in the timeframe allotted, have been reviewed and endorsed by the following organizations, all members of the Antibiotic Resistance Coalition: 1. Alliance to Save Our Antibiotics 2. Food Animal Concerns Trust (FACT) 3. Health Action International (HAI) 4. Health Care Without Harm (HCWH) 5. IFARMA Foundation 6. Initiative for Health & Equity in Society (IHES) 7. Natural Resources Defense Council (NRDC) 8. Pan-African Treatment Access Movement (PATAM) 9. People's Health Movement (PHM) 10. ReAct-Action on Antibiotic Resistance 11. Third World Network (TWN) 12. Universities Allied for Essential Medicines (UAEM) By way of background, the Antibiotic Resistance Coalition is comprised of a diverse range of organizations, mostly from civil society, and to varying degrees, each Member organization works on dimensions of AMR. To name a few examples— Our Members have sat on global advisory bodies, including the UN IACG, the Global Leaders Group, the Codex's Task Force on AMR, and the WHO STAG on AMR. Members actively engage with government policymakers in different venues: --ReAct Africa hosts an annual conference for African governments on NAPs on AMR --EPHA and HCWH organized a Members of the European Parliament Interest Group on AMR, and --The People's Health Movement maintains the WHO Watch that tracks the Executive Board and World Health Assembly meetings. Our Members are actively working across the intersectoral dimensions of AMR. --Examples include the Centre for Science and Environment's virtual conference on Containing the Silent Pandemic this year, and ReAct's Strategic Policy Program and ReAct Asia Pacific convened food groups together in Bangkok a few years ago to plan strategy and hear perspectives from our Asian NGO colleagues. On the innovation and access side, we contributed to a consultation on SECURE, the newly proposed idea of a new pathway to bring and procure key antibiotics coming to market. We also have lifted the issue of antimicrobial use in crops through discussions with CABI and CGIAR. Many of the ARC members are engaged in accountability work. This includes multiple ARC members under the U.S.-based Keep Antibiotics Working Coalition, in their Chain Reaction Scorecard tracking procurement practices of the leading restaurant chains. The Alliance to Save Our Antibiotics has tracked UK leading grocery store chains, and CSE had its double standard report of multinational food franchises. Third World Network and Public Citizen are among civil society leaders on the COVID-19 vaccine access issues. Finally, we engage with the Tripartite agencies on a whole range of fronts: -- in expert consultations (as in food production diagnostics, the Monitoring and Evaluation Framework and Behavior Change); --in WHO efforts in Fair Pricing Forum, World

Antimicrobial Awareness Week, and Regional office activities, as well as in WHA Side Event; --and prior to 2020, we used to have an annual WHO-NGO Dialogue and partnered with WHO in staging the Innovate4AMR global student design competition.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Not sure,
Please provide additional comments and/or suggestions in the space below.:
We eagerly look forward to seeing how the Tripartite Agencies take up concerns and issues raised in this feedback on the Multi-Stakeholder Partnership Platform from the Antibiotic Resistance Coalition, so that we can effectively gauge how best we might contribute, what form that might take, and whether we have the bandwidth and resources to participate. The Coalition's members hope to learn more about how the Tripartite agencies will address particularly issues of equity in participation by civil society groups and LMIC stakeholders; support projects conceived and nurtured under the Forum's efforts; and provide an opportunity for the Tripartite Agencies to share their challenges in being accountable in making milestones and progress on the GAP on AMR.

Q25

Do you identify yourself in one of the clusters? (optional Q)

Not sure,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below.:
The Antibiotic Resistance Coalition sees itself as a potential member of one or more Cluster Groups, as currently defined. Our diverse membership includes groups that could be classified as civil society (e.g. Alliance to Save our Antibiotics, Consumers International, Keep Antibiotics Working, European Public Health Alliance, Health Care Without Harm, IFARMA, Instituto Brasileiro de Defesa do Consumidor, Pan-African Treatment Access Movement, People's Health Movement, and Third World Network), intergovernmental organizations (e.g., South Centre), and academia (e.g., American Medical Student Association, ReAct network's regional nodes, and Universities Allied for Essential Medicines).

Q26

If you have any additional comments or suggestions, provide them in the space below:

The Antibiotic Resistance Coalition also has concerns about the way in which the public questionnaire process for the Multi-Stakeholder Partnership Forum is being conducted. First, by making the submissions confidential, the process for shaping the governance of the Forum is not transparent. Ironically, a key guiding principle put forward for the Forum is transparency, yet when it comes to setting the governance of the Forum, the inputs are wrapped under the cloak of confidentiality. This is not an auspicious start to the transparency that is a cornerstone to good governance of the Forum. Previous consultations by the Tripartite have operated in a more transparent manner (e.g., the publication of all comments received and with attribution to those submitting this input for the Terms of Reference for the One Health Global Leaders Group and the Independent Evidence Panel for Evidence). By not making the submissions to this Public Questionnaire transparent, this seems like a step backward at a time when the Global Leaders Group's deliberations in developing its Action Plan was similarly not transparent. It also hides whether consultations are being held to "check the box" of having done so, but without meaningful inputs from key constituencies. To correct this misstep, we would recommend that the Tripartite Secretariat ask all of those submitting comments whether, in retrospect, they would be willing to post publicly their submission to this Public Questionnaire and that regardless, the Tripartite Secretariat make transparent the percentage, by Cluster Area, of those refusing to make their submissions available in a public posting. Rather than sharing all submissions on a public website, the results of the public discussion will only be reported in aggregate. We urge the Tripartite Joint Secretariat to post all submissions and to consider only those that are made transparent and that are attributed to an individual or organization. In its aggregate reporting, it would be important to provide information that allows potential Forum participants to assess whether inputs came in from all quarters, notably from civil society groups and LMIC stakeholders. For its part, the Antibiotic Resistance Coalition will post on a public website its comments submitted as part of this Public Questionnaire process.

Q6

Country:

Switzerland

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Yes, but in addition it should also be accountable to other stakeholders (especially citizens and the public), as ultimately the platform, the Tripartite and its governing bodies are publicly funded entities.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

AMR is truly cross-sectoral and we need more supporters, not only at global, but more so on local and individual levels. But, defining criteria for membership might be a very hard task. If we are to tackle the AMR sooner rather than later, it's very relevant to involve as many stakeholders as possible, particularly at local and national levels. Some of the main drivers of AMR (e.g. antibiotic misuse, lack of IPC) are behaviour-related and need to be addressed at individual/settings level (in addition to policy-level for creating enabling environment). This entails enabling wide membership approach, whereby - besides the sector in which the institution/organisation belongs - the applicant will also have to either: 1) prove previous activities and commitments to combatting AMR (these would be experience-sharing members) or 2) be able to demonstrate interest and willingness to contribute to the combatting AMR (new stakeholders to widen the fight, expand awareness etc.). Our AMR Patient Alliance brings together patient and citizen organisations who already work in the field or are interested to expand their work in the area of AMR.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All mentioned above are very relevant actions. In addition to the above: 1) Enlist all repositories with useful information materials - Our AMR Patient Alliance is creating a repository of useful educational and advocacy materials for patients, patient groups and civil society; similar knowledge hubs exist from other sectors (e.g. academia: University of Oxford; industry, etc.). Some of these are available in several languages; 2) Create implementation research program that will pilot-test and upscale successful interventions

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It's just not clear where the chair will be coming from, i.e. which category of SC membership. As it is written, the chair is listed by position, and all others are listed by category (i.e. tripartite, cluster or action group), which means that the Chair would have to be appointed before/during the election of the SC, and not be elected by the other SC members (as it is written now). To resolve this, the words "...a Chair.." in the composition should be removed (since the chair is a position that is elected after the SC is composed).

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

In addition, other elements in the fight of AMR and in setting up Antimicrobial Stewardship need to be considered, especially in the medium- and long-term targets

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

Thank you

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

No,

Please provide additional comments and/or suggestions in the space below.:

MSF AC applauds the efforts of the Tripartite Organizations in leading the development of this critical work on evidence-based global governance. As it is paramount for global and national policies governing access to and stewardship of antimicrobials, as well as incentive frameworks for research and development (R&D) to be catalyzed by an independent comprehensive partnership platform, MSF AC is keen to engage in this discussion for the benefit of patients and communities around the world. To that end, we put forward some points for consideration regarding the AMR Multi-Stakeholder Partnership Platform (the Platform). When defining the governance architecture to tackle AMR, the Inter-Agency Coordination Group on AMR called for creation of a Multi-Stakeholder Platform alongside increasing the role of civil society groups in “accountability, advocacy, planning, monitoring progress and ensuring responsible and prudent use of antimicrobials.” Yet as the one policy venue in the proposed AMR governance structure, where civil society groups might be potentially well represented, the Multi-Stakeholder Platform seems moreso to stand behind the Tripartite Agencies as part of a consensus than as constituents to which the Tripartite Agencies might be held accountable. Furthermore, the Platform with the unclear said complementarity between the Platform itself, the IPEA and the GLG in an absence of consensus-creating mechanisms in a diverse group of stakeholders risks falling short of an intended fulfilment of its purpose.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

No,
Please provide additional comments and/or suggestions in the space below.:
see above

Q9

Are you supportive of the Platform's guiding principles?
Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

No,
Please provide additional comments and/or suggestions in the space below.:
The appropriate treatment of commercial interests in evidence generation, global governance and partnerships
MSF agrees that all relevant actors must be engaged in this process, while ensuring the red lines between their roles and responsibilities. MSF urges the Tripartite Organizations to practically address the form of participation of those stakeholders in science-policy, policy-practice and partnership arrangements where conflict of interest concerns arise, eg. misaligned economic incentives for prescribing antibiotics or unethical promotion of antibiotics, as it is not explicitly addressed in this public discussion.

Q10

Are you supportive of the Platform's accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

No,

Please provide additional comments and/or suggestions in the space below.:

It is essential that the needs of LMICs, and particularly neglected people, are not left behind. This must be assured through a transparent, accountable evidence generation framework – inclusive in scope of all Member States challenges and lessons learned – that also provides for civil society engagement, oversight and consultation.

Transparency is currently mentioned as one of the guiding principle of governance of the Platform. Being a prerequisite for both accountability and legitimacy, we urge the Tripartite Organizations that the pathway towards the operationalization of transparency within the Platform and in its interactions with other governance bodies and beyond is likewise transparent, eg. the transparency required should extend to how the Tripartite Agencies and other governing bodies notably the Global Leaders Group on AMR relate not just to members of the Multi-Stakeholder Partnership Forum, but to the public more generally.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

No,

Please provide additional comments and/or suggestions in the space below.:

Composition of the Platform needs to practically reflect on the unique challenges communities face in low- and middle-income countries (LMICs) and the stakeholders and implementers from these settings needs to be guaranteed a proportional representation. The evidence-generation and the implementational practice from low-resource settings where the most knowledge gaps lie is critical to complement the global picture in addressing the issue collectively. The form through which the Cluster and Action Groups, respectively, will be created is critical and should be conducted through an open and transparent process, adding legitimacy and independence to the Platform. The current proposal lacking mechanisms to hold the Tripartite Organizations accountable in selection and implementation processes may be in odds with sought Platform's independence and efficiency. The principle of accountability must also be built into the process of development and formalization of the Platform.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

see above

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

No,

Please provide additional comments and/or suggestions in the space below.:

N/A

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

N/A

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

see above

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

see above

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

No,

Please provide additional comments and/or suggestions in the space below.:

see above

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

N/A

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

To ensure an efficient science-policy translation, the Platform needs to be aligned with parallel governance structures, including GLG and IPEA. Currently, lack of clarity on the accountability linkages between these groups does not offer a room for a strategic discussion on the Platform's set-up with a lasting policy relevance and a robust policy for dealing with any conflict of interest. To add leverage to the process, an evidence-based, holistic systems approach with periodic reports that can inform governments, multilateral organizations and all other stakeholders should be anchored in existing Member States-led governing structures, such as WHO Executive Board meeting or UN General Assembly.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

No,

Please provide additional comments and/or suggestions in the space below.:

N/A

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

The basic requirements should be to have direct or indirect connection in their professional action regarding the human–animal–plant–environment

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Regarding the current situation in North Macedonia practical implementation of activities at country or sectoral level should be the first action needed.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The proposed platform is relevant, timely, and necessary to convene diverse AMR stakeholders.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

All the objectives are relevant. Although the "Taking action" objective is the most challenging to deliver on, it is also the most critically needed, particularly at country level.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Again, we would emphasize the importance of inclusivity and representation of national and subnational stakeholders.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It would be helpful to understand the governance structure of the Platform, namely, who will represent the Platform in communications with the Tripartite DGs.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Presumably, membership will be available on a rolling basis following the initial call to join.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Relevance to the AMR ecosystem and stated organizational commitment to action on AMR in the coming ~3 years.

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The size of the action groups will be important to consider. Groups that are too large risk difficulty establishing consensus and/or diminished engagement. It is unclear whether the action groups will be open to "all members of the platform" or selected and put forward by each cluster group. Governance and decision-making processes within each action group should be defined.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

It depends on how many Action Groups are allowed. Implementation of multisectoral / One Heath approaches would be a valuable addition.

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Referring to an earlier response, it would seem appropriate for cluster groups to be open to all membership, and for cluster groups to put forward names for inclusion on action groups.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

No,

Please provide additional comments and/or suggestions in the space below.:

This information isn't sufficiently clear to make a decision. What is an adequately high level? What criteria defines eligibility for participating in Action Groups? If members are required to disclose details of legal status, governance, etc., this should be included in earlier question re: criteria for membership.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Agree in principle. The steering committee should include as many Action Group leads as needed to correspond with the number of Action Groups (not previously indicated that there would be 3 maximum).

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Relationship between steering committee, GLG and IPEA is unclear.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Seems appropriate in principle, though more detail is needed on flow of information from Action Groups to CT.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Agree in principle, though targets would benefit from a higher level of ambition (especially long-term targets), and greater specificity.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

The MSPP is valuable and needed. We are eager to see this initiative move forward. We generally agree with the parameters outlined above, and look forward to developing a deeper understanding of certain mechanisms and modalities for the platform, as indicated above.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**4 - Actively**
Please provide additional comments and/or suggestions in the space below.:	The United Nations Foundation actively seeks to bring together voices from across the AMR ecosystem to sustain political will and attention on AMR.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below.:
Civil society

Q26

If you have any additional comments or suggestions, provide them in the space below:

Thank you for the opportunity to contribute; we look forward to next steps.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

The purpose of the Platform will be more relevant if the objectives are not 'freely general' but 'freely specific', as human-animal-plant-environment interface are not same or well taken into cognisance in many developing countries, especially, as governmental data and reports are usually more political than genuine, and mostly at significant variance from the obtainable data on the fields and at grassroots.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes,

Please provide additional comments and/or suggestions in the space below.:

There is need for the Platform's Stakeholders to be inclusive of relevant youths as well, particularly, through academic curricular of Agricultural Science as subject at elementary and secondary education, and as a course or degree at the Higher Education.

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes,

Please provide additional comments and/or suggestions in the space below.:

To ensure that the voices of all relevant stakeholders are heard, it is important that the Platforms have Resource Persons that would be readily available to partake, especially, on invitations, in workshops, conferences, symposia, etc., in order to harvest more genuinely relevant data, and to be able to disseminate appropriate information globally; through, very important Cluster Groups.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

-

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Action Groups may also have to be Regional for easier and more far-reaching Global workings.

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

-

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes,

Please provide additional comments and/or suggestions in the space below.:

The Academic and research institutions Cluster Group should include Elementary and High School Education.

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Since the Platform members will receive no fees or other remuneration for their time, there should be recorded means of recognition of their time and efforts such as branded Platform Certificates of Appreciation / Recognition.

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It would be appropriate if virtual Plenary Session can be bi-annually, one before the physical meetings. The Plenary Session, and the second after the physical Plenary Session. The world is in subtle pandemic, which is AMR pandemic. The Platform can therefore, not wait for one-dose annual plenary meeting for Members to be together!

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

A major missing link in combating AMR is not recognising the importance of The Higher Education, as an independent organ much needed to address the global menace of AMR, particularly, in developing countries, where antimicrobials are not controlled or properly controlled.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform’s reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

The tragedies of adulterated, fake, and sub-standard antimicrobials should also take front stage in the AMR Platform's Objectives.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**3 - Moderately**
Please provide additional comments and/or suggestions in the space below.:	My organisation, Pegasus-Zion Community & Environmental Health, Nigeria, is a grass-root Non-Governmental Organisation that is currently addressing the challenge of AMR at the communities and educational levels.

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
Civil Society Organisation Cluster Group. Academic and Research Institutions Cluster Group.

Q26

If you have any additional comments or suggestions, provide them in the space below:

Steering Committee should ensure that Cluster Groups and Action Group Members assist with translation of Very important documents and findings of AMR Platform into local / native languages, for wider outreaches. There should be interactive section on the AMR Platform website(s), where the public can freely ask questions and also obtain first-hand information.

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes,

Please provide additional comments and/or suggestions in the space below.:

Only with multi sectorial approach there is possibility to put under control development and progress of AMR.

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes,

Please provide additional comments and/or suggestions in the space below.:

In a order to have successful approach in solving certain problems it is necessary to have professionally organized chain of command with fully involvement of “decision makers”.

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Efforts should be made to involve as many different participants as possible, in order to complete the approach in the fight against AMR. As an example of alleged shortcomings in the past when environmental representatives were very small, or not represented at all, which resulted in a great deal of ignorance about residues and amounts of antimicrobial substances in the environment.

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Each membership should be supported by verified knowledge in the field of AMR (years of experience, participation in the work of national and international institutions dealing with problematic AMR, published scientific and professional papers)

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

All of them, but with priority of practical implementation of activities at country level (“Find a solution to the lack of commercial incentives to develop a new type of antibiotic”)

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes,

Please provide additional comments and/or suggestions in the space below.:

Proposed structure is good, perhaps in addition to make description of communication among individual structures.

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes,

Please provide additional comments and/or suggestions in the space below.:

Commented in the previous answer.

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

Yes,

Please provide additional comments and/or suggestions in the space below.:

It should be considered the length of long-term plans. (It should have in mind that no new antimicrobial agent has been developed for several last decades.)

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

When the work of the platforms comes to life, only then we will be able to see if there are certain shortcomings, of if something needs to be changed or improved.

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆	**4 - Actively**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
As a longtime veterinary practitioner, and in addition a university professor, my contribution can be reflected in giving guidance to veterinarians in the field on the prudent use of antibiotics.

Q26

Q5

Type of organization:

Government representatives, UN agencies, intergovernmental and regional organizations

Q6

Country:

UK

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Working or collaborating with national public health bodies or government agencies - this could include civil society, academia, research foundations

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

surveillance activities; intervention groups; developing global research networks

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

No,

Please provide additional comments and/or suggestions in the space below.:

think the cluster groups should be multisectoral to forge collaborations and insights - by keeping each of the clusters seperate it promotes exclusivity

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

each action group should have members from govt, finance, civil, university/ research and private sector

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Public Health , Microbiologist, Physician

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Best Practices

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

Yes

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

Have the authority to take action

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Behavior and society change communication

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. The Platform as a whole is intended to come together in the Plenary Session annually, in either virtual or physical meetings. The Plenary Session will be attended by the Tripartite senior leadership.

Yes

Q19

Do you think the proposed structure is appropriate?

No,

Please provide additional comments and/or suggestions in the space below.:

Remove Global Leaders Group and Steering Committee

Q20

Is this communication flow with governments and other stakeholders appropriate? The Platform should devise a communications strategy that seeks to bring the IPEA conclusions and evidence to the attention of priority stakeholders in a way that will enable them to act on the Platform's reports. Through the Coordinating Team (CT), as part of the Tripartite Joint Secretariat (TJS) on AMR, the Platform will avail and communicate with the GLG for AMR, IPEA, the Tripartite and other organizations.

Yes

Q21

Do you agree with the following short-, medium- and long-term targets? The Platform's performance will be measured by key input, process and output indicators that assess the follow-up and impact of its policies and reports. The work plan and metrics of these indicators will be agreed upon by the SC as early as possible. Short-term targets – one year from the establishment of the Platform Attract over 200 members representative of different stakeholder voices and a balance across regions globally. Medium-term targets – three to five years from the establishment of the Platform Drive multidisciplinary action at global, regional and national levels through Action Groups working on key issues of multi-sectoral interest and developing action plans; Build global momentum and generate high-level advocacy to combat AMR; Share and enhance knowledge, evidence and innovation to underpin key AMR actions, policy recommendations and guidance. Long-term targets – 10 years from the establishment of the Platform Generate global commitment to use antimicrobials in a responsible and prudent way to ensure antimicrobials will keep their efficacy; Keep the momentum going by developing a clear roadmap facilitated by the Tripartite and the governance structures driving multidisciplinary action at global and national levels to control AMR.

No,

Please provide additional comments and/or suggestions in the space below.:

Commitment is nothing without action. The long term targets should include actions not just commitment.

Q22

Any other comments? Please enter your answer in the space below, or enter NO if you have no other comments.

The questionnaire took more than 15 minutes:)

Page 4: PART III: GENERAL INTEREST AND CONCLUSION

Q23

Is your organization currently addressing the challenge of AMR? (optional Q)Please rate the question on a scale from 1 to 5, with 5 being fully and 1 being not at all.

☆ **4 - Actively**

Q24

Are you interested in becoming a member of the Platform? (optional Q)

Yes

Q25

Do you identify yourself in one of the clusters? (optional Q)

Yes,
If yes, could you please specify?Please provide additional comments and/or suggestions in the space below::
UN agencies

Q26

Government representatives, UN agencies, intergovernmental and regional organizations

Q6

Country:

Australia

Page 3: PART II: PROPOSED KEY ELEMENTS OF THE PLATFORM

Q7

Is the purpose of the Platform relevant? The purpose of the Platform is to bring together stakeholders across the human-animal-plant-environment interface, assisting to preserve antimicrobials as lifesaving medicines for humans, animals and plants. It will serve as an inclusive, international and multi-stakeholder platform at the forefront of the efforts to strengthen a shared global vision, build more consensus, and contribute to the implementation of the Global Action Plan on AMR (GAP). The Platform will be consistent with, and complementary to, the work of the Global Leaders Group on AMR (GLG) and the Independent Panel on Evidence for Action against AMR (IPEA).

Yes

Q8

Are the objectives of the Platform relevant?
The overall aim of the Platform is to contribute to the reduction and control of the impact of AMR through a multi-stakeholder, inclusive approach. The specific objectives of the Platform will contribute to the GAP and National Action Plans (NAPs) and are as follows: Agreeing on a shared vision: To support the development and implementation of a shared global vision, narrative and targets on AMR – by engaging all relevant stakeholder groups across the human–animal–plant–environment interface to contribute to the implementation of the GAP at global, regional and national levels. Information-sharing and networking: To provide a venue for information-sharing and collaboration to reach a common understanding and enable coordination of activities between the different sectors. Taking action: To encourage collective engagement on diverse areas of importance by all stakeholders – by strengthening collective actions and coordination in areas of priority and common interest in line with other global governance mechanisms and promote the opportunity for stakeholders to work collaboratively to reduce the impact of AMR in support of the GAP; and to enable stakeholder involvement in a coherent way while addressing the main issues impacting upon progress.

Yes

Q9

Are you supportive of the Platform’s guiding principles? Multisectoral and multidisciplinary systems approach: Recognizing the complexity, and political and technical challenges of AMR and its multidisciplinary nature, the work of the Platform will reflect involvement of multiple disciplines and sectors across the human–animal–plant–environment interface (One Health). Transparency and open access: The work of the Platform will be transparent, including its priorities, work plan and Plenary reports. Inclusivity: The Platform will seek inputs and feedback on its work from the GLG, IPEA and key stakeholders at national, regional and global levels across all relevant disciplines, sectors and geographies in a balanced and inclusive way. The reports and products of the Platform will attempt to reflect the position of the many members of the platform and not reflect the position of a single group. The Platform will seek to achieve a balance between inclusiveness and effectiveness. It will ensure that the voices of all relevant stakeholders are heard.

Yes

Q10

Are you supportive of the Platform’s accountability principle? The Platform will be ultimately accountable to the Directors-General of the Tripartite and their governing bodies.

Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.

The suggestions seem like a good starting framework for membership

Q13

Do you agree with the vision for Action Groups? Action Groups will put forward specific topics and subtopics and drive actions. They are open to participation by all members of the Platform and each Cluster Group will be invited to provide members to work in Action Groups. Action Groups will formulate work plans and shall report their progress to the Steering Committee (described below). They will use the evidence and scientific knowledge produced by the IPEA, the Tripartite and relevant research and academic institutions to identify a roadmap for actions, and implement and monitor the impact of actions. Action Groups will work year-round to prepare documentation, data and other evidence for the Plenary Sessions.

Yes

Q14

What type of action do you consider could be usefully taken forward by Action Groups, for example: best practice guidelines; advocacy and information sharing; practical implementation of activities at country or sectoral level; other? Please provide additional comments and/or suggestions in the space below.

Yes

Q15

Do you agree with the proposed Cluster Groups? And should they be maintained as administrative groups or should have a more active role?To ensure broad representation across the One Health spectrum relevant to AMR, members will fall into the following five Cluster Groups: Government representatives, UN agencies, international, intergovernmental and regional organizations; International and regional financial institutions, philanthropic donors; Civil society organizations and networks; Academic and research institutions, including their networks and coalitions; Private sector partners. Membership of the Platform, Action and Cluster Groups will have due regard to geographical, gender and sectoral balance across the One Health spectrum. The Tripartite Joint Secretariat for AMR will actively monitor levels of representation. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items.

Yes

Q16

Do you think that the proposed roles and responsibilities of members are appropriate? Members will be entitled to attend meetings of the Platform and will be encouraged to participate in the Plenary Sessions. Members will participate at an adequately high-level of their organizations, will be eligible to participate in Action Groups that may be formed and contribute to their work. Members will be required to disclose details of their legal status, governance, membership, sources of funding and activities. The Platform members will receive no fees or other remuneration for their time.

Yes

Q17

Do you think that the proposed role and constitution of the Platform's Steering Committee is appropriate? The Platform Steering Committee will be the executive arm of the Platform, setting priorities, facilitating the outcomes from the Plenary Session and the Action Groups, and endorsing actions. It will be composed of a Chair, three representatives of the Tripartite, five Cluster Group leads and three Action Group leads. The Chair will be elected by the other members of the Steering Committee (SC) at the annual Plenary Session and endorsed by the Directors-General of the Tripartite. The term of the Chair will be two years maximum. The Chair will also be the Chair of the annual Plenary Sessions. The Chair will oversee the Platform's strategic and financial plans, long-term objectives and expected outputs, and oversee the work plan devised by the Action Groups and facilitate their activities. The Cluster Group leads and Action Group leads will be elected by the Action Groups and Cluster Groups themselves.

Yes

Q18

Do you agree with the proposed role of the Plenary Session? The Plenary Session is the central area for debate, coordination, decision-making, lesson learning, exchange of best practices, and convergence by all stakeholders at a global level on AMR-related issues. Yes

Q11

Are you satisfied with the proposed approach to membership and members' participation? Membership of the Platform is open to government representatives; UN agencies, international, intergovernmental and regional organizations; international and regional financial institutions, philanthropic donors; civil society organizations and networks relevant to AMR; academic and research organizations across the One Health spectrum relevant to AMR; private sector partners representing sectors that affect, or are affected by, AMR.The Platform's membership shall include sectors or disciplines that are underrepresented in the other global governance mechanisms for AMR, e.g. civil society, private sector and financial institutions. Members of the Platform will focus on bringing in local and sectoral knowledge and power to support collective actions to tackle AMR.A call for membership will be open on the relevant Tripartite online channels and members will be admitted to ensure geographic balance and representation sufficient to address the challenges of AMR. The Platform may invite other interested organizations relevant to its work to observe entire sessions or specific agenda items. Members' participation in the Platform for the purpose of achieving joint action will be channeled through: Primarily, Action Groups developed to drive forward specific topics and subtopics involving different Cluster Groups; Secondarily, Cluster Groups that should ensure similar stakeholders are able to voice their views through the cluster and be represented in the Action Groups.

Yes

Q12

What should be the requirements to qualify for membership and how should membership be agreed? For example, relevance to some aspect of the challenge of AMR, commitment and ability to take action to combat AMR.Please provide additional comments and/or suggestions in the space below.
